 $The \ information \ in \ the \ Notes \ to \ Condensed \ Consolidated \ Financial \ Statements \ is \ an \ integral \ part \ of \ these \ statements.$

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Basis of Financial Statement Preparation

These unaudited condensed consolidated financial statements should be read in the context of the consolidated financial statements and notes thereto filed with the Securities and Exchange Commission in the Corporation's 2023 Annual Report on Form 10-K. In the opinion of the Corporation, the information furnished herein reflects all known accruals and adjustments necessary for a fair statement of the results for the periods reported herein. All such adjustments are of a normal recurring nature.

The Corporation's exploration and production activities are accounted for under the "successful efforts" method.

Note 2. Pioneer Natural Resources Merger

On October 11, 2023, the Corporation entered into a merger agreement with Pioneer Natural Resources Company (Pioneer), an independent oil and gas exploration and production company, in exchange for ExxonMobil common stock. Based on the October 5 closing price for ExxonMobil shares, the fixed exchange rate of 2.3234 per Pioneer share, and Pioneer's outstanding net debt, the implied enterprise value of the transaction was approximately \$65 billion. We expect that the number of shares issuable in connection with the transaction to be approximately 545 million. The transaction is expected to close in the second quarter of 2024, subject to regulatory approvals.

Pioneer holds over 850,000 net acres in the Midland Basin of West Texas, which consist of proved reserves totaling over 2.4 billion barrels of oil equivalent (as of December 31, 2023) and over 700 thousand oil-equivalent barrels per day of production for the three months ended December 31, 2023.

Note 3. Litigation and Other Contingencies

Litigation

A variety of claims have been made against ExxonMobil and certain of its consolidated subsidiaries in a number of pending lawsuits. Management has regular litigation reviews, including updates from corporate and outside counsel, to assess the need for accounting recognition or disclosure of these contingencies. The Corporation accrues an undiscounted liability for those contingencies where the incurrence of a loss is probable and the amount can be reasonably estimated. If a range of amounts can be reasonably estimated and no amount within the range is a better estimate than any other amount, then the minimum of the range is accrued. The Corporation does not record liabilities when the likelihood that the liability has been incurred is probable but the amount cannot be reasonably estimated or when the liability is believed to be only reasonably possible or remote. For contingencies where an unfavorable outcome is reasonably possible and which are significant, the Corporation discloses the nature of the contingency and, where feasible, an estimate of the possible loss. For purposes of our contingency disclosures, "significant" includes material matters, as well as other matters which management believes should be disclosed.

State and local governments and other entities in various jurisdictions across the United States and its territories have filed a number of legal proceedings against several oil and gas companies, including ExxonMobil, requesting unprecedented legal and equitable relief for various alleged injuries purportedly connected to climate change. These lawsuits assert a variety of novel, untested claims under statutory and common law. Additional such lawsuits may be filed. We believe the legal and factual theories set forth in these proceedings are meritless and represent an inappropriate attempt to use the court system to usurp the proper role of policymakers in addressing the societal challenges of climate change.

Local governments in Louisiana have filed unprecedented legal proceedings against a number of oil and gas companies, including ExxonMobil, requesting compensation for the restoration of coastal marsh erosion in the state. We believe the factual and legal theories set forth in these proceedings are meritless.

While the outcome of any litigation can be unpredictable, we believe the likelihood is remote that the ultimate outcomes of these lawsuits will have a material adverse effect on the Corporation's operations, financial condition, or financial statements taken as a whole. We will continue to defend vigorously against these claims.

Other Contingencies

The Corporation and certain of its consolidated subsidiaries were contingently liable at March 31, 2024, for guarantees relating to notes, loans and performance under contracts. Where guarantees for environmental remediation and other similar matters do not include a stated cap, the amounts reflect management's estimate of the maximum potential exposure. Where it is not possible to make a reasonable estimation of the maximum potential amount of future payments, future performance is expected to be either immaterial or have only a remote chance of occurrence.

March 31, 2024

(millions of dollars)	Equity Company Obligations ⁽¹⁾	Other Third-Party Obligations	Total
Guarantees

⁽¹⁾ Included in the Balance Sheet lines: Notes and accounts receivable - net and Other assets, including intangibles - net.

At March 31, 2024 and December 31, 2023, respectively, the Corporation had \$736 million and \$800 million of collateral under master netting arrangements not offset against the derivatives on the Condensed Consolidated Balance Sheet, primarily related to initial margin requirements.

