THE SEARCH FOR SCALEABLE SOLUTIONS

BIOFUEL

The biggest challenge for reducing emissions is scale

DR VIJAY SWARUP
VICE PRESIDENT, R&D
EXXONMOBIL

The biggest challenge with reducing global emissions is one of scale.

The electrification of cars and light duty vehicles is going to play a big role.

Electric vehicles are a component

The electric vehicle is a component of a system that has

of a system that
has scalable
energy with lower
emissions

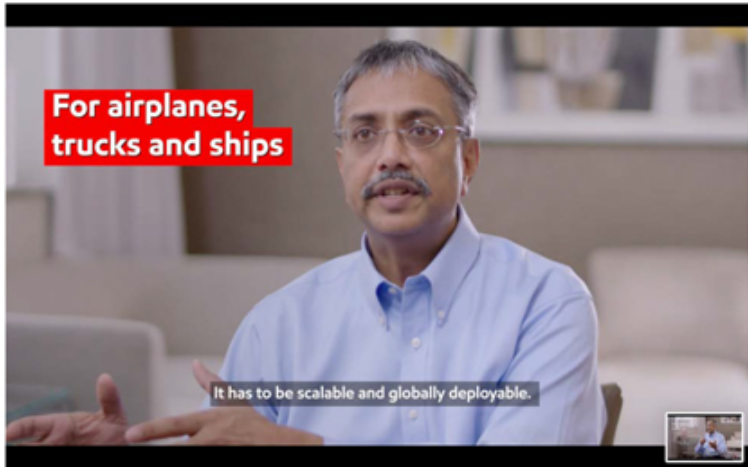

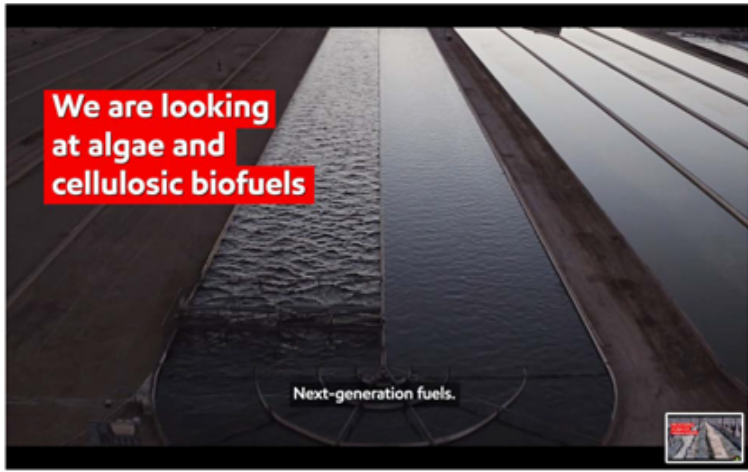

scalable energy with lower emissions.

But there's going to be a point where energy density is needed.

But we also need

So what you're going to be looking for is lower-carbon fuels.

**Algae can
be scaled**

Algae grows in brackish water, so it's not competing for land for food.

VJ: Algae grows in brackish water, so it's not competing for land for food.

TITLE: IT DOESN'T COMPETE FOR LAND FOR GROWING FOOD

VJ: Or for water that's used for irrigation.

TITLE: CELLULOSIC MATERIAL IS AGRICULTURAL MATERIAL LEFTOVER AFTER THE HARVEST

VJ: Cellulosic material, which is agricultural waste, if you will.

VJ: The material that's left after you've harvested the food.

VJ: That has potential to also provide biofuels.

VJ: Those two together could provide the low-emission fuels
