2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

☑ **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 31, 2016

or

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from to

Commission File Number 1-2256

EXXON MOBIL CORPORATION

(Exact name of registrant as specified in its charter)

NEW JERSEY	**13-5409005**
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification Number)

5959 LAS COLINAS BOULEVARD, IRVING, TEXAS 75039-2298

(Address of principal executive offices) (Zip Code)

(972) 444-1000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Stock, without par value (4,146,513,819 shares outstanding at January 31, 2017)	**New York Stock Exchange**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☑ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☑

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorte that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☑ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rul Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☑ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive p information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☑

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerat and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☑ Accelerated filer ☐

Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined by Rule 12b-2 of the Act). Yes ☐ No ☑

The aggregate market value of the voting stock held by non-affiliates of the registrant on June 30, 2016, the last business day of the registrant's most recently completed second fiscal quarter, based on the price on that date of $93.74 on the New York Stock Exchange composite tape, was in excess of $388 billion.

Documents Incorporated by Reference: Proxy Statement for the 2017 Annual Meeting of Shareholders (Part III)

EXXON MOBIL CORPORATION
FORM 10-K
FOR THE FISCAL YEAR ENDED DECEMBER 31, 2016

TABLE OF CONTENTS

PART I

ITEM 1. BUSINESS

Exxon Mobil Corporation was incorporated in the State of New Jersey in 1882. Divisions and affiliated companies of ExxonMobil operate or market products in the United States and mo countries of the world. Their principal business is energy, involving exploration for, and production of, crude oil and natural gas, manufacture of petroleum products and transportation and crude oil, natural gas and petroleum products. ExxonMobil is a major manufacturer and marketer of commodity petrochemicals, including olefins, aromatics, polyethylene and polypro plastics and a wide variety of specialty products. Affiliates of ExxonMobil conduct extensive research programs in support of these businesses.

Exxon Mobil Corporation has several divisions and hundreds of affiliates, many with names that include *ExxonMobil*, *Exxon*, *Esso*, *Mobil* or *XTO*. For convenience and simplicity, in thi the terms *ExxonMobil*, *Exxon*, *Esso*, *Mobil* and *XTO*, as well as terms like *Corporation*, *Company*, *our*, *we* and *its*, are sometimes used as abbreviated references to specific affiliates or gr affiliates. The precise meaning depends on the context in question.

Throughout ExxonMobil's businesses, new and ongoing measures are taken to prevent and minimize the impact of our operations on air, water and ground. These include a significant inv in refining infrastructure and technology to manufacture clean fuels, as well as projects to monitor and reduce nitrogen oxide, sulfur oxide and greenhouse gas emissions, and expenditures f retirement obligations. Using definitions and guidelines established by the American Petroleum Institute, ExxonMobil's 2016 worldwide environmental expenditures for all such preventat remediation steps, including ExxonMobil's share of equity company expenditures, were $4.9 billion, of which $3.5 billion were included in expenses with the remainder in capital expen The total cost for such activities is expected to remain relatively flat at approximately $5 billion in 2017 and 2018. Capital expenditures are expected to account for approximately 30 percen total.

The energy and petrochemical industries are highly competitive. There is competition within the industries and also with other industries in supplying the energy, fuel and chemical needs industrial and individual consumers. The Corporation competes with other firms in the sale or purchase of needed goods and services in many national and international markets and emp methods of competition which are lawful and appropriate for such purposes.

Operating data and industry segment information for the Corporation are contained in the Financial Section of this report under the following: "Quarterly Information", "Note 18: Disc about Segments and Related Information" and "Operating Information". Information on oil and gas reserves is contained in the "Oil and Gas Reserves" part of the "Supplemental Informa Oil and Gas Exploration and Production Activities" portion of the Financial Section of this report.

ExxonMobil has a long-standing commitment to the development of proprietary technology. We have a wide array of research programs designed to meet the needs identified in each business segments. Information on Company-sponsored research and development spending is contained in "Note 3: Miscellaneous Financial Information" of the Financial Section of this ExxonMobil held nearly 12 thousand active patents worldwide at the end of 2016. For technology licensed to third parties, revenues totaled approximately $104 million in 2016. A technology is an important contributor to the overall operations and results of our Company, the profitability of each business segment is not dependent on any individual patent, trade trademark, license, franchise or concession.

The number of regular employees was 71.1 thousand, 73.5 thousand, and 75.3 thousand at years ended 2016, 2015 and 2014, respectively. Regular employees are defined as active exe management, professional, technical and wage employees who work full time or part time for the Corporation and are covered by the Corporation's benefit plans and programs. Regular em do not include employees of the company-operated retail sites (CORS). The number of CORS employees was 1.6 thousand, 2.1 thousand, and 8.4 thousand at years ended 2016, 2015 an respectively. The decrease in CORS employees reflects the multi-year transition of the company-operated retail network to a more capital-efficient Branded Wholesaler model.

Information concerning the source and availability of raw materials used in the Corporation's business, the extent of seasonality in the business, the possibility of renegotiation of pr termination of contracts at the election of governments and risks attendant to foreign operations may be found in "Item 1A. Risk Factors" and "Item 2. Properties" in this report.

ExxonMobil maintains a website at exxonmobil.com. Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports furnished pursuant to Section 13(a) of the Securities Exchange Act of 1934 are made available through our website as soon as reasonably practical after we electronically file or furnish the to the Securities and Exchange Commission (SEC). Also available on the Corporation's website are the Company's Corporate Governance Guidelines and Code of Ethics and Business Con well as the charters of the audit, compensation and nominating committees of the Board of Directors. Information on our website is not incorporated into this report.

ITEM 1A. RISK FACTORS

ExxonMobil's financial and operating results are subject to a variety of risks inherent in the global oil, gas, and petrochemical businesses. Many of these risk factors are not within the Con control and could adversely affect our business, our financial and operating results, or our financial condition. These risk factors include:

Supply and Demand

The oil, gas, and petrochemical businesses are fundamentally commodity businesses. This means ExxonMobil's operations and earnings may be significantly affected by changes in oil, g petrochemical prices and by changes in margins on refined products. Oil, gas, petrochemical, and product prices and margins in turn depend on local, regional, and global events or conditi affect supply and demand for the relevant commodity. Any material decline in oil or natural gas prices could have a material adverse effect on certain of the Company's operations, espec the Upstream segment, financial condition and proved reserves. On the other hand, a material increase in oil or natural gas prices could have a material adverse effect on certain of the Con operations, especially in the Downstream and Chemical segments.

Economic conditions. The demand for energy and petrochemicals correlates closely with general economic growth rates. The occurrence of recessions or other periods of low or n economic growth will typically have a direct adverse impact on our results. Other factors that affect general economic conditions in the world or in a major region, such as changes in pop growth rates, periods of civil unrest, government austerity programs, or currency exchange rate fluctuations, can also impact the demand for energy and petrochemicals. Sovereig downgrades, defaults, inability to access debt markets due to credit or legal constraints, liquidity crises, the breakup or restructuring of fiscal, monetary, or political systems such as the Eu Union, and other events or conditions that impair the functioning of financial markets and institutions also pose risks to ExxonMobil, including risks to the safety of our financial assets an ability of our partners and customers to fulfill their commitments to ExxonMobil.

Other demand-related factors. Other factors that may affect the demand for oil, gas, and petrochemicals, and therefore impact our results, include technological improvements in efficiency; seasonal weather patterns, which affect the demand for energy associated with heating and cooling; increased competitiveness of alternative energy sources that have so far ge not been competitive with oil and gas without the benefit of government subsidies or mandates; and changes in technology or consumer preferences that alter fuel choices, such as alternative fueled or electric vehicles.

Other supply-related factors. Commodity prices and margins also vary depending on a number of factors affecting supply. For example, increased supply from the development of new gas supply sources and technologies to enhance recovery from existing sources tend to reduce commodity prices to the extent such supply increases are not offset by commensurate gr demand. Similarly, increases in industry refining or petrochemical manufacturing capacity tend to reduce margins on the affected products. World oil, gas, and petrochemical supply levels c be affected by factors that reduce available supplies, such as adherence by member countries to OPEC production quotas and the occurrence of wars, hostile actions, natural disasters, disr in competitors' operations, or unexpected unavailability of distribution channels that may disrupt supplies. Technological change can also alter the relative costs for competitors to find, p and refine oil and gas and to manufacture petrochemicals.

Other market factors. ExxonMobil's business results are also exposed to potential negative impacts due to changes in interest rates, inflation, currency exchange rates, and other local or r market conditions. We generally do not use financial instruments to hedge market exposures.

Government and Political Factors

ExxonMobil's results can be adversely affected by political or regulatory developments affecting our operations.

Access limitations. A number of countries limit access to their oil and gas resources, or may place resources off-limits from development altogether. Restrictions on foreign investment in and gas sector tend to increase in times of high commodity prices, when national governments may have less need of outside sources of private capital. Many countries also restrict the im export of certain products based on point of origin.

Restrictions on doing business. ExxonMobil is subject to laws and sanctions imposed by the U.S. or by other jurisdictions where we do business that may prohibit ExxonMobil or certai affiliates from doing business in certain countries, or restricting the kind of business that may be conducted. Such restrictions may provide a competitive advantage to competitors who may subject to comparable restrictions.

Lack of legal certainty. Some countries in which we do business lack well-developed legal systems, or have not yet adopted clear regulatory frameworks for oil and gas development. I legal certainty exposes our operations to increased risk of adverse or unpredictable actions by government officials, and also makes it more difficult for us to enforce our contracts. In som these risks can be partially offset by agreements to arbitrate disputes in an international forum, but the adequacy of this remedy may still depend on the local legal system to enforce an awar

Regulatory and litigation risks. Even in countries with well-developed legal systems where ExxonMobil does business, we remain exposed to changes in law (including changes that resu international treaties and accords) that could adversely affect our results, such as:

- increases in taxes, duties, or government royalty rates (including retroactive claims);
- price controls;
- changes in environmental regulations or other laws that increase our cost of compliance or reduce or delay available business opportunities (including changes in laws re offshore drilling operations, water use, methane emissions, or hydraulic fracturing);
- adoption of regulations mandating the use of alternative fuels or uncompetitive fuel components;
- adoption of government payment transparency regulations that could require us to disclose competitively sensitive commercial information, or that could cause us to violate t disclosure laws of other countries; and
- government actions to cancel contracts, re-denominate the official currency, renounce or default on obligations, renegotiate terms unilaterally, or expropriate assets.

Legal remedies available to compensate us for expropriation or other takings may be inadequate.

We also may be adversely affected by the outcome of litigation, especially in countries such as the United States in which very large and unpredictable punitive damage awards may occu government enforcement proceedings alleging non-compliance with applicable laws or regulations.

Security concerns. Successful operation of particular facilities or projects may be disrupted by civil unrest, acts of sabotage or terrorism, and other local security concerns. Such concer require us to incur greater costs for security or to shut down operations for a period of time.

Climate change and greenhouse gas restrictions. Due to concern over the risk of climate change, a number of countries have adopted, or are considering the adoption of, regulatory fram to reduce greenhouse gas emissions. These include adoption of cap and trade regimes, carbon taxes, restrictive permitting, increased efficiency standards, and incentives or mandates for ren energy. These requirements could make our products more expensive, lengthen project implementation times, and reduce demand for hydrocarbons, as well as shift hydrocarbon demand relatively lower-carbon sources such as natural gas. Current and pending greenhouse gas regulations may also increase our compliance costs, such as for monitoring or sequestering emissio

Government sponsorship of alternative energy. Many governments are providing tax advantages and other subsidies to support alternative energy sources or are mandating the use of s fuels or technologies. Governments and others are also promoting research into new technologies to reduce the cost and increase the scalability of alternative energy sources. We are con our own research both in-house and by working with more than 80 leading universities around the world, including the Massachusetts Institute of Technology, Princeton University, the Uni of Texas, and Stanford University. Our research projects focus on developing algae-based biofuels, carbon capture and storage, breakthrough energy efficiency processes, advanced energy materials and other technologies. For example, ExxonMobil is working with Fuel Cell Energy Inc. to explore using carbonate fuel cells to economically capture CO_2 emissions from g power plants. Our future results may depend in part on the success of our research efforts and on our ability to adapt and apply the strengths of our current business model to providing the products of the future in a cost-competitive manner. See “Management Effectiveness” below.