⁽²⁾ Included in the Balance Sheet line: Investments, advances and long-term receivables.

⁽³⁾ Included in the Balance Sheet lines: Investments, advances and long-term receivables and Other assets, including intangibles - net.

⁽⁴⁾ Included in the Balance Sheet lines: Accounts payable and accrued liabilities and Other long-term obligations.

⁽⁵⁾ Excluding finance lease obligations.

⁽⁶⁾ Advances to/receivables from equity companies and long-term obligations to equity companies are mainly designated as hierarchy level 3 inputs. The fair value is calculated by discounting the remaining obligations by a rate consistent with the credit quality and industry of the company.

⁽⁷⁾ Included in the Balance Sheet line: Other long-term obligations. Includes contingent consideration related to a prior year acquisition where fair value is based on expected drilling activities and discount rates.

The Corporation may use non-derivative financial instruments, such as its foreign currency-denominated debt, as hedges of its net investments in certain foreign subsidiaries. Under this method, the change in the carrying value of the financial instruments due to foreign exchange fluctuations is reported in accumulated other comprehensive income. As of March 31, 2024, the Corporation has designated \$4.9 billion of its Euro-denominated debt and related accrued interest as a net investment hedge of its European business. The net investment hedge is deemed to be perfectly effective.

The Corporation had undrawn short-term committed lines of credit of \$323 million and undrawn long-term committed lines of credit of \$1,914 million as of first quarter 2024.

Derivative Instruments

The Corporation's size, strong capital structure, geographic diversity, and the complementary nature of its business segments reduce the Corporation's enterprise-wide risk from changes in commodity prices, currency rates and interest rates. In addition, the Corporation uses commodity-based contracts, including derivatives, to manage commodity price risk and to generate returns from trading. Commodity contracts held for trading purposes are presented in the Condensed Consolidated Statement of Income on a net basis in the line "Sales and other operating revenue" and in the Consolidated Statement of Cash Flows in "Cash Flows from Operating Activities". The Corporation's commodity derivatives are not accounted for under hedge accounting. At times, the Corporation also enters into currency and interest rate derivatives, none of which are material to the Corporation's financial position as of March 31, 2024 and December 31, 2023, or results of operations for the periods ended March 31, 2024 and 2023.

Credit risk associated with the Corporation's derivative position is mitigated by several factors, including the use of derivative clearing exchanges and the quality of and financial limits placed on derivative counterparties. The Corporation maintains a system of controls that includes the authorization, reporting, and monitoring of derivative activity.

The net notional long/(short) position of derivative instruments at March 31, 2024 and December 31, 2023, was as follows:

(millions)	March 31, 2024	December 31, 2023
Crude oil (barrels)	15	(7)
Petroleum products (barrels)	(39)	(43)
Natural gas (MMBTUs)	(577)	(560)

Realized and unrealized gains/(losses) on derivative instruments that were recognized in the Condensed Consolidated Statement of Income are included in the following lines on a before-tax basis:

(millions of dollars)	Three Months Ended March 31,					
	2024	2023				
Sales and other operating revenue	(792)	651				
Crude oil and product purchases	3	(25)				
Total	(789)	626

⁽¹⁾ Revenue is determined by primary country of operations. Excludes certain sales and other operating revenues in non-U.S. operations where attribution to a specific country is not practicable.

Revenue from Contracts with Customers

Sales and other operating revenue include both revenue within the scope of ASC 606 and outside the scope of ASC 606. Trade receivables in Notes and accounts receivable – net reported on the Balance Sheet also includes both receivables within the scope of ASC 606 and those outside the scope of ASC 606. Revenue and receivables outside the scope of ASC 606 primarily relate to physically settled commodity contracts accounted for as derivatives. Contractual terms, credit quality, and type of customer are generally similar between those revenues and receivables within the scope of ASC 606 and those outside it.

Revenue outside the scope of ASC 606	21,992	19,340			
Total	80,411	83,644			

Note 9. Divestment Activities

Through March 31, 2024, the Corporation realized proceeds of approximately \$0.7 billion from its divestment activities with negligible impact on net after-tax earnings. This included the sale of the Santa Ynez Unit and associated facilities in California, as well as other smaller divestments.