Management Effectiveness

In addition to external economic and political factors, our future business results also depend on our ability to manage successfully those factors that are at least in part within our contr extent to which we manage these factors will impact our performance relative to competition. For projects in which we are not the operator, we depend on the management effectiveness of more co-venturers whom we do not control.

Exploration and development program. Our ability to maintain and grow our oil and gas production depends on the success of our exploration and development efforts. Among other fact must continuously improve our ability to identify the most promising resource prospects and apply our project management expertise to bring discovered resources on line as scheduled and budget.

Project management. The success of ExxonMobil’s Upstream, Downstream, and Chemical businesses depends on complex, long-term, capital intensive projects. These projects in turn re high degree of project management expertise to maximize efficiency. Specific factors that can affect the performance of major projects include our ability to: negotiate successfully wi venturers, partners, governments, suppliers, customers, or others; model and optimize reservoir performance; develop markets for project outputs, whether through long-term contracts development of effective spot markets; manage changes in operating conditions and costs, including costs of third party equipment or services such as drilling rigs and shipping; prevent extent possible, and respond effectively to unforeseen technical difficulties that could delay project startup or cause unscheduled project downtime; and influence the performance of operators where ExxonMobil does not perform that role.

The term “project” as used in this report can refer to a variety of different activities and does not necessarily have the same meaning as in any government payment transparency reports.

Operational efficiency. An important component of ExxonMobil’s competitive performance, especially given the commodity-based nature of many of our businesses, is our ability to efficiently, including our ability to manage expenses and improve production yields on an ongoing basis. This requires continuous management focus, including technology improvemen control, productivity enhancements, regular reappraisal of our asset portfolio, and the recruitment, development, and retention of high caliber employees.

Research and development. To maintain our competitive position, especially in light of the technological nature of our businesses and the need for continuous efficiency impro ExxonMobil’s research and development organizations must be successful and able to adapt to a changing market and policy environment, including developing technologies to help greenhouse gas emissions.

Safety, business controls, and environmental risk management. Our results depend on management’s ability to minimize the inherent risks of oil, gas, and petrochemical operations, to effectively our business activities, and to minimize the potential for human error. We apply rigorous management systems and continuous focus to workplace safety and to avoiding spills adverse environmental events. For example, we work to minimize spills through a combined program of effective operations integrity management, ongoing upgrades, key equ replacements, and comprehensive inspection and surveillance. Similarly, we are implementing cost-effective new technologies and adopting new operating practices to reduce air emissio only in response to government requirements but also to address community priorities. We also maintain a disciplined framework of internal controls and apply a controls management sys monitoring compliance with this framework. Substantial liabilities and other adverse impacts could result if our management systems and controls do not function as intended. The ability to against such risks is limited by the capacity of the applicable insurance markets, which may not be sufficient.

Business risks also include the risk of cybersecurity breaches. If our systems for protecting against cybersecurity risks prove not to be sufficient, ExxonMobil could be adversely affected by having its business systems compromised, its proprietary information altered, lost or stolen, or its business operations disrupted.

Preparedness. Our operations may be disrupted by severe weather events, natural disasters, human error, and similar events. For example, hurricanes may damage our offshore pro facilities or coastal refining and petrochemical plants in vulnerable areas. Our facilities are designed, constructed, and operated to withstand a variety of extreme climatic and other conditio safety factors built in to cover a number of engineering uncertainties, including those associated with wave, wind, and current intensity, marine ice flow patterns, permafrost stability, stor magnitude, temperature extremes, extreme rain fall events, and earthquakes. Our consideration of changing weather conditions and inclusion of safety factors in design covers the engi uncertainties that climate change and other events may potentially introduce. Our ability to mitigate the adverse impacts of these events depends in part upon the effectiveness of our robust engineering as well as our rigorous disaster preparedness and response and business continuity planning.

Projections, estimates, and descriptions of ExxonMobil’s plans and objectives included or incorporated in Items 1, 1A, 2, 7 and 7A of this report are forward-looking statements. Actua results, including project completion dates, production rates, capital expenditures, costs, and business plans could differ materially due to, among other things, the factors discussed abo elsewhere in this report.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Information with regard to oil and gas producing activities follows:

1. Disclosure of Reserves

A. Summary of Oil and Gas Reserves at Year-End 2016

The table below summarizes the oil-equivalent proved reserves in each geographic area and by product type for consolidated subsidiaries and equity companies. Gas is converted to equivalent basis at six million cubic feet per one thousand barrels. The Corporation has reported proved reserves on the basis of the average of the first-day-of-the-month price for each during the last 12-month period. As a result of very low prices during 2016, under the SEC definition of proved reserves, certain quantities of oil and natural gas that qualified as proved rese prior years did not qualify as proved reserves at year-end 2016. Among the factors that would result in these amounts being recognized again as proved reserves at some point in the futu recovery in average price levels, a further decline in costs, and / or operating efficiencies. Otherwise, no major discovery or other favorable or adverse event has occurred since Decem 2016, that would cause a significant change in the estimated proved reserves as of that date.

	Crude Oil	Natural Gas Liquids	Bitumen	Synthetic Oil	Natural Gas	Oil-Equivale Basis

Total Undeveloped	3,030	549	265	-	14,279	
Total Proved Reserves	7,754	1,538	701	564	56,503	

(1) South America includes proved developed reserves of 29 billion cubic feet of natural gas.

In the preceding reserves information, consolidated subsidiary and equity company reserves are reported separately. However, the Corporation operates its business with the same view o company reserves as it has for reserves from consolidated subsidiaries.

The Corporation anticipates several projects will come online over the next few years providing additional production capacity. However, actual volumes will vary from year to year du timing of individual project start-ups; operational outages; reservoir performance; performance of enhanced oil recovery projects; regulatory changes; the impact of fiscal and commercia asset sales; weather events; price effects on production sharing contracts; changes in the amount and timing of capital investments that may vary depending on the oil and gas price enviro and other factors described in Item 1A. Risk Factors.

The estimation of proved reserves, which is based on the requirement of reasonable certainty, is an ongoing process based on rigorous technical evaluations, commercial and market asse and detailed analysis of well and reservoir information such as flow rates and reservoir pressures. Furthermore, the Corporation only records proved reserves for projects which have r significant funding commitments by management made toward the development of the reserves. Although the Corporation is reasonably certain that proved reserves will be produced, the and amount recovered can be affected by a number of factors including completion of development projects, reservoir performance, regulatory approvals and significant changes in projec long-term oil and natural gas price levels. In addition, proved reserves could be affected by an extended period of low prices which could reduce the level of the Corporation's capital spend also impact our partners' capacity to fund their share of joint projects.

As noted above, certain quantities of oil and natural gas that qualified as proved reserves in prior years did not qualify as proved reserves at year-end 2016. Amounts no longer qualifying as reserves include the entire 3.5 billion barrels of bitumen at Kearl. In addition, 0.8 billion barrels of oil equivalent across the remainder of North America no longer qualify as proved r mainly due to the acceleration of the projected end-of-field-life. Among the factors that would result in these amounts being recognized again as proved reserves at some point in the futu recovery in average price levels, a further decline in costs, and / or operating efficiencies. Under the terms of certain contractual arrangements or government royalty regimes, lower prices c increase proved reserves attributable to ExxonMobil. We do not expect the downward revision of reported proved reserves under SEC definitions to affect the operation of the underlying p or to alter our outlook for future production volumes.

B. Technologies Used in Establishing Proved Reserves Additions in 2016

Additions to ExxonMobil's proved reserves in 2016 were based on estimates generated through the integration of available and appropriate geological, engineering and production data, u well-established technologies that have been demonstrated in the field to yield repeatable and consistent results.

Data used in these integrated assessments included information obtained directly from the subsurface via wellbores, such as well logs, reservoir core samples, fluid samples, static and d pressure information, production test data, and surveillance and performance information. The data utilized also included subsurface information obtained through indirect measurements in high-quality 3-D and 4-D seismic data, calibrated with available well control information. The tools used to interpret the data included proprietary seismic processing software, prop reservoir modeling and simulation software, and commercially available data analysis packages.

In some circumstances, where appropriate analog reservoirs were available, reservoir parameters from these analogs were used to increase the quality of and confidence in the reserves estim

C. Qualifications of Reserves Technical Oversight Group and Internal Controls over Proved Reserves

ExxonMobil has a dedicated Global Reserves group that provides technical oversight and is separate from the operating organization. Primary responsibilities of this group include oversigh reserves estimation process for compliance with Securities and Exchange Commission (SEC) rules and regulations, review of annual changes in reserves estimates, and the repor ExxonMobil's proved reserves. This group also maintains the official company reserves estimates for ExxonMobil's proved reserves of crude and natural gas liquids, bitumen, synthetic natural gas. In addition, the group provides training to personnel involved in the reserves estimation and reporting process within ExxonMobil and its affiliates. The Manager of the Reserves group has more than 25 years of experience in reservoir engineering and reserves assessment and has a degree in Engineering. He is an active member of the Society of Pe Engineers (SPE). The group is staffed with individuals that have an average of more than 20 years of technical experience in the petroleum industry, including expertise in the classificat categorization of reserves under the SEC guidelines. This group includes individuals who hold advanced degrees in either Engineering or Geology. Several members of the group hold profe registrations in their field of expertise, and a member currently serves on the SPE Oil and Gas Reserves Committee.

The Global Reserves group maintains a central database containing the official company reserves estimates. Appropriate controls, including limitations on database access and update capa are in place to ensure data integrity within this central database. An annual review of the system's controls is performed by internal audit. Key components of the reserves estimation include technical evaluations and analysis of well and field performance and a rigorous peer review. No changes may be made to the reserves estimates in the central database, including ad of any new initial reserves estimates or subsequent revisions, unless these changes have been thoroughly reviewed and evaluated by duly authorized personnel within the operating organiza addition, changes to reserves estimates that exceed certain thresholds require further review and approval of the appropriate level of management within the operating organization bef changes may be made in the central database. Endorsement by the Global Reserves group for all proved reserves changes is a mandatory component of this review process. After all char made, reviews are held with senior management for final endorsement.

2. Proved Undeveloped Reserves

At year-end 2016, approximately 6.2 billion oil-equivalent barrels (GOEB) of ExxonMobil's proved reserves were classified as proved undeveloped. This represents 31 percent of the 20 reported in proved reserves. This compares to the 6.8 GOEB of proved undeveloped reserves reported at the end of 2015. During the year, ExxonMobil conducted development activities 100 fields that resulted in the transfer of approximately 1 GOEB from proved undeveloped to proved developed reserves by year-end. The largest transfers were related to the Gorgon LNG start-up and drilling activity at Upper Zakum, Tengiz and in the United States. During 2016, extensions, primarily in the United States, resulted in an addition of approximately 0.4 G proved undeveloped reserves.

Overall, investments of $10.1 billion were made by the Corporation during 2016 to progress the development of reported proved undeveloped reserves, including $9.3 billion for oil a producing activities and an additional $0.8 billion for other non-oil and gas producing activities such as the construction of support infrastructure and other related facilities. These inve represented 70 percent of the $14.5 billion in total reported Upstream capital and exploration expenditures. Investments made by the Corporation to develop quantities which no longer m SEC definition of proved reserves due to 2016 average prices are included in the $14.5 billion of Upstream capital expenditures reported above but are excluded from amounts rel progressing the development of proved undeveloped reserves.