In 2023, the Corporation realized proceeds of approximately \$4.1 billion and recognized net after-tax earnings of approximately \$0.6 billion from its divestment activities. This included the sale of the Aera Energy joint venture, Esso Thailand Ltd., the Billings Refinery, certain unconventional assets in the United States, as well as other smaller divestments.

In February 2022, the Corporation signed an agreement with Seplat Energy Offshore Limited for the sale of Mobil Producing Nigeria Unlimited. The agreement is subject to certain conditions precedent and government approvals. In mid-2022, a Nigerian court issued an order to halt transition activities and enter into arbitration with the Nigerian National Petroleum Company. The closing date and any loss on sale will depend on resolution of these matters.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

In the first quarter of 2024 the price of crude oil remained flat relative to fourth quarter 2023 and near the middle of the pre-COVID 10-year range (2010-2019), as markets remained balanced. More recently, the market for crude has tightened driven by ongoing concerns over conflict in the Middle East. Natural gas prices decreased, moving back toward the middle of the 10-year range, on high inventory levels and lower demand. Refining margins in the quarter rose to the top of the 10-year range, as demand grew while turnarounds and global disruptions weighed on supply. Chemical margins remained relatively flat at bottom-of-cycle conditions, as new capacity additions offset demand growth.

Recent Mergers and Acquisitions

In October 2023, ExxonMobil announced that it had entered into a definitive merger agreement with Pioneer Natural Resources. The transaction represents an opportunity to deliver leading capital efficiency and cost performance as well as increase production by combining Pioneer's large scale, contiguous, high-quality undeveloped Midland acreage with ExxonMobil's Permian resource development approach. In addition to increasing production, we plan to pull forward Pioneer's Net Zero ambition by 15 years, from 2050 to 2035. See "Note 2. Pioneer Natural Resources Merger" of the Condensed Consolidated Financial Statements for additional information.

Selected Earnings Factor Definitions

The earnings factors have been updated to provide additional visibility into drivers of our business results starting this first quarter of 2024. The company evaluates these factors periodically to determine if any enhancements may provide helpful insights to the market. Listed below are descriptions of the earnings factors:

Advantaged Volume Growth. Earnings impacts from change in volume/mix from advantaged assets, strategic projects, and high-value products.

- Advantaged Assets (Advantaged growth projects). Includes Permian, Guyana, Brazil, and LNG.
- Strategic Projects. Includes (i) the following completed projects: Rotterdam Hydrocracker, Corpus Christi Chemical Complex, Baton Rouge Polypropylene, Beaumont Crude Expansion, Baytown Chemical Expansion, Permian Crude Venture, and the 2022 Baytown advanced recycling facility; and (ii) the following projects still to be completed: Fawley Hydrofiner, China Chemical Complex, Singapore Resid Upgrade, Strathcona Renewable Diesel, Proxxima VentureTM, USGC Reconfiguration, additional advanced recycling projects under evaluation worldwide, and additional projects in plan yet to be publicly announced.
- High-Value Products. Includes performance products and lower-emission fuels. Performance products (performance chemicals, performance lubricants) refers to products that provide differentiated performance for multiple applications through enhanced properties versus commodity alternatives and bring significant additional value to customers and end-users. Lower-emission fuels refers to fuels with lower life cycle emissions than conventional transportation fuels for gasoline, diesel and jet transport.

Base Volume. Includes all volume/mix factors not included in Advantaged Volume Growth defined above.

Structural Cost Savings. After-tax earnings effect of Structural Cost Savings as defined on page 19, including cash operating expenses related to divestments that were previously in the "volume/mix" factor.

Expenses. Includes all expenses otherwise not included in other earnings factors.

Timing Effects. Timing effects are primarily related to unsettled derivatives (mark-to-market) and other earnings impacts driven by timing differences between the settlement of derivatives and their offsetting physical commodity realizations (due to LIFO inventory accounting).

Earnings (loss) excluding Identified Items

Earnings (loss) excluding Identified Items (non-GAAP) are earnings (loss) excluding individually significant non-operational events with, typically, an absolute corporate total earnings impact of at least \$250 million in a given quarter. The earnings (loss) impact of an Identified Item for an individual segment in a given quarter may be less than \$250 million when the item impacts several periods or several segments. Earnings (loss) excluding identified items does include non-operational earnings events or impacts that are generally below the \$250 million threshold utilized for Identified Items. Management uses these figures to improve comparability of the underlying business across multiple periods by isolating and removing significant non-operational events from business results. The Corporation believes this view provides investors increased transparency into business results and trends and provides investors with a view of the business as seen through the eyes of management. Earnings (loss) excluding Identified Items is not meant to be viewed in isolation or as a substitute for net income (loss) attributable to ExxonMobil as prepared in accordance with U.S. GAAP.