One of ExxonMobil's requirements for reporting proved reserves is that management has made significant funding commitments toward the development of the reserves. ExxonMob disciplined investment strategy and many major fields require long lead-time in order to be developed. Development projects typically take several years from the time of recording undeveloped reserves to the start of production. However, the development time for large and complex projects can exceed five years. Proved undeveloped reserves in Australia, the United Kazakhstan, the Netherlands, Qatar, and Nigeria have remained undeveloped for five years or more primarily due to constraints on the capacity of infrastructure, the p co-venturer/government funding, as well as the time required to complete development for very large projects. The Corporation is reasonably certain that these proved reserves will be pro however, the timing and amount recovered can be affected by a number of factors including completion of development projects, reservoir performance, regulatory approvals, and sig changes in long-term oil and natural gas price levels. Of the proved undeveloped reserves that have been reported for five or more years, over 80 percent are contained in the aforeme countries. The largest of these is related to LNG/Gas projects in Australia, where construction of the Gorgon LNG project is in the final phases. In Kazakhstan, the proved undeveloped r are related to the remainder of the initial development of the offshore Kashagan field which is included in the North Caspian Production Sharing Agreement and the Tengizchevroil joint which includes a production license in the Tengiz – Korolev field complex. The Tengizchevroil joint venture is producing, and proved undeveloped reserves will continue to move to developed as approved development phases progress. In the Netherlands, the Groningen gas field has proved undeveloped reserves related to installation of future stages of compression reserves will move to proved developed when the additional stages of compression are installed to maintain field delivery pressure.

3. Oil and Gas Production, Production Prices and Production Costs

A. Oil and Gas Production

The table below summarizes production by final product sold and by geographic area for the last three years.

Average production prices have been calculated by using sales quantities from the Corporation’s own production as the divisor. Average production costs have been computed by us production quantities for the divisor. The volumes of crude oil and natural gas liquids (NGL) production used for this computation are shown in the oil and gas production table in section 3 volumes of natural gas used in the calculation are the production volumes of natural gas available for sale and are also shown in section 3.A. The natural gas available for sale volumes are d from those shown in the reserves table in the “Oil and Gas Reserves” part of the “Supplemental Information on Oil and Gas Exploration and Production Activities” portion of the Financial of this report due to volumes consumed or flared. Gas is converted to an oil-equivalent basis at six million cubic feet per one thousand barrels.

B. Exploratory and Development Activities Regarding Oil and Gas Resources Extracted by Mining Technologies

Syncrude Operations. Syncrude is a joint venture established to recover shallow deposits of oil sands using open-pit mining methods to extract the crude bitumen, and then upgrade it to p a high-quality, light (32 degrees API), sweet, synthetic crude oil. Imperial Oil Limited is the owner of a 25 percent interest in the joint venture. Exxon Mobil Corporation has a 69.6 percent in Imperial Oil Limited. In 2016, the company's share of net production of synthetic crude oil was about 67 thousand barrels per day and share of net acreage was about 63 thousand acre Athabasca oil sands deposit.

Kearl Operations. Kearl is a joint venture established to recover shallow deposits of oil sands using open-pit mining methods to extract the crude bitumen. Imperial Oil Limited holds percent interest in the joint venture and ExxonMobil Canada Properties holds the other 29.04 percent. Exxon Mobil Corporation has a 69.6 percent interest in Imperial Oil Limite 100 percent interest in ExxonMobil Canada Properties. Kearl is comprised of six oil sands leases covering about 49 thousand acres in the Athabasca oil sands deposit.

Kearl is located approximately 40 miles north of Fort McMurray, Alberta, Canada. Bitumen is extracted from oil sands produced from open-pit mining operations, and processed through b extraction and froth treatment trains. The product, a blend of bitumen and diluent, is shipped to our refineries and to other third parties. Diluent is natural gas condensate or oth hydrocarbons added to the crude bitumen to facilitate transportation by pipeline and rail. During 2016, average net production at Kearl was about 167 thousand barrels per day.

As a result of very low prices during 2016, under the SEC definition of proved reserves, the entire 3.5 billion barrels of bitumen at Kearl did not qualify as proved reserves at year-en Among the factors that would result in these amounts being recognized again as proved reserves at some point in the future are a recovery in average price levels, a further decline in costs, operating efficiencies.

B. Review of Principal Ongoing Activities

UNITED STATES

ExxonMobil's year-end 2016 acreage holdings totaled 12.9 million net acres, of which 1.0 million net acres were offshore. ExxonMobil was active in areas onshore and offshore in the lo states and in Alaska.

During the year, 442.3 net development wells were completed in the inland lower 48 states. Development activities focused on liquids-rich opportunities in the onshore U.S., primaril Permian Basin of West Texas and New Mexico and the Bakken oil play in North Dakota. In addition, gas development activities continued in the Marcellus Shale of Pennsylvania an Virginia, the Utica Shale of Ohio and the Haynesville Shale of East Texas and Louisiana.

ExxonMobil's net acreage in the Gulf of Mexico at year-end 2016 was 0.9 million acres. A total of 1.6 net exploration and development wells were completed during the year. The deepwat project and the non-operated Heidelberg project started up in 2016.

Participation in Alaska production and development continued with a total of 14.0 net development wells completed. The Point Thomson Initial Production System started up in 2016.

CANADA / SOUTH AMERICA

Canada

Oil and Gas Operations: ExxonMobil's year-end 2016 acreage holdings totaled 6.5 million net acres, of which 3.2 million net acres were offshore. A total of 11.5 net development wel completed during the year. Development activities continued on the Hebron project during 2016. ExxonMobil acquired deepwater acreage offshore Eastern Canada in 2016.

In Situ Bitumen Operations: ExxonMobil's year-end 2016 in situ bitumen acreage holdings totaled 0.7 million net onshore acres.

Argentina

ExxonMobil's net acreage totaled 0.3 million onshore acres at year-end 2016, and there were 3.4 net exploration and development wells completed during the year.

EUROPE

Germany

A total of 3.1 million net onshore acres were held by ExxonMobil at year-end 2016, with 0.6 net exploration and development wells completed in the year.

Netherlands

ExxonMobil's net interest in licenses totaled approximately 1.5 million acres at year-end 2016, of which 1.1 million acres were onshore. A total of 2.9 net exploration and development wel completed during the year.

Norway

ExxonMobil's net interest in licenses at year-end 2016 totaled approximately 0.2 million acres, all offshore. A total of 8.9 net exploration and development wells were completed in 2016.

United Kingdom

ExxonMobil's net interest in licenses at year-end 2016 totaled approximately 0.4 million acres, all offshore. A total of 1.8 net exploration and development wells were completed during the

AFRICA

Angola

ExxonMobil's net acreage totaled 0.4 million offshore acres at year-end 2016, with 4.8 net development wells completed during the year. On Block 32, development activities continued Kaombo Split Hub project.

Chad

ExxonMobil's net year-end 2016 acreage holdings consisted of 46 thousand onshore acres.

Equatorial Guinea

ExxonMobil's acreage totaled 0.3 million net offshore acres at year-end 2016.

Nigeria

ExxonMobil's net acreage totaled 1.1 million offshore acres at year-end 2016, with 3.1 net exploration and development wells completed during the year. Development drilling was compl the deepwater Erha North Phase 2 and Usan projects in 2016.

ASIA

Azerbaijan

At year-end 2016, ExxonMobil’s net acreage totaled 9 thousand offshore acres. A total of 1.4 net development wells were completed during the year.

Indonesia

At year-end 2016, ExxonMobil had 0.5 million net acres, 0.4 million net acres offshore and 0.1 million net acres onshore.

Iraq

At year-end 2016, ExxonMobil’s onshore acreage was 0.2 million net acres. A total of 3.1 net development wells were completed at the West Qurna Phase I oil field during the year. C rehabilitation activities continued during 2016 and across the life of this project will include drilling of new wells, working over of existing wells, and optimization and debottlenecking of facilities. In the Kurdistan Region of Iraq, ExxonMobil completed seismic operations on one block and continued exploration activities.

Kazakhstan

ExxonMobil’s net acreage totaled 0.1 million acres onshore and 0.2 million acres offshore at year-end 2016. A total of 5.3 net development wells were completed during 2016. Following production period in 2013, Kashagan operations were suspended due to a leak discovered in the onshore section of the gas pipeline. Working with our partners, both the oil and gas pipelin replaced and production commenced in October 2016. The Tengiz Expansion project was funded in 2016.

Malaysia

ExxonMobil has interests in production sharing contracts covering 0.2 million net acres offshore at year-end 2016.

Qatar

Through our joint ventures with Qatar Petroleum, ExxonMobil’s net acreage totaled 65 thousand acres offshore at year-end 2016. ExxonMobil participated in 62.2 million tonnes per yea liquefied natural gas capacity and 2.0 billion cubic feet per day of flowing gas capacity at year end. Construction and commissioning activities on the Barzan project progressed in 2016.

Republic of Yemen

ExxonMobil’s net acreage in the Republic of Yemen production sharing areas totaled 10 thousand acres onshore at year-end 2016.

Russia

ExxonMobil’s net acreage holdings in Sakhalin at year-end 2016 were 85 thousand acres, all offshore. A total of 1.8 net development wells were completed. Development activities conti the Odoptu Stage 2 project in 2016.

At year-end 2016, ExxonMobil’s net acreage in the Rosneft joint venture agreements for the Kara, Laptev, Chukchi and Black Seas was 63.6 million acres, all offshore. ExxonMobil and formed a joint venture to evaluate the development of tight-oil reserves in western Siberia in 2013. Refer to the relevant portion of “Note 7: Equity Company Information” of the Financial of this report for additional information on the Corporation’s participation in Rosneft joint venture activities.

Thailand

ExxonMobil’s net onshore acreage in Thailand concessions totaled 21 thousand acres at year-end 2016.

United Arab Emirates

ExxonMobil’s net acreage in the Abu Dhabi offshore Upper Zakum oil concession was 81 thousand acres at year-end 2016. During the year, a total of 4.5 net development wells were con Development activities continued on the Upper Zakum 750 project.

AUSTRALIA / OCEANIA

Australia

ExxonMobil’s year-end 2016 acreage holdings totaled 1.5 million net offshore acres. Construction and commissioning activities continued during 2016 on the Gas Conditioning Plant at Lo

The first two trains and the domestic gas plant of the co-venturer-operated Gorgon Jansz liquefied natural gas (LNG) project started up in 2016, and construction activities continued on t train. The project consists of a subsea infrastructure for offshore production and transportation of the gas, a 15.6 million tonnes per year LNG facility and a 280 million cubic feet per day d gas plant located on Barrow Island, Western Australia.

Papua New Guinea

A total of 5.0 million net acres were held by ExxonMobil at year-end 2016, of which 4.1 million net acres were offshore. The Papua New Guinea (PNG) LNG integrated development inclu production and processing facilities in the southern PNG Highlands, onshore and offshore pipelines, and a 6.9 million tonnes per year LNG facility near Port Moresby. ExxonMobil a deepwater acreage offshore Papua New Guinea during 2016.

WORLDWIDE EXPLORATION

At year-end 2016, exploration activities were under way in several areas in which ExxonMobil has no established production operations and thus are not included above. A total of 10.0 mil acres were held at year-end 2016 and 3.1 net exploration wells were completed during the year in these countries.

6. Delivery Commitments

ExxonMobil sells crude oil and natural gas from its producing operations under a variety of contractual obligations, some of which may specify the delivery of a fixed and determinable q for periods longer than one year. ExxonMobil also enters into natural gas sales contracts where the source of the natural gas used to fulfill the contract can be a combination of our own pro and the spot market. Worldwide, we are contractually committed to deliver approximately 94 million barrels of oil and 2,500 billion cubic feet of natural gas for the period from 2017 t 2019. We expect to fulfill the majority of these delivery commitments with production from our proved developed reserves. Any remaining commitments will be fulfilled with production fr proved undeveloped reserves and spot market purchases as necessary.

7. Oil and Gas Properties, Wells, Operations and Acreage

A. Gross and Net Productive Wells

	Year-End 2016				Year-End 2015		
	Oil		Gas		Oil		Gas

Equity Companies			
United States	223	81	259
Europe	100	25	-
Asia	191,147	63,633	191,147
Total Equity Companies	191,470	63,739	191,406
Total gross and net undeveloped acreage	250,582	92,654	253,263

(1) Includes undeveloped acreage in South America of 13,106 gross and 5,146 net thousands of acres for 2016 and 10,634 gross and 4,970 net thousands of acres for 2015.

ExxonMobil's investment in developed and undeveloped acreage is comprised of numerous concessions, blocks and leases. The terms and conditions under which the Corporation ma exploration and/or production rights to the acreage are property-specific, contractually defined and vary significantly from property to property. Work programs are designed to ensure exploration potential of any property is fully evaluated before expiration. In some instances, the Corporation may elect to relinquish acreage in advance of the contractual expiration dat evaluation process is complete and there is not a business basis for extension. In cases where additional time may be required to fully evaluate acreage, the Corporation has general successful in obtaining extensions. The scheduled expiration of leases and concessions for undeveloped acreage over the next three years is not expected to have a material adverse impac Corporation.

D. Summary of Acreage Terms

UNITED STATES

Oil and gas exploration and production rights are acquired from mineral interest owners through a lease. Mineral interest owners include the Federal and State governments, as well as mineral interest owners. Leases typically have an exploration period ranging from one to ten years, and a production period that normally remains in effect until production ceases. Under circumstances, a lease may be held beyond its exploration term even if production has not commenced. In some instances regarding private property, a "fee interest" is acquired wh underlying mineral interests are owned outright.

CANADA / SOUTH AMERICA

Canada

Exploration licenses or leases in onshore areas are acquired for varying periods of time with renewals or extensions possible. These licenses or leases entitle the holder to continue existing l or leases upon completing specified work. In general, these license and lease agreements are held as long as there is proven production capability on the licenses and leases. Exploration lice offshore eastern Canada and the Beaufort Sea are held by work commitments of various amounts and rentals. They are valid for a maximum term of nine years. Production licenses in the o are valid for 25 years, with rights of extension for continued production. Significant discovery licenses in the offshore, relating to currently undeveloped discoveries, do not have a definite t

Argentina

The Federal Hydrocarbon Law was amended in December 2014. The onshore concession terms granted prior to the amendment are up to six years, divided into three potential exploration p with an optional extension for up to one year depending on the classification of the area. Pursuant to the amended law, the production term for a conventional production concession w 25 years, and 35 years for an unconventional concession, with unlimited ten-year extensions possible, once a field has been developed.

EUROPE

Germany

Exploration concessions are granted for an initial maximum period of five years, with an unlimited number of extensions of up to three years each. Extensions are subject to specific, mi work commitments. Production licenses are normally granted for 20 to 25 years with multiple possible extensions as long as there is production on the license.

Netherlands

Under the Mining Law, effective January 1, 2003, exploration and production licenses for both onshore and offshore areas are issued for a period as explicitly defined in the license. The based on the period of time necessary to perform the activities for which the license is issued. License conditions are stipulated in the license and are based on the Mining Law.

Production rights granted prior to January 1, 2003, remain subject to their existing terms, and differ slightly for onshore and offshore areas. Onshore production licenses issued prior to 198 indefinite; from 1988 they were issued for a period as explicitly defined in the license, ranging from 35 to 45 years. Offshore production licenses issued before 1976 were issued for a fixed of 40 years; from 1976 they were again issued for a period as explicitly defined in the license, ranging from 15 to 40 years.

Norway

Licenses issued prior to 1972 were for an initial period of six years and an extension period of 40 years, with relinquishment of at least one-fourth of the original area required at the end sixth year and another one-fourth at the end of the ninth year. Licenses issued between 1972 and 1997 were for an initial period of up to six years (with extension of the initial period of one a time up to ten years after 1985), and an extension period of up to 30 years, with relinquishment of at least one-half of the original area required at the end of the initial period. Licenses after July 1, 1997, have an initial period of up to ten years and a normal extension period of up to 30 years or in special cases of up to 50 years, and with relinquishment of at least one-hal original area required at the end of the initial period.

United Kingdom

Acreage terms are fixed by the government and are periodically changed. For example, many of the early licenses issued under the first four licensing rounds provided for an initial term years with relinquishment of at least one-half of the original area at the end of the initial term, subject to extension for a further 40 years. At the end of any such 40-year term, licens continue in producing areas until cessation of production; or licenses may continue in development areas for periods agreed on a case-by-case basis until they become producing areas; or l terminate in all other areas. The licensing regime was last updated in 2002, and the majority of licenses issued have an initial term of four years with a second term extension of four year final term of 18 years with a mandatory relinquishment of 50 percent of the acreage after the initial term and of all acreage that is not covered by a development plan at the end of the second

AFRICA

Angola

Exploration and production activities are governed by production sharing agreements with an initial exploration term of four years and an optional second phase of two to three yea production period is for 25 years, and agreements generally provide for a negotiated extension.

Chad

Exploration permits are issued for a period of five years, and are renewable for one or two further five-year periods. The terms and conditions of the permits, including relinquishment obli are specified in a negotiated convention. The production term is for 30 years and may be extended up to 50 years at the discretion of the government.

Equatorial Guinea

Exploration, development and production activities are governed by production sharing contracts (PSCs) negotiated with the State Ministry of Mines and Hydrocarbons. A new PSC was si 2015; the initial exploration period is five years for oil and gas, with multi-year extensions available at the discretion of the Ministry and limited relinquishments in the absence of com discoveries. The production period for crude oil ranges from 25 to 30 years, while the production period for natural gas ranges from 25 to 50 years.

Nigeria

Exploration and production activities in the deepwater offshore areas are typically governed by production sharing contracts (PSCs) with the national oil company, the Nigerian National Pe Corporation (NNPC). NNPC typically holds the underlying Oil Prospecting License (OPL) and any resulting Oil Mining Lease (OML). The terms of the PSCs are generally 30 years, incl ten-year exploration period (an initial exploration phase that can be divided into multiple optional periods) covered by an OPL. Upon commercial discovery, an OPL may be converted to a Partial relinquishment is required under the PSC at the end of the ten-year exploration period, and OMLs have a 20-year production period that may be extended.

Some exploration activities are carried out in deepwater by joint ventures with local companies holding interests in an OPL. OPLs in deepwater offshore areas are valid for ten years, whi other areas the licenses are for five years. Demonstrating a commercial discovery is the basis for conversion of an OPL to an OML.

OMLs granted prior to the 1969 Petroleum Act (i.e., under the Mineral Oils Act 1914, repealed by the 1969 Petroleum Act) were for 30 years onshore and 40 years in offshore areas and ha renewed, effective December 1, 2008, for a further period of 20 years, with a further renewal option of 20 years. Operations under these pre-1969 OMLs are conducted under a joint agreement with NNPC rather than a PSC. Commercial terms applicable to the existing joint venture oil production are defined by the Petroleum Profits Tax Act.

OMLs granted under the 1969 Petroleum Act, which include all deepwater OMLs, have a maximum term of 20 years without distinction for onshore or offshore location and are renewabl 12 months' written notice, for another period of 20 years. OMLs not held by NNPC are also subject to a mandatory 50-percent relinquishment after the first ten years of their duration.

ASIA

Azerbaijan

The production sharing agreement (PSA) for the development of the Azeri-Chirag-Gunashli field is established for an initial period of 30 years starting from the PSA execution date in 1994

Other exploration and production activities are governed by PSAs negotiated with the national oil company of Azerbaijan. The exploration period consists of three or four years with the pos of a one to three-year extension. The production period, which includes development, is for 25 years or 35 years with the possibility of one or two five-year extensions.

Indonesia

Exploration and production activities in Indonesia are generally governed by cooperation contracts, usually in the form of a production sharing contract (PSC), negotiated with BPMI government agency established in 2002 to manage upstream oil and gas activities. In 2012, Indonesia's Constitutional Court ruled certain articles of law relating to BPMIGAS unconstitutional, but stated that all existing PSCs signed with BPMIGAS should remain in force until their expiry, and the functions and duties previously performed by BPMIGAS ar carried out by the relevant Ministry of the Government of Indonesia until the promulgation of a new oil and gas law. By presidential decree, SKKMIGAS became the interim succ BPMIGAS. The current PSCs have an exploration period of six years, which can be extended up to 10 years, and an exploitation period of 20 years. PSCs generally require the contr relinquish 10 percent to 20 percent of the contract area after three years and generally allow the contractor to retain no more than 50 percent to 80 percent of the original contract area a years, depending on the acreage and terms.

Iraq

Development and production activities in the state-owned oil and gas fields are governed by contracts with regional oil companies of the Iraqi Ministry of Oil. An ExxonMobil affiliate ente a contract with South Oil Company of the Iraqi Ministry of Oil for the rights to participate in the development and production activities of the West Qurna Phase I oil and gas field effective 1, 2010. The term of the contract is 20 years with the right to extend for five years. The contract provides for cost recovery plus per-barrel fees for incremental production above specified le

Exploration and production activities in the Kurdistan Region of Iraq are governed by production sharing contracts (PSCs) negotiated with the regional government of Kurdistan in 20 exploration term is for five years, with extensions available as provided by the PSCs and at the discretion of the regional government of Kurdistan. Current PSCs remain in effect by agree the regional government to allow additional time for exploration or evaluation of commerciality. The production period is 20 years with the right to extend for five years.

Kazakhstan

Onshore exploration and production activities are governed by the production license, exploration license and joint venture agreements negotiated with the Republic of Kazakhstan. P production operations have a 40-year production period that commenced in 1993.

Offshore exploration and production activities are governed by a production sharing agreement negotiated with the Republic of Kazakhstan. The exploration period is six years follo separate appraisal periods for each discovery. The production period for each discovery, which includes development, is for 20 years from the date of declaration of commerciality w possibility of two ten-year extensions.

Malaysia

Production activities are governed by production sharing contracts (PSCs) negotiated with the national oil company. The PSCs have terms ranging up to 29 years. All extensions are subjec national oil company's prior written approval. The total production period is 15 to 29 years, depending on the provisions of the respective contract.

Qatar

The State of Qatar grants gas production development project rights to develop and supply gas from the offshore North Field to permit the economic development and production of gas r sufficient to satisfy the gas and LNG sales obligations of these projects.

Republic of Yemen

The Jannah production sharing agreement has a development period extending 20 years from first commercial declaration, which was made in June 1995. Due to force majeure eve development period has been extended beyond its original expiration date by an additional 735 days, with the possibility of further extensions due to ongoing force majeure events.

Russia

Terms for ExxonMobil's Sakhalin acreage are fixed by the production sharing agreement (PSA) that became effective in 1996 between the Russian government and the Sakhalin-1 consort which ExxonMobil is the operator. The term of the PSA is 20 years from the Declaration of Commerciality, which would be 2021. The term may be extended thereafter in ten-year incren specified in the PSA.

Exploration and production activities in the Kara, Laptev, Chukchi and Black Seas are governed by joint venture agreements concluded with Rosneft in 2013 and 2014 that cover ce Rosneft's offshore licenses. The Kara Sea licenses covered by the joint venture agreements concluded in 2013 extend through 2040 and include an exploration period through 2020. Ad licenses in the Kara, Laptev and Chukchi Seas covered by the joint venture agreements concluded in 2014 extend through 2043 and include an exploration period through 2023. The Kara, and Chukchi Sea licenses require development plan submission within eight years of a discovery and development activities within five years of plan approval. The Black Sea exploration extends through 2017 and a discovery is the basis for obtaining a license for production. Refer to the relevant portion of "Note 7: Equity Company Information" of the Financial Section report for additional information on the Corporation's participation in Rosneft joint venture activities.

Thailand

The Petroleum Act of 1971 allows production under ExxonMobil's concession for 30 years with a ten-year extension at terms generally prevalent at the time.