References in this discussion to Corporate earnings (loss) mean net income (loss) attributable to ExxonMobil (U.S. GAAP) from the Condensed Consolidated Statement of Income. Unless otherwise indicated, references to earnings (loss); Upstream, Energy Products, Chemical Products, Specialty Products, and Corporate and Financing earnings (loss); and earnings (loss) per share are ExxonMobil's share after excluding amounts attributable to noncontrolling interests.

Due to rounding, numbers presented may not add up precisely to the totals indicated.

Structural Cost Savings

Structural Cost Savings describes decreases in cash opex excluding energy and production taxes as a result of operational efficiencies, workforce reductions, divestment-related reductions, and other cost-savings measures that are expected to be sustainable compared to 2019 levels. Relative to 2019, estimated cumulative Structural Cost Savings totaled \$10.1 billion, which included an additional \$0.4 billion in the first three months of 2024. The total change between periods in expenses below will reflect both Structural Cost Savings and other changes in spend, including market factors, such as inflation and foreign exchange impacts, as well as changes in activity levels and costs associated with new operations. Estimates of cumulative annual structural savings may be revised depending on whether cost reductions realized in prior periods are determined to be sustainable compared to 2019 levels. Structural Cost Savings are stewarded internally to support management's oversight of spending over time. This measure is useful for investors to understand the Corporation's efforts to optimize spending through disciplined expense management.

REVIEW OF FIRST QUARTER 2024 RESULTS

ExxonMobil's first-quarter 2024 earnings were \$8.2 billion, or \$2.06 per share assuming dilution, compared with earnings of \$11.4 billion a year earlier. The decrease in earnings was mainly driven by declining industry refining margins and lower natural gas prices. Capital and exploration expenditures were \$5.8 billion, down \$0.5 billion from first quarter 2023.

Upstream First Quarter Earnings Factor Analysis

(millions of dollars)

Price – Price impacts decreased earnings by \$820 million, driven by a 32% decrease in natural gas realizations, partially offset by a 4% increase in liquids realizations.

Advantaged Volume Growth - Higher volumes from advantaged assets increased earnings by \$430 million, mainly driven by Guyana liquids growth.

Base Volume – Lower base volumes decreased earnings by \$400 million, mainly driven by divestments, government-mandated curtailments, and unfavorable entitlement effects.

Structural Cost Savings – Increased earnings by \$90 million.

Expenses – Higher expenses, primarily from depreciation, decreased earnings by \$160 million.

Other – Other items decreased earnings by \$470 million, reflecting other primarily non-cash impacts from tax and inventory adjustments as well as divestments.

Timing Effects - Less unfavorable timing effects from derivatives mark-to-market impacts increased earnings by \$370 million.

Identified Items (1) – 1Q 2023 \$(158) million loss driven by additional European taxes.

(1) Refer to page 18 for definition of Identified Items and earnings (loss) excluding Identified Items.

Entitlements - Net Interest	_	
Entitlements - Price / Spend / Other	(41)	
Government Mandates	(17)	
Divestments	(66)	
Growth / Other	77	
2024	3,784	

⁽¹⁾ Natural gas is converted to an oil-equivalent basis at six million cubic feet per one thousand barrels.

1Q 2024 versus 1Q 2023 1Q 2024 production of 3.8 million oil-equivalent barrels per day decreased 47 thousand oil-equivalent barrels per day from 1Q 2023. Excluding the impacts from entitlements, divestments, and higher government-mandated curtailments, net production grew by 77 thousand oil-equivalent barrels per day, mainly driven by Guyana.

Listed below are descriptions of ExxonMobil's volumes reconciliation factors which are provided to facilitate understanding of the terms.

Entitlements - Net Interest are changes to ExxonMobil's share of production volumes caused by non-operational changes to volume-determining factors. These factors consist of net interest changes specified in Production Sharing Contracts (PSCs), which typically occur when cumulative investment returns or production volumes achieve defined thresholds, changes in equity upon achieving pay-out in partner investment carry situations, equity redeterminations as specified in venture agreements, or as a result of the termination or expiry of a concession. Once a net interest change has occurred, it typically will not be reversed by subsequent events, such as lower crude oil prices.