United Arab Emirates

An interest in the development and production activities of the Upper Zakum field, a major offshore field, was acquired effective as of January 2006, for a term expiring March 2026, and the governing agreements were extended to 2041.

AUSTRALIA / OCEANIA

Australia

Exploration and production activities conducted offshore in Commonwealth waters are governed by Federal legislation. Exploration permits are granted for an initial term of six years w possible five-year renewal periods. Retention leases may be granted for resources that are not commercially viable at the time of application, but are expected to become commercially within 15 years. These are granted for periods of five years and renewals may be requested. Prior to July 1998, production licenses were granted initially for 21 years, with a further renew years and thereafter "indefinitely", i.e., for the life of the field. Effective from July 1998, new production licenses are granted "indefinitely". In each case, a production license may be termi no production operations have been carried on for five years.

Papua New Guinea

Exploration and production activities are governed by the Oil and Gas Act. Petroleum Prospecting licenses are granted for an initial term of six years with a five-year extension possi additional extension of three years is possible in certain circumstances). Generally, a 50-percent relinquishment of the license area is required at the end of the initial six-year term, if ex Petroleum Development licenses are granted for an initial 25-year period. An extension of up to 20 years may be granted at the Minister's discretion. Petroleum Retention licenses may be for gas resources that are not commercially viable at the time of application, but may become commercially viable within the maximum possible retention time of 15 years. Petroleum Re licenses are granted for five-year terms, and may be extended, at the Minister's discretion, twice for the maximum retention time of 15 years. Extensions of Petroleum Retention licenses for periods of less than one year, renewable annually, if the Minister considers at the time of extension that the resources could become commercially viable in less than five years.

Information with regard to the Downstream segment follows:

ExxonMobil's Downstream segment manufactures and sells petroleum products. The refining and supply operations encompass a global network of manufacturing plants, transportation s and distribution centers that provide a range of fuels, lubricants and other products and feedstocks to our customers around the world.

(1) Capacity for ethylene, polyethylene, polypropylene and paraxylene in millions of metric tons per year.

(2) Capacity reflects 100 percent for operations of ExxonMobil and majority-owned subsidiaries. For companies owned 50 percent or less, capacity is ExxonMobil's interest.

ITEM 3. LEGAL PROCEEDINGS

On December 8, 2016, the Texas Commission on Environmental Quality (TCEQ) contacted the Corporation concerning alleged violations of the Texas Clean Air Act, certain impler regulations, and the applicable new source review permit in connection with exceedances of the nitrogen oxide emission limit at a compressor engine and volatile organic compound e limits at Tanks 21 and 23 at the Corporation's former King Ranch Gas Plant. The TCEQ is seeking a civil penalty in excess of $100,000, and the Corporation is working with the TCEQ to the matter.

As reported in the Corporation's Form 10-Q for the second and third quarters of 2014, on May 20, 2014, the TCEQ issued a Notice of Enforcement and Proposed Agreed Order (the Agreed alleging that record reviews and inspections at ExxonMobil Oil Corporation's (EMOC) Beaumont, Texas, refinery in 2013 and 2014, identified deficiencies in the refinery's coolin monitoring activities and one air emission event, which allegedly violated provisions of the Texas Health and Safety Code, the Texas Water Code, and the Code of Federal Regu Additionally, the TCEQ identified deficiencies in a refinery continuous emissions monitoring system relative accuracy test audit procedure. On November 8, 2016, the TCEQ formally ap and signed the Agreed Order. EMOC previously paid the agreed $100,430 fine to the TCEQ, and on November 28, 2016, EMOC made a $100,429 payment for the benefit of the Southeas Regional Planning Commission for the Meteorological and Air Monitoring Network Project, thereby satisfying all remaining financial obligations under the Agreed Order and conclud matter.

Refer to the relevant portions of "Note 16: Litigation and Other Contingencies" of the Financial Section of this report for additional information on legal proceedings.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Executive Officers of the Registrant [pursuant to Instruction 3 to Regulation S-K, Item 401(b)]

Darren W. Woods — *Chairman of the Board*

Held current title since: January 1, 2017 — Age: 52

Mr. Darren W. Woods was Vice President, Supply & Transportation, ExxonMobil Refining & Supply Company July 1, 2010 – July 31, 2012. He was President of ExxonMobil Refin Supply Company August 1, 2012 – July 31, 2014 and Vice President of Exxon Mobil Corporation August 1, 2012 – May 31, 2014. He was Senior Vice President of Exxon Mobil Corpo June 1, 2014 – December 31, 2015. He became a Director and President of Exxon Mobil Corporation on January 1, 2016, and Chairman of the Board and Chief Executive Offi January 1, 2017, positions he still holds as of this filing date.

Mark W. Albers — *Senior Vice President*

Held current title since: April 1, 2007 — Age: 60

Mr. Mark W. Albers became Senior Vice President of Exxon Mobil Corporation on April 1, 2007, a position he still holds as of this filing date.

Michael J. Dolan — *Senior Vice President*

Held current title since: April 1, 2008 — Age: 63

Mr. Michael J. Dolan became Senior Vice President of Exxon Mobil Corporation on April 1, 2008, a position he still holds as of this filing date.

Andrew P. Swiger — *Senior Vice President*

Held current title since: April 1, 2009 — Age: 60

Mr. Andrew P. Swiger became Senior Vice President of Exxon Mobil Corporation on April 1, 2009, a position he still holds as of this filing date.

Jack P. Williams, Jr. — *Senior Vice President*

Held current title since: June 1, 2014 — Age: 53

Mr. Jack P. Williams, Jr. was President of XTO Energy Inc. June 25, 2010 – May 31, 2013. He was Executive Vice President of ExxonMobil Production Company June 1, 2 June 30, 2014. He became Senior Vice President of Exxon Mobil Corporation on June 1, 2014, a position he still holds as of this filing date.

Neil A. Chapman — *Vice President*

Held current title since: January 1, 2015 — Age: 54

Mr. Neil A. Chapman was Senior Vice President, ExxonMobil Chemical Company April 1, 2011 – December 31, 2014. He became President of ExxonMobil Chemical Company an President of Exxon Mobil Corporation on January 1, 2015, positions he still holds as of this filing date.

William M. Colton — *Vice President – Corporate Strategic Planning*

Held current title since: February 1, 2009 — Age: 63

Mr. William M. Colton became Vice President – Corporate Strategic Planning of Exxon Mobil Corporation on February 1, 2009, a position he still holds as of this filing date.

Bradley W. Corson *Vice President*

Held current title since: March 1, 2015 Age: 55

Mr. Bradley W. Corson was Regional Vice President, Europe/Caspian for ExxonMobil Production Company May 1, 2009 – April 30, 2014. He was Vice President, ExxonMobil Ups
Ventures May 1, 2014 – February 28, 2015. He became President of ExxonMobil Upstream Ventures and Vice President of Exxon Mobil Corporation on March 1, 2015, positions h
holds as of this filing date.

Neil W. Duffin *Vice President*

Held current title since: January 1, 2017 Age: 60

Mr. Neil W. Duffin was President of ExxonMobil Development Company April 13, 2007 – December 31, 2016. He became President of ExxonMobil Production Company and Vice Pre
of Exxon Mobil Corporation on January 1, 2017, positions he still holds as of this filing date.

Randall M. Ebner *Vice President and General Counsel*

Held current title since: November 1, 2016 Age: 61

Mr. Randall M. Ebner was Assistant General Counsel of Exxon Mobil Corporation January 1, 2009 – October 31, 2016. He became Vice President and General Counsel of Exxon
Corporation on November 1, 2016, positions he still holds as of this filing date.

Robert S. Franklin *Vice President*

Held current title since: May 1, 2009 Age: 59

Mr. Robert S. Franklin was President of ExxonMobil Upstream Ventures and Vice President of Exxon Mobil Corporation May 1, 2009 – February 28, 2013. He became Presid
ExxonMobil Gas & Power Marketing Company and Vice President of Exxon Mobil Corporation on March 1, 2013, positions he still holds as of this filing date.

Stephen M. Greenlee *Vice President*

Held current title since: September 1, 2010 Age: 59

Mr. Stephen M. Greenlee became President of ExxonMobil Exploration Company and Vice President of Exxon Mobil Corporation on September 1, 2010, positions he still holds as o
filing date.

Liam M. Mallon *President, ExxonMobil Development Company*

Held current title since: January 1, 2017 Age: 54

Mr. Liam M. Mallon was Vice President, Engineering, ExxonMobil Production Company May 1, 2009 – May 31, 2012. He was Vice President, Africa, ExxonMobil Production Cor
June 1, 2012 – January 31, 2014. He was Executive Vice President, ExxonMobil Development Company February 1, 2014 – December 31, 2016. He became President of Exxon
Development Company on January 1, 2017, a position he still holds as of this filing date.

Bryan W. Milton *Vice President*

Held current title since: August 1, 2016 Age: 52

Mr. Bryan W. Milton was President of ExxonMobil Global Services Company April 1, 2011 – July 31, 2016. He became President of ExxonMobil Fuels, Lubricants & Specialties Mar
Company and Vice President of Exxon Mobil Corporation on August 1, 2016, positions he still holds as of this filing date.

Sara N. Ortwein *President, XTO Energy Inc., a subsidiary of the Corporation*

Held current title since: November 1, 2016 Age: 58

Ms. Sara N. Ortwein was President of ExxonMobil Upstream Research Company September 1, 2010 – October 31, 2016. She became President of XTO Energy Inc. on November 1, 2
position she still holds as of this filing date.

David S. Rosenthal	*Vice President and Controller*	
Held current title since:	October 1, 2008 (Vice President) September 1, 2014 (Controller)	Age: 60

Mr. David S. Rosenthal was Vice President – Investor Relations and Secretary of Exxon Mobil Corporation October 1, 2008 – August 31, 2014. He became Vice President and Contro Exxon Mobil Corporation on September 1, 2014, positions he still holds as of this filing date.

Robert N. Schleckser	*Vice President and Treasurer*	
Held current title since:	May 1, 2011	Age: 60

Mr. Robert N. Schleckser became Vice President and Treasurer of Exxon Mobil Corporation on May 1, 2011, positions he still holds as of this filing date.

James M. Spellings, Jr.	*Vice President and General Tax Counsel*	
Held current title since:	March 1, 2010	Age: 55

Mr. James M. Spellings, Jr. became Vice President and General Tax Counsel of Exxon Mobil Corporation on March 1, 2010, positions he still holds as of this filing date.

Dennis G. Wascom	*Vice President*	
Held current title since:	August 1, 2014	Age: 60

Mr. Dennis G. Wascom was Director, Refining Americas, ExxonMobil Refining & Supply Company April 1, 2009 – June 30, 2013. He was Director, Refining North America, Exxon Refining & Supply Company July 1, 2013 – July 31, 2014. He became President of ExxonMobil Refining & Supply Company and Vice President of Exxon Mobil Corporati August 1, 2014, positions he still holds as of this filing date.

Jeffrey J. Woodbury	*Vice President – Investor Relations and Secretary*	
Held current title since:	July 1, 2011 (Vice President) September 1, 2014 (Secretary)	Age: 56

Mr. Jeffrey J. Woodbury was Vice President, Safety, Security, Health and Environment of Exxon Mobil Corporation July 1, 2011 – August 31, 2014. He became Vice President – In Relations and Secretary of Exxon Mobil Corporation on September 1, 2014, positions he still holds as of this filing date.

Officers are generally elected by the Board of Directors at its meeting on the day of each annual election of directors, with each such officer serving until a successor has been elec qualified.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Reference is made to the "Quarterly Information" portion of the Financial Section of this report.

Recent Sales of Unregistered Securities

As previously reported in the Corporation's Quarterly Report on Form 10-Q for the quarter ended September 30, 2016, on July 21, 2016, the Corporation entered into an Arrangement Agr as amended and restated on December 15, 2016, to acquire all of the issued and outstanding common stock of InterOil Corporation (IOC) in exchange for consideration including arc million shares of Exxon Mobil Corporation common stock. With respect to the shares of common stock to be issued in connection with the transaction, the Corporation is relying on the exe from registration provided by Section 3(a)(10) of the Securities Act of 1933.

As previously reported in the Corporation's Current Report on Form 8-K filed January 17, 2017, on January 16, 2017, an affiliate of the Corporation entered into a Purchase and Sale Agr (PSA) to acquire companies owned by the Bass family of Fort Worth, Texas, that indirectly own certain oil and gas properties in the Permian Basin and certain additional properties and assets in exchange for issuance to the sellers of shares of Exxon Mobil Corporation common stock having an aggregate value at the time of closing of $5.6 billion. The number of share Corporation's common stock for this purpose will be determined based on the Corporation's volume-weighted average trading price over a 10-day period ending on the third tradi immediately preceding the closing date. The transaction is currently expected to close on or about February 28, 2017. As of January 16, 2017, the number of shares issuable in connection v transaction would have been approximately 63 million. The sale of shares under the PSA has been structured as a private placement solely to accredited investors and therefore the Corpor relying on the exemption from registration provided by Section 4(a)(2) of the Securities Act of 1933.

See "Note 20: Subsequent Events" of the Financial Section of this report for additional information regarding these transactions.

Issuer Purchases of Equity Securities for Quarter Ended December 31, 2016

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Numbe of Shares that Ma Yet Be Purchased Under the Plans o Programs
October 2016	-		-	
November 2016	-		-	
December 2016	-		-	
Total	-		-	(See Note 1)

During the fourth quarter, the Corporation did not purchase any shares of its common stock for the treasury.

Note 1 - On August 1, 2000, the Corporation announced its intention to resume purchases of shares of its common stock for the treasury both to offset shares issued in conjunction with co benefit plans and programs and to gradually reduce the number of shares outstanding. The announcement did not specify an amount or expiration date. The Corporation has continued to p shares since this announcement and to report purchased volumes in its quarterly earnings releases. In its earnings release dated February 2, 2016, the Corporation stated it will continue to shares to offset dilution in conjunction with benefit plans and programs, but had suspended making purchases to reduce shares outstanding effective beginning the first quarter of 2016.

FREQUENTLY USED TERMS

Listed below are definitions of several of ExxonMobil's key business and financial performance measures. These definitions are provided to facilitate understanding of the terms ar
calculation.

Cash Flow From Operations and Asset Sales

Cash flow from operations and asset sales is the sum of the net cash provided by operating activities and proceeds associated with sales of subsidiaries, property, plant and equipment, ar and returns of investments from the Consolidated Statement of Cash Flows. This cash flow reflects the total sources of cash from both operating the Corporation's assets and from the dive assets. The Corporation employs a long-standing and regular disciplined review process to ensure that all assets are contributing to the Corporation's strategic objectives. Assets are diveste they are no longer meeting these objectives or are worth considerably more to others. Because of the regular nature of this activity, we believe it is useful for investors to consider p associated with asset sales together with cash provided by operating activities when evaluating cash available for investment in the business and financing activities, including shar distributions.

Cash flow from operations and asset sales	**2016**	**2015**	**20**
		(millions of dollars)	
Net cash provided by operating activities	22,082	30,344	
Proceeds associated with sales of subsidiaries, property, plant and equipment,			
and sales and returns of investments	4,275	2,389	
Cash flow from operations and asset sales	26,357	32,733	

Capital Employed

Capital employed is a measure of net investment. When viewed from the perspective of how the capital is used by the businesses, it includes ExxonMobil's net share of property, pl equipment and other assets less liabilities, excluding both short-term and long-term debt. When viewed from the perspective of the sources of capital employed in total for the Corpora includes ExxonMobil's share of total debt and equity. Both of these views include ExxonMobil's share of amounts applicable to equity companies, which the Corporation believes sh included to provide a more comprehensive measure of capital employed.

Capital employed	**2016**	**2015**	**20**
		(millions of dollars)	
Business uses: asset and liability perspective			
Total assets	330,314	336,758	3

Add ExxonMobil share of equity company debt	4,233	4,447	
Total capital employed	212,794	211,658	2

FREQUENTLY USED TERMS

Return on Average Capital Employed

Return on average capital employed (ROCE) is a performance measure ratio. From the perspective of the business segments, ROCE is annual business segment earnings divided by a business segment capital employed (average of beginning and end-of-year amounts). These segment earnings include ExxonMobil's share of segment earnings of equity companies, co with our capital employed definition, and exclude the cost of financing. The Corporation's total ROCE is net income attributable to ExxonMobil excluding the after-tax cost of financing, by total corporate average capital employed. The Corporation has consistently applied its ROCE definition for many years and views it as the best measure of historical capital productivity capital-intensive, long-term industry, both to evaluate management's performance and to demonstrate to shareholders that capital has been used wisely over the long term. Additional me which are more cash flow based, are used to make investment decisions.

Return on average capital employed	**2016**	**2015**	**20**
		(millions of dollars)	
Net income attributable to ExxonMobil	7,840	16,150	
Financing costs (after tax)

OVERVIEW

The following discussion and analysis of ExxonMobil's financial results, as well as the accompanying financial statements and related notes to consolidated financial statements to whi refer, are the responsibility of the management of Exxon Mobil Corporation. The Corporation's accounting and financial reporting fairly reflect its straightforward business model involv extracting, manufacturing and marketing of hydrocarbons and hydrocarbon-based products. The Corporation's business model involves the production (or purchase), manufacture and physical products, and all commercial activities are directly in support of the underlying physical movement of goods.

ExxonMobil, with its resource base, financial strength, disciplined investment approach and technology portfolio, is well-positioned to participate in substantial investments to develop new supplies. The company's integrated business model, with significant investments in Upstream, Downstream and Chemical segments, reduces the Corporation's risk from changes in com prices. While commodity prices are volatile on a short-term basis and depend on supply and demand, ExxonMobil's investment decisions are based on our long-term business outlook, disciplined approach in selecting and pursuing the most attractive investment opportunities. The corporate plan is a fundamental annual management process that is the basis for setting ne operating and capital objectives in addition to providing the longer-term economic assumptions used for investment evaluation purposes. Volumes are based on individual field production p which are also updated annually. Price ranges for crude oil, natural gas, refined products, and chemical products are based on corporate plan assumptions developed annually by major reg are utilized for investment evaluation purposes. Major investment opportunities are evaluated over a range of economic scenarios. Once major investments are made, a reappraisal pro completed to ensure relevant lessons are learned and improvements are incorporated into future projects.

BUSINESS ENVIRONMENT AND RISK ASSESSMENT

Long-Term Business Outlook

By 2040, the world's population is projected to grow to approximately 9 billion people, or about 1.8 billion more than in 2015. Coincident with this population increase, the Corporation worldwide economic growth to average close to 3 percent per year. As economies and populations grow, and as living standards improve for billions of people, the need for energy will con rise. Even with significant efficiency gains, global energy demand is projected to rise by about 25 percent from 2015 to 2040. This demand increase is expected to be concentrated in dev countries (i.e., those that are not member nations of the Organisation for Economic Co-operation and Development).

As expanding prosperity drives global energy demand higher, increasing use of energy-efficient technologies and practices as well as lower-emission fuels will continue to help significantly energy consumption and emissions per unit of economic output over time. Substantial efficiency gains are likely in all key aspects of the world's economy through 2040, affecting requirements for transportation, power generation, industrial applications, and residential and commercial needs.

Energy for transportation – including cars, trucks, ships, trains and airplanes – is expected to increase by about 25 percent from 2015 to 2040. The growth in transportation energy demand i to account for approximately 60 percent of the growth in liquid fuels demand worldwide over this period. Nearly all the world's transportation fleets will continue to run on liquid fuels, wh abundant, widely available, easy to transport, and provide a large quantity of energy in small volumes.

Demand for electricity around the world is likely to increase approximately 60 percent from 2015 to 2040, led by a doubling of demand in developing countries. Consistent with this pro power generation is expected to remain the largest and fastest-growing major segment of global energy demand. Meeting the expected growth in power demand will require a diverse set of sources. The share of coal-fired generation is likely to decline to less than 30 percent of the world's electricity in 2040, versus about 40 percent in 2015, in part as a result of policies to imp quality as well as reduce greenhouse gas emissions to address the risks of climate change. From 2015 to 2040, the amount of electricity generated using natural gas, nuclear power, and rene is likely to approximately double, and account for 90 percent of the growth in electricity supplies. By 2040, coal, natural gas and renewables are projected to each be generating in the range 30 percent of electricity worldwide, although significant differences will exist across regions reflecting a wide range of factors including the cost and availability of energy types.

Liquid fuels provide the largest share of global energy supplies today reflecting broad-based availability, affordability, ease of distribution, and fitness as a practical solution to meet a wide of needs. By 2040, global demand for liquid fuels is projected to grow to approximately 112 million barrels of oil-equivalent per day, an increase of about 20 percent from 2015. Much demand today is met by crude production from traditional conventional sources; these supplies will remain important as significant development activity is expected to offset much of the declines from these fields. At the same time, a variety of emerging supply sources – including tight oil, deepwater, oil sands, natural gas liquids and biofuels – are expected to grow signific meet rising demand. The world's resource base is sufficient to meet projected demand through

2040 as technology advances continue to expand the availability of economic supply options. However, access to resources and timely investments will remain critical to meeting globa with reliable, affordable supplies.

Natural gas is a versatile fuel, suitable for a wide variety of applications, and it is expected to be the fastest-growing major fuel source from 2015 to 2040, meeting about 40 percent of energy demand growth. Global natural gas demand is expected to rise about 45 percent from 2015 to 2040, with about 45 percent of that increase in the Asia Pacific region. Helping me needs will be significant growth in supplies of unconventional gas - the natural gas found in shale and other rock formations that was once considered uneconomic to produce. In total 60 percent of the growth in natural gas supplies is expected to be from unconventional sources. At the same time, conventionally-produced natural gas is likely to remain the cornerstone of meeting about two-thirds of global demand in 2040. Worldwide liquefied natural gas (LNG) trade will expand significantly, likely reaching more than 2.5 times the level of 2015 by 204 much of this supply expected to meet rising demand in Asia Pacific.

The world's energy mix is highly diverse and will remain so through 2040. Oil is expected to remain the largest source of energy with its share remaining close to one-third in 2040. currently the second largest source of energy, but it is likely to lose that position to natural gas in the 2025-2030 timeframe. The share of natural gas is expected to reach 25 percent by 2040 the share of coal falls to about 20 percent. Nuclear power is projected to grow significantly, as many nations are likely to expand nuclear capacity to address rising electricity needs as energy security and environmental issues. Total renewable energy is likely to reach about 15 percent of total energy by 2040, with biomass, hydro and geothermal contributing a combined s more than 10 percent. Total energy supplied from wind, solar and biofuels is expected to increase rapidly, growing over 200 percent from 2015 to 2040, when they will be about 4 percent o energy.

The Corporation anticipates that the world's available oil and gas resource base will grow not only from new discoveries, but also from reserve increases in previously discovered Technology will underpin these increases. The cost to develop and supply these resources will be significant. According to the International Energy Agency, the investment required to meet natural gas supply requirements worldwide over the period 2016-2040 will be about $23 trillion (measured in 2015 dollars) or approximately $900 billion per year on average.