Entitlements - Price, Spend and Other are changes to ExxonMobil's share of production volumes resulting from temporary changes to non-operational volume-determining factors. These factors include changes in oil and gas prices or spending levels from one period to another. According to the terms of contractual arrangements or government royalty regimes, price or spending variability can increase or decrease royalty burdens and/or volumes attributable to ExxonMobil. For example, at higher prices, fewer barrels are required for ExxonMobil to recover its costs. These effects generally vary from period to period with field spending patterns or market prices for oil and natural gas. Such factors can also include other temporary changes in net interest as dictated by specific provisions in production agreements.

Government Mandates are changes to ExxonMobil's sustainable production levels as a result of production limits or sanctions imposed by governments.

Divestments are reductions in ExxonMobil's production arising from commercial arrangements to fully or partially reduce equity in a field or asset in exchange for financial or other economic consideration.

Growth and Other comprise all other operational and non-operational factors not covered by the above definitions that may affect volumes attributable to ExxonMobil. Such factors include, but are not limited to, production enhancements from project and work program activities, acquisitions including additions from asset exchanges, downtime, market demand, natural field decline, and any fiscal or commercial terms that do not affect entitlements.

Energy Products First Quarter Earnings Factor Analysis

(millions of dollars)

Margin - Margins decreased earnings by \$2,000 million driven by weaker industry refining margins.

Advantaged Volume Growth – Higher volumes from advantaged assets increased earnings by \$140 million, primarily driven by the Beaumont refinery expansion.

Base Volume - Lower base volumes decreased earnings by \$210 million, on divestment of three refining assets (Billings, Sriracha, and Trecate).

Structural Cost Savings – Increased earnings by \$140 million.

Expenses - Higher expenses decreased earnings by \$290 million, on higher scheduled maintenance and turnaround activity.

Other – All other items increased earnings by \$40 million.

Timing Effects – Unfavorable timing effects from derivatives mark-to-market impacts decreased earnings by \$660 million.

Identified Items (1) – 1Q 2023 \$(30) million loss related to additional European taxes.

equipment, and sales and returns of investments	703	854
Cash flow from operations and asset sales (Non-GAAP)	15,367	17,195

Because of the ongoing nature of our asset management and divestment program, we believe it is useful for investors to consider proceeds associated with asset sales together with cash provided by operating activities when evaluating cash available for investment in the business and financing activities, including shareholder distributions.

Cash flow from operations and asset sales in the first quarter of 2024 was \$15.4 billion, a decrease of \$1.8 billion from the comparable 2023 period primarily reflecting lower earnings.

Cash provided by operating activities totaled \$14.7 billion for the first three months of 2024, \$1.7 billion lower than 2023. Net income including noncontrolling interests was \$8.6 billion, a decrease of \$3.3 billion from the prior year period. The adjustment for the noncash provision of \$4.8 billion for depreciation and depletion was up \$0.6 billion from 2023. Changes in operational working capital were a contribution of \$2.0 billion during the period. All other items net decreased cash flows by \$0.7 billion in 2024 versus a contribution of \$0.6 billion in 2023. See the Condensed Consolidated Statement of Cash Flows for additional details.

Investing activities for the first three months of 2024 used net cash of \$4.6 billion, a decrease of \$0.3 billion compared to the prior year. Spending for additions to property, plant and equipment of \$5.1 billion was \$0.3 billion lower than 2023. Proceeds from asset sales were \$0.7 billion, a decrease of \$0.2 billion compared to the prior year. Net investments and advances decreased \$0.2 billion from \$0.4 billion in 2023.

Net cash used in financing activities was \$8.0 billion in the first three months of 2024, including \$3.0 billion for the purchase of 27.5 million shares of ExxonMobil stock, as part of the previously announced buyback program. This compares to net cash used in financing activities of \$8.5 billion in the prior year. Total debt at the end of the first quarter of 2024 was \$40.4 billion compared to \$41.6 billion at year-end 2023. The Corporation's debt to total capital ratio was 16.0 percent at the end of the first quarter of 2024 compared to 16.4 percent at year-end 2023. The net debt to capital ratio was 3.2 percent at the end of the first quarter, a decrease of 1.3 percentage points from year-end 2023. The Corporation's capital allocation priorities are investing in competitively advantaged, high-return projects; maintaining a strong balance sheet; and sharing our success with our shareholders through more consistent share repurchases and a growing dividend. The Corporation distributed a total of \$3.8 billion to shareholders in the first three months of 2024 through dividends.

The Corporation has access to significant capacity of long-term and short-term liquidity. Internally generated funds are expected to cover the majority of financial requirements, supplemented by long-term and short-term debt. The Corporation had undrawn short-term committed lines of credit of \$0.3 billion and undrawn long-term committed lines of credit of \$1.9 billion as of first quarter 2024.

The Corporation, as part of its ongoing asset management program, continues to evaluate its mix of assets for potential upgrade. Because of the ongoing nature of this program, dispositions will continue to be made from time to time which will result in either gains or losses. Additionally, the Corporation continues to evaluate opportunities to enhance its business portfolio through acquisitions of assets or companies, and enters into such transactions from time to time. Key criteria for evaluating acquisitions include strategic fit, cost synergies, potential for future growth, low cost of supply, and attractive valuations. Acquisitions may be made with cash, shares of the Corporation's common stock, or both.

Litigation and other contingencies are discussed in Note 3 to the unaudited condensed consolidated financial statements.

Contractual Obligations

The Corporation and its affiliates have numerous long-term sales and purchase commitments in their various business activities, all of which are expected to be fulfilled with no adverse consequences material to the Corporation's operations or financial condition. Through the first quarter of 2024, the Corporation entered into two long-term purchase agreements with an estimated total obligation of approximately \$3.0 billion.

TAXES

(millions of dollars)	Three Months Ended March 31,						
	2024	2023					
Income taxes	3,803	4,960					
Effective income tax rate	36 %	34 %					
Total other taxes and duties (1)	7,160	8,095					
Total	10,963	13,055					

⁽¹⁾ Includes "Other taxes and duties" plus taxes that are included in "Production and manufacturing expenses" and "Selling, general and administrative expenses".

Total taxes were \$11.0 billion for the first quarter of 2024, a decrease of \$2.1 billion from 2023. Income tax expense was \$3.8 billion compared to \$5.0 billion in the prior year. The effective income tax rate, which is calculated based on consolidated company income taxes and Exxonmobil's share of equity company income taxes, was 36 percent. This increased from the 34 percent rate in the prior year period due primarily to a change in mix of results in jurisdictions with varying tax rates. Total other taxes and duties decreased by \$0.9 billion to \$7.2 billion.

CAPITAL AND EXPLORATION EXPENDITURES

(millions of dollars)	Three Mon Marc	
	2024	2023
Upstream (including exploration expenses)	4,582	4,581
Energy Products	527	685
Chemical Products	433	831
Specialty Products	76	91
Other	221	192
Total	5,839	6,380

Capital and exploration expenditures in the first quarter of 2024 were \$5.8 billion, down 8% from the first quarter of 2023. The Corporation plans to invest in the range of \$23 billion to \$25 billion in 2024. Actual spending could vary depending on the progress of individual projects and property acquisitions.

FORWARD-LOOKING STATEMENTS

Statements related to future events; projections; descriptions of strategic, operating, and financial plans and objectives; statements of future ambitions and plans; and other statements of future events or conditions, are forward-looking statements. Similarly, discussion of roadmaps or future plans related to carbon capture, transportation and storage, biofuel, hydrogen, direct air capture, and other future plans to reduce emissions and emission intensity of ExxonMobil, its affiliates, companies it is seeking to acquire and third parties are dependent on future market factors, such as continued technological progress, policy support and timely rule-making and permitting, and represent forward-looking statements.

Actual future results, including financial and operating performance; potential earnings, cash flow, dividends or shareholder returns, including the timing and amounts of share repurchases; total capital expenditures and mix, including allocations of capital to low carbon investments; realization and maintenance of structural cost reductions and efficiency gains, including the ability to offset inflationary pressure; plans to reduce future emissions and emissions intensity, including ambitions to reach Scope 1 and Scope 2 net zero from operated assets by 2050, to reach Scope 1 and 2 net zero in Upstream Permian Basin unconventional operated assets by 2030 and in Pioneer assets by 2035, to eliminate routine flaring in-line with World Bank Zero Routine Flaring, and to reach near-zero methane emissions from operated assets and other methane initiatives; meeting ExxonMobil's divestment and start-up plans, and associated project plans as well as technology advances, including the timing and outcome of projects to capture, transport and store CO2, produce hydrogen, produce biofuels, produce lithium, create new advanced carbon materials, and use plastic waste as a feedstock for advanced recycling; timely granting of governmental permits and certifications; future debt levels and credit ratings; business and project plans, timing, costs, capacities and profitability; resource recoveries and production rates; and planned Denbury and Pioneer integrated benefits could differ materially due to a number of factors