International accords and underlying regional and national regulations covering greenhouse gas emissions continue to evolve with uncertain timing and outcome, making it difficult to predi business impact. For many years, the Corporation has taken into account policies established to reduce energy-related greenhouse gas emissions in its long-term *Outlook for Energy*, which as a foundation for assessing the business environment and business strategies and investments. The climate accord reached at the recent Conference of the Parties (COP 21) in Paris set ma goals, and many related policies are still emerging. Our *Outlook* reflects increasingly stringent climate policies and is consistent with the aggregation of Nationally Determined Contri which were submitted by signatories to the United Nations Framework Convention on Climate Change (UNFCC) 2015 Paris Agreement. Our *Outlook* seeks to identify potential imp climate related policies, which often target specific sectors, by using various assumptions and tools including application of a proxy cost of carbon to estimate potential impacts on co demands. For purposes of the *Outlook*, a proxy cost on energy-related CO_2 emissions is assumed to reach about $80 per tonne on average in 2040 in OECD nations. China and other leadi OECD nations are expected to trail OECD policy initiatives. Nevertheless, as people and nations look for ways to reduce risks of global climate change, they will continue to need p solutions that do not jeopardize the affordability or reliability of the energy they need. Thus, all practical and economically viable energy sources, both conventional and unconventional, w to be pursued to continue meeting global energy demand, recognizing the scale and variety of worldwide energy needs as well as the importance of expanding access to modern energy to p better standards of living for billions of people.

The information provided in the Long-Term Business Outlook includes ExxonMobil's internal estimates and forecasts based upon internal data and analyses as well as publicly av information from external sources including the International Energy Agency.

Upstream

ExxonMobil continues to maintain a diverse portfolio of exploration and development opportunities, which enables the Corporation to be selective, maximizing shareholder value and mi political and technical risks. ExxonMobil's fundamental Upstream business strategies guide our global exploration, development, production, and gas and power marketing activities strategies include capturing material and accretive opportunities to continually high-grade the resource portfolio, selectively developing attractive oil and natural gas resources, develop applying high-impact technologies, and pursuing productivity and efficiency gains. These strategies are underpinned by a relentless focus on operational excellence, development employees, and investment in the communities within which we operate.

As future development projects and drilling activities bring new production online, the Corporation expects a shift in the geographic mix and in the type of opportunities from which volu produced. Oil equivalent production from North

America is expected to increase over the next several years based on current investment plans, contributing over a third of total production. Further, the proportion of our global productio resource types utilizing specialized technologies such as arctic, deepwater, unconventional drilling and production systems and LNG, is a slight majority of production and is expected t over the next few years. We do not anticipate that the expected change in the geographic mix of production volumes, and in the types of opportunities from which volumes will be produc have a material impact on the nature and the extent of the risks disclosed in Item 1A. Risk Factors, or result in a material change in our level of unit operating expenses.

The Corporation anticipates several projects will come online over the next few years providing additional production capacity. However, actual volumes will vary from year to year du timing of individual project start-ups; operational outages; reservoir performance; performance of enhanced oil recovery projects; regulatory changes; the impact of fiscal and commercia asset sales; weather events; price effects on production sharing contracts; changes in the amount and timing of capital investments that may vary depending on the oil and gas price enviro and other factors described in Item 1A. Risk Factors.

The upstream industry environment has been challenged in recent years with abundant crude oil supply causing crude oil prices to decrease to levels not seen since 2004, and natural ga declined with increased supply. However, current market conditions are not necessarily indicative of future conditions. The markets for crude oil and natural gas have a history of significa volatility. ExxonMobil believes prices over the long term will continue to be driven by market supply and demand, with the demand side largely being a function of global economic gro the supply side, prices may be significantly impacted by political events, the actions of OPEC and other large government resource owners, and other factors. To manage the risks associat price, ExxonMobil evaluates annual plans and major investments across a range of price scenarios.

Downstream

ExxonMobil's Downstream is a large, diversified business with refining, logistics, and marketing complexes around the world. The Corporation has a presence in mature markets in North A and Europe, as well as in the growing Asia Pacific region.

ExxonMobil's fundamental Downstream business strategies competitively position the company across a range of market conditions. These strategies include targeting best-in-class opera all aspects of the business, maximizing value from advanced technologies, capitalizing on integration across ExxonMobil businesses, selectively investing for resilient, advantaged operating efficiently and effectively, and providing quality, valued and differentiated products and services to customers.

ExxonMobil's operating results, as noted in Item 2. Properties, reflect 22 refineries, located in 14 countries, with distillation capacity of 4.9 million barrels per day and lubricant ba manufacturing capacity of 126 thousand barrels per day. ExxonMobil's fuels and lubes marketing businesses have significant global reach, with multiple channels to market serving a customer base. Our portfolio of world-renowned brands includes *Exxon*, *Mobil*, *Esso* and *Mobil 1*.

While demand remained strong in 2016, margins weakened as surplus distillate and gasoline production capacity created high inventories. North American refineries which benefite cost-competitive feedstock and energy supplies saw lower margins as the differential between Brent and WTI narrowed after the elimination of the U.S. crude export ban. Margins in Eur Asia weakened versus 2015, but reductions in supply and rising Asia demand kept those markets above bottom-of-cycle conditions seen in 2014. In the near term, we see variability in margins, with some regions seeing weaker margins as new capacity additions are expected to outpace growth in global demand for our products, which can also be affected by global ec conditions and regulatory changes.

Refining margins are largely driven by differences in commodity prices and are a function of the difference between what a refinery pays for its raw materials (primarily crude oil) and the prices for the range of products produced (primarily gasoline, heating oil, diesel oil, jet fuel and fuel oil). Crude oil and many products are widely traded with published prices, includin quoted on multiple exchanges around the world (e.g., New York Mercantile Exchange and Intercontinental Exchange). Prices for these commodities are determined by the global marketpl are influenced by many factors, including global and regional supply/demand balances, inventory levels, industry refinery operations, import/export balances, currency fluctuations, s demand, weather and political climate.

ExxonMobil's long-term outlook is that industry refining margins will remain subject to intense competition as new capacity additions outpace the growth in global demand. Exxon integration across the value chain, from refining to marketing, enhances overall value in both fuels and lubricants businesses.

As described in more detail in Item 1A. Risk Factors, proposed carbon policy and other climate-related regulations in many countries, as well as the continued growth in biofuels mandate have negative impacts on the Downstream business.

In the retail fuels marketing business, product cost volatility has contributed to a decline in margins. In 2016, ExxonMobil expanded its branded retail site network and progressed the mu transition of the direct served (i.e., dealer, company-operated) retail network in portions of Europe and Canada to a more capital-efficient Branded Wholesaler model. The company's lu business continues to grow, leveraging world-class brands and integration with industry-leading basestock refining capability. ExxonMobil remains a market leader in the high-value synthetic lubricants sector, despite increasing competition.

The Downstream portfolio is continually evaluated during all parts of the business cycle, and numerous asset divestments have been made over the past decade. In 2016, the company dive refinery in Torrance, California. When investing in the Downstream, ExxonMobil remains focused on selective and resilient projects. In 2016, construction continued on a new delayed col at the refinery in Antwerp, Belgium, to upgrade low-value bunker fuel into higher value diesel products. Construction also progressed on a proprietary hydrocracker at the refinery in Rot Netherlands, to produce higher value ultra-low sulfur diesel and Group II basestocks. The Taicang, China, lubricants plant expansion was completed in April 2016, doubling the capacity facility. The Port Allen Aviation Lubricants Plant in Louisiana achieved full production during the year, and an expansion in Singapore is underway to support demand growth for f lubricants in key markets. Finally, ExxonMobil announced plans to increase production of ultra-low sulfur fuels at the Beaumont, Texas, refinery by approximately 40,000 barrels per day.

Chemical

Worldwide petrochemical demand remained strong in 2016, led by growing demand from Asia Pacific manufacturers of industrial and consumer products. North America continued to from abundant supplies of natural gas and gas liquids, providing both low-cost feedstock and energy. Specialty product margins moderated in 2016 with capacity additions exceeding growth.

ExxonMobil sustained its competitive advantage through continued operational excellence, investment and cost discipline, a balanced portfolio of products, and integration with refini upstream operations, all underpinned by proprietary technology.

In 2016, we completed startup of the specialty elastomers project at our joint venture facility in Al-Jubail, Saudi Arabia. Construction continued on a major expansion at our Texas fa including a new world-scale ethane cracker and polyethylene lines, to capitalize on low-cost feedstock and energy supplies in North America and to meet rapidly growing demand for pr polymers. Construction of new halobutyl rubber and hydrocarbon resin units also progressed in Singapore to further extend our specialty product capacity in Asia Pacific. The compa announced plans to expand its polyethylene plant in Beaumont, Texas, and specialty elastomers plant in Newport, Wales.

REVIEW OF 2016 AND 2015 RESULTS

	2016	2015	20
		(millions of dollars)	
Earnings (U.S. GAAP)			
Net income attributable to ExxonMobil (U.S. GAAP)	7,840	16,150	

Upstream

	2016	2015	20
		(millions of dollars)	
Upstream			
United States	(4,151)	(1,079)	
Non-U.S.	4,347	8,180	
Total	196	7,101	

2016

Upstream earnings were $196 million in 2016 and included an asset impairment charge of $2,027 million mainly related to dry gas operations with undeveloped acreage in the Rocky Mo region of the U.S. Current year earnings were down $6,905 million from 2015. Lower realizations decreased earnings by $5.3 billion. Favorable volume and mix effects increased earn $130 million. The impairment charge reduced earnings by $2 billion. All other items increased earnings by $310 million, primarily due to lower expenses partly offset by the absence of fa tax items from the prior year. On an oil equivalent basis, production of 4.1 million barrels per day was down slightly compared to 2015. Liquids production of 2.4 million barrels per day in 20,000 barrels per day with increased project volumes, mainly in Canada, Indonesia and Nigeria, partly offset by field decline, the impact from Canadian wildfires, and downtime no Nigeria. Natural gas production of 10.1 billion cubic feet per day decreased 388 million cubic feet per day from 2015 as field decline, regulatory restrictions in the Netherlands and dive were partly offset by higher project volumes and work programs. U.S. Upstream earnings declined $3,072 million from 2015 to a loss of $4,151 million, and included the impairment ch $2,027 million. Earnings outside the U.S. were $4,347 million, down $3,833 million from the prior year.

2015

Upstream earnings were $7,101 million, down $20,447 million from 2014. Lower realizations decreased earnings by $18.8 billion. Favorable volume and mix effects increased earn $810 million, including contributions from new developments. All other items decreased earnings by $2.4 billion, primarily due to lower asset management gains and approximately $500 of lower favorable one-time tax effects, partly offset by lower expenses of about $230 million. On an oil-equivalent basis, production of 4.1 million barrels per day was up 3.2 percent co to 2014. Liquids production of 2.3 million barrels per day increased 234,000 barrels per day, with project ramp-up and entitlement effects partly offset by field decline. Natural gas produ 10.5 billion cubic feet per day decreased 630 million cubic feet per day from 2014 as regulatory restrictions in the Netherlands and field decline were partly offset by project ramp-u programs and entitlement effects. U.S. Upstream earnings declined $6,276 million from 2014 to a loss of $1,079 million in 2015. Earnings outside the U.S. were $8,180 million $14,171 million from the prior year.

Upstream Additional Information

	2016	2015
	(thousands of barrels daily)	
Volumes Reconciliation (Oil-equivalent production) *(1)*		
Prior year	4,097	
Entitlements - Net Interest	9	
Entitlements - Price / Spend / Other	(23)	
Quotas	-	
Divestments	(34)	
United Arab Emirates Onshore Concession Expiry	-	
Growth / Other	4	
Current Year	4,053	

(1) Gas converted to oil-equivalent at 6 million cubic feet = 1 thousand barrels.

Listed below are descriptions of ExxonMobil’s volumes reconciliation factors which are provided to facilitate understanding of the terms.

Entitlements - Net Interest are changes to ExxonMobil’s share of production volumes caused by non-operational changes to volume-determining factors. These factors consist of net changes specified in Production Sharing Contracts (PSCs) which typically occur when cumulative investment returns or production volumes achieve defined thresholds, changes in equi achieving pay-out in partner investment carry situations, equity redeterminations as specified in venture agreements, or as a result of the termination or expiry of a concession. Once a net change has occurred, it typically will not be reversed by subsequent events, such as lower crude oil prices.