These include global or regional changes in the supply and demand for oil, natural gas, petrochemicals, and feedstocks and other market factors, economic conditions, and seasonal fluctuations that impact prices and differentials for our products; changes in law, regulations, taxes, trade sanctions, or policies, such as government policies supporting lower carbon and new market investment opportunities such as the U.S. Inflation Reduction Act and the ability for projects to qualify for the financial incentives available thereunder, the punitive European taxes on the oil and gas sector and unequal support for different technological methods of emissions reduction or evolving, ambiguous and unharmonized standards imposed by various jurisdictions related to sustainability and GHG reporting; variable impacts of trading activities on our margins and results each quarter; actions of competitors and commercial counterparties; the outcome of commercial negotiations, including final agreed terms and conditions; the ability to access debt markets on favorable terms or at all; the occurrence, pace, rate of recovery and effects of public health crises, including the response from governments; reservoir performance, including variability and timing factors applicable to unconventional resources; the level and outcome of exploration projects and decisions to invest in future reserves; timely completion of development and other construction projects; final management approval of future projects and any changes in the scope, terms, costs or assumptions of such projects as approved; the actions of government or other actors against our core business activities and acquisitions, divestitures or financing opportunities; war, civil unrest, attacks against the company or industry, and other geopolitical or security disturbances, including disruption of land or sea transportation routes; expropriations, seizure, or capacity, insurance, shipping or export limitations imposed by governments or laws; opportunities for potential acquisitions, investments or divestments and satisfaction of applicable conditions to closing, including timely regulatory approvals; the capture of efficiencies within and between business lines and the ability to maintain near-term cost reductions as ongoing efficiencies; unforeseen technical or operating difficulties and unplanned maintenance; the development and competitiveness of alternative energy and emission reduction technologies; the results of research programs and the ability to bring new technologies to commercial scale on a cost-competitive basis; and other factors discussed under "Item 1A. Risk Factors" of ExxonMobil's 2023 Form 10-K.

Forward-looking and other statements regarding environmental and other sustainability efforts and aspirations are not an indication that these statements are material to investors or require disclosure in our filing with the SEC. In addition, historical, current, and forward-looking environmental and other sustainability-related statements may be based on standards for measuring progress that are still developing, internal controls and processes that continue to evolve, and assumptions that are subject to change in the future, including future rule-making.

Energy demand models are forward-looking by nature and aim to replicate system dynamics of the global energy system, requiring simplifications. The reference to any scenario in this report, including any potential net-zero scenarios, does not imply ExxonMobil views any particular scenario as likely to occur. In addition, energy demand scenarios require assumptions on a variety of parameters. As such, the outcome of any given scenario using an energy demand model comes with a high degree of uncertainty. Third-party scenarios discussed in this report reflect the modeling assumptions and outputs of their respective authors, not ExxonMobil, and their use by ExxonMobil is not an endorsement by ExxonMobil of their underlying assumptions, likelihood or probability. Investment decisions are made on the basis of ExxonMobil's separate planning process. Any use of the modeling of a third-party organization within this report does not constitute or imply an endorsement by ExxonMobil of any or all of the positions or activities of such organization.

Actions needed to advance ExxonMobil's 2030 greenhouse gas emission-reductions plans are incorporated into its medium-term business plans, which are updated annually. The reference case for planning beyond 2030 is based on ExxonMobil's Global Outlook (Outlook) research and publication. The Outlook is reflective of the existing global policy environment and an assumption of increasing policy stringency and technology improvement to 2050. However, the Outlook does not attempt to project the degree of required future policy and technology advancement and deployment for the world, or ExxonMobil, to meet net zero by 2050. As future policies and technology advancements emerge, they will be incorporated into the Outlook, and ExxonMobil's business plans will be updated accordingly. References to projects or opportunities may not reflect investment decisions made by ExxonMobil or its affiliates. Individual projects or opportunities may advance based on a number of factors, including availability of supportive policy, permitting, technological advancement for cost-effective abatement, insights from the company planning process, and alignment with our partners and other stakeholders. Capital investment guidance in lower-emission investments is based on our corporate plan; however, actual investment levels will be subject to the availability of the opportunity set, public policy support, and focused on returns.

The term "project" as used in this report can refer to a variety of different activities and does not necessarily have the same meaning as in any government payment transparency reports.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information about market risks for the three months ended March 31, 2024, does not differ materially from that discussed under Item 7A of the registrant's Annual Report on Form 10-K for 2023.

ITEM 4. CONTROLS AND PROCEDURES

As indicated in the certifications in Exhibit 31 of this report, the Corporation's Chief Executive Officer, Chief Financial Officer and Principal Accounting Officer have evaluated the Corporation's disclosure controls and procedures as of March 31, 2024. Based on that evaluation, these officers have concluded that the Corporation's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Corporation in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to them in a manner that allows for timely decisions regarding required disclosures and are effective in ensuring that such information is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. There were no changes during the Corporation's last fiscal quarter that materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

ExxonMobil has elected to use a \$1 million threshold for disclosing environmental proceedings.

Refer to the relevant portions of Note 3 of this Quarterly Report on Form 10-Q for further information on legal proceedings.

As reported in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2022, on August 4, 2022, XTO Energy, Inc. ("XTO") received a letter from the Department of Justice ("DOJ") notifying XTO of the United States Environmental Protection Agency's ("EPA") request to initiate a potential civil action against XTO regarding the Schnegg well in Powhatan Point, Ohio. The EPA alleged XTO breached its duty under the General Duty Clause of the Clean Air Act for the Schnegg well, and such breaches resulted in the 2018 well blowout. Neither a civil action has been filed nor a draft consent decree has been provided by the DOJ. In January 2024, the DOJ demanded \$25 million to settle the alleged violations. XTO strongly disagrees with the DOJ's position.

As reported in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2022, the State of Texas, acting by and through its Attorney General ("State"), filed a complaint against the Corporation (captioned State of Texas v. Exxon Mobil Corporation) in Travis County District Court, TX, Cause No. D-1-GN-22-006534, for alleged violations of the Texas Clean Air Act at the Baytown Olefins Plant located in Baytown, Texas seeking civil penalties in excess of \$1 million, injunctive relief, and recovery of its fees and costs of litigation. In March 2024, the State of Texas and the Corporation agreed to settle the alleged violations upon payment of \$2.2 million to the State of Texas (the "Proposed Settlement"). Once the Proposed Settlement is published in the Federal Register, it will be open to public comment for 30 days before the District Court may approve it.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities for Quarter Ended March 31, 2024

	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share ⁽²⁾	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽³⁾	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program (Billions of dollars) (4)
January 2024	2,729,980	\$102.69	2,704,895	\$17.2
February 2024	11,040,594	\$103.55	11,040,594	\$16.1
March 2024	13,797,147	\$110.48	13,797,137	\$14.6
Total	27,567,721	\$106.94	27,542,626	

⁽¹⁾ Includes shares withheld from participants in the company's incentive program for personal income taxes.

During the first quarter, the Corporation did not issue or sell any unregistered equity securities.

ITEM 5. OTHER INFORMATION

During the three months ended March 31, 2024, none of the Company's directors or officers adopted or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408(a) of Regulation S-K.

ITEM 6. EXHIBITS

See Index to Exhibits of this report.

⁽²⁾ Excludes 1% U.S. excise tax on stock repurchases.

⁽³⁾ Purchases were made under terms intended to qualify for exemption under Rules 10b-18 and 10b5-1. As required by securities law restrictions, no repurchases take place during proxy solicitation and voting periods for transactions involving the issuance of ExxonMobil shares. For the Pioneer transaction, this period occurred during the first quarter of 2024.

⁽⁴⁾ In its 2022 Corporate Plan Update released December 8, 2022, the Corporation stated that the company expanded its share repurchase program to up to \$50 billion through 2024, including \$15 billion of repurchases in 2022 and \$17.5 billion in 2023. In its 2023 Corporate Plan Update released December 6, 2023, the Corporation stated that after the Pioneer transaction closes, the go-forward share repurchase program pace is expected to increase to \$20 billion annually through 2025, assuming reasonable market conditions.

I, Darren W. Woods, certify that:

D

- 1. I have reviewed this quarterly report on Form 10-Q of Exxon Mobil Corporation;
- Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