Entitlements - Price, Spend and Other are changes to ExxonMobil’s share of production volumes resulting from temporary changes to non-operational volume-determining factors. These include changes in oil and gas prices or spending levels from one period to another. According to the terms of contractual arrangements or government royalty regimes, price or sp variability can increase or decrease royalty burdens and/or volumes attributable to ExxonMobil. For example, at higher prices, fewer barrels are required for ExxonMobil to recover its costs effects generally vary from period to period with field spending patterns or market prices for oil and natural gas. Such factors can also include other temporary changes in net interest as dict specific provisions in production agreements.

Quotas are changes in ExxonMobil’s allowable production arising from production constraints imposed by countries which are members of the Organization of the Petroleum Exporting Co (OPEC). Volumes reported in this category would have been readily producible in the absence of the quota.

Divestments are reductions in ExxonMobil’s production arising from commercial arrangements to fully or partially reduce equity in a field or asset in exchange for financial or other ec consideration.

Growth and Other factors comprise all other operational and non-operational factors not covered by the above definitions that may affect volumes attributable to ExxonMobil. Such include, but are not limited to, production enhancements from project and work program activities, acquisitions including additions from asset exchanges, downtime, market demand, natur decline, and any fiscal or commercial terms that do not affect entitlements.

Downstream

	2016	2015	20
		(millions of dollars)	
Downstream			
United States	1,094	1,901	
Non-U.S.	3,107	4,656	
Total	4,201	6,557	

2016

Downstream earnings of $4,201 million decreased $2,356 million from 2015. Weaker refining and marketing margins decreased earnings by $3.8 billion, while volume and mix effects in earnings by $560 million. All other items increased earnings by $920 million, mainly reflecting gains from divestments, notably in Canada. Petroleum product sales of 5.5 million barrels were 272,000 barrels per day lower than 2015 mainly reflecting the divestment of refineries in California and Louisiana. U.S. Downstream earnings were $1,094 million, a decr $807 million from 2015. Non-U.S. Downstream earnings were $3,107 million, down $1,549 million from the prior year.

2015

Downstream earnings of $6,557 million increased $3,512 million from 2014. Stronger margins increased earnings by $4.1 billion, while volume and mix effects decreased earni $200 million. All other items decreased earnings by $420 million, reflecting nearly $560 million in higher maintenance expense and about $280 million in unfavorable inventory impacts offset by favorable foreign exchange effects. Petroleum product sales of 5.8 million barrels per day were 121,000 barrels per day lower than 2014. U.S. Downstream earnings were $1,901 an increase of $283 million from 2014. Non-U.S. Downstream earnings were $4,656 million, up $3,229 million from the prior year.

Chemical

	2016	2015	20
		(millions of dollars)	
Chemical			
United States	1,876	2,386	
Non-U.S.	2,739	2,032	
Total	4,615	4,418	

2016

Chemical earnings of $4,615 million increased $197 million from 2015. Stronger margins increased earnings by $440 million. Favorable volume and mix effects increased earni $100 million. All other items decreased earnings by $340 million, primarily due to the absence of U.S. asset management gains. Prime product sales of 24.9 million metric tons 212,000 metric tons from 2015. U.S. Chemical earnings were $1,876 million, down $510 million from 2015 reflecting the absence of asset management gains. Non-U.S. Chemical earn $2,739 million were $707 million higher than the prior year.

2015

Chemical earnings of $4,418 million increased $103 million from 2014. Stronger margins increased earnings by $590 million. Favorable volume and mix effects increased earni $220 million. All other items decreased earnings by $710 million, reflecting about $680 million in unfavorable foreign exchange effects and $220 million in negative tax and inventory i partly offset by asset management gains. Prime product sales of 24.7 million metric tons were up 478,000 metric tons from 2014. U.S. Chemical earnings were $2,386 million, down $418 from 2014. Non-U.S. Chemical earnings were $2,032 million, $521 million higher than the prior year.

Corporate and Financing

	2016	2015
		(millions of dollars)
Corporate and financing	(1,172)	(1,926)

2016

Corporate and financing expenses of $1,172 million in 2016 were $754 million lower than 2015 mainly reflecting favorable non-U.S. tax items.

2015

Corporate and financing expenses were $1,926 million in 2015 compared to $2,388 million in 2014, with the decrease due mainly to net favorable tax-related items.

LIQUIDITY AND CAPITAL RESOURCES

Sources and Uses of Cash

	2016	2015	20
		(millions of dollars)	
Net cash provided by/(used in)			
Operating activities	22,082	30,344	
Investing activities	(12,403)	(23,824)	(
Financing activities	(9,293)	(7,037)	(
Effect of exchange rate changes	(434)	(394)	
Increase/(decrease) in cash and cash equivalents	(48)	(911)	
		(December 31)	
Cash and cash equivalents	3,657	3,705	
Cash and cash equivalents - restricted	-	-	
Total cash and cash equivalents	3,657	3,705	

Total cash and cash equivalents were $3.7 billion at the end of 2016, essentially in line with the prior year. The major sources of funds in 2016 were net income including noncontrolling i of $8.4 billion, the adjustment for the noncash provision of $22.3 billion for depreciation and depletion, proceeds from asset sales of $4.3 billion, and a net debt increase of $4.3 billion. Th uses of funds included spending for additions to property, plant and equipment of $16.2 billion, dividends to shareholders of $12.5 billion, the adjustment for non-cash deferred income tax of $4.4 billion, and a change in working capital, excluding cash and debt, of $1.4 billion.

Total cash and cash equivalents were $3.7 billion at the end of 2015, $1.0 billion lower than the prior year. The major sources of funds in 2015 were net income including noncontrolling i of $16.6 billion, the adjustment for the noncash provision of $18.0 billion for depreciation and depletion, and a net debt increase of $9.3 billion. The major uses of funds included spend additions to property, plant and equipment of $26.5 billion, the purchase of shares of ExxonMobil stock of $4.0 billion, dividends to shareholders of $12.1 billion and a change in working excluding cash and debt, of $3.1 billion.

The Corporation has access to significant capacity of long-term and short-term liquidity. Internally generated funds are expected to cover the majority of financial requirements, suppleme long-term and short-term debt. On December 31, 2016, the Corporation had unused committed short-term lines of credit of $5.5 billion and unused committed long-term lines of c $0.3 billion. Cash that may be temporarily available as surplus to the Corporation's immediate needs is carefully managed through counterparty quality and investment guidelines to ens secure and readily available to meet the Corporation's cash requirements and to optimize returns.

To support cash flows in future periods the Corporation will need to continually find and develop new fields, and continue to develop and apply new technologies and recovery proc existing fields, in order to maintain or increase production. After a period of production at plateau rates, it is the nature of oil and gas fields eventually to produce at declining rates remainder of their economic life. Averaged over all the Corporation's existing oil and gas fields and without new projects, ExxonMobil's production is expected to decline at an ave approximately 3 percent per year over the next few years. Decline rates can vary widely by individual field due to a number of factors, including, but not limited to, the type of reservo properties, recovery mechanisms, work activity, and age of the field. Furthermore, the Corporation's net interest in production for individual fields can vary with price and the impact of fis commercial terms.

The Corporation has long been successful at offsetting the effects of natural field decline through disciplined investments in quality opportunities and project execution. The Corp anticipates several projects will come online over the next few years providing additional production capacity. However, actual volumes will vary from year to year due to the timing of in project start-ups; operational outages; reservoir performance; performance of enhanced oil recovery projects; regulatory changes; the impact of fiscal and commercial terms; asset sales; events; price effects on production sharing contracts; and changes in the amount and timing of investments that may vary depending on the oil and gas price environment. The Corporatio flows are also highly dependent on crude oil and natural gas prices. Please refer to Item 1A. Risk Factors for a more complete discussion of risks.

The Corporation’s financial strength enables it to make large, long-term capital expenditures. Capital and exploration expenditures in 2016 were $19.3 billion, reflecting the Corpo continued active investment program. The Corporation anticipates an investment level of $22 billion in 2017. The Corporation is emerging from several years of high capital expenditur that supported major long-plateau production projects coming on line. Lower levels of capital spending over the next few years, partly due to cost savings and capital efficiencies, are not e to delay major project schedules nor have a material effect on our volume capacity outlook.

Actual spending could vary depending on the progress of individual projects and property acquisitions. The Corporation has a large and diverse portfolio of development projects and exp opportunities, which helps mitigate the overall political and technical risks of the Corporation’s Upstream segment and associated cash flow. Further, due to its financial strength, debt capa diverse portfolio of opportunities, the risk associated with failure or delay of any single project would not have a significant impact on the Corporation’s liquidity or ability to generate su cash flows for operations and its fixed commitments.

Cash Flow from Operating Activities

2016

Cash provided by operating activities totaled $22.1 billion in 2016, $8.3 billion lower than 2015. The major source of funds was net income including noncontrolling interests of $8.4 b decrease of $8.2 billion. The noncash provision for depreciation and depletion was $22.3 billion, up $4.3 billion from the prior year. The adjustment for net gains on asset sales was $1.7 while the adjustment for deferred income tax credits was $4.4 billion. Changes in operational working capital, excluding cash and debt, decreased cash in 2016 by $1.4 billion.

2015

Cash provided by operating activities totaled $30.3 billion in 2015, $14.8 billion lower than 2014. The major source of funds was net income including noncontrolling interests of $16.6 b decrease of $17.1 billion. The noncash provision for depreciation and depletion was $18.0 billion, up $0.8 billion from the prior year. The adjustment for net gains on asset sales was $0.2 compared to an adjustment of $3.2 billion in 2014. Changes in operational working capital, excluding cash and debt, decreased cash in 2015 by $3.1 billion.

Cash Flow from Investing Activities

2016

Cash used in investment activities netted to $12.4 billion in 2016, $11.4 billion lower than 2015. Spending for property, plant and equipment of $16.2 billion decreased $10.3 billion fro Proceeds associated with sales of subsidiaries, property, plant and equipment, and sales and returns of investments of $4.3 billion compared to $2.4 billion in 2015. Additional investm advances were $0.8 billion higher in 2016.

2015

Cash used in investment activities netted to $23.8 billion in 2015, $3.2 billion lower than 2014. Spending for property, plant and equipment of $26.5 billion decreased $6.5 billion fro Proceeds associated with sales of subsidiaries, property, plant and equipment, and sales and returns of investments of $2.4 billion compared to $4.0 billion in 2014. Additional investm advances were $1.0 billion lower in 2015, while collection of advances was $2.5 billion lower in 2015.

Cash Flow from Financing Activities

2016

Cash used in financing activities was $9.3 billion in 2016, $2.3 billion higher than 2015. Dividend payments on common shares increased to $2.98 per share from $2.88 per share and totale billion. Total debt increased $4.1 billion to $42.8 billion at year-end. The first quarter issuance of $12.0 billion in long-term debt was partly offset by repayments of $8.0 billion in com paper and other short-term debt during the year.

ExxonMobil share of equity decreased $3.5 billion to $167.3 billion. The addition to equity for earnings was $7.8 billion. This was offset by reductions for distributions to Exxo shareholders of $12.5 billion, all in the form of dividends. Foreign exchange translation effects of $0.3 billion for the stronger U.S. currency reduced equity, while a $1.6 billion chang funded status of the postretirement benefits reserves increased equity.

During 2016, Exxon Mobil Corporation acquired 12 million shares of its common stock for the treasury at a gross cost of $1.0 billion. These purchases were made to offset shares or units in shares issued in conjunction with the company’s benefit plans and programs. Shares outstanding were reduced from 4,156 million to 4,148 million at the end of 2016.

2015

Cash used in financing activities was $7.0 billion in 2015, $10.9 billion lower than 2014. Dividend payments on common shares increased to $2.88 per share from $2.70 per share and $12.1 billion, a pay-out of 75 percent of net income. During the first quarter of 2015, the Corporation issued $8.0 billion of long-term debt. Total debt increased $9.6 billion to $38.7 bi year-end.

ExxonMobil share of equity decreased $3.6 billion to $170.8 billion. The addition to equity for earnings was $16.2 billion. This was offset by reductions for distributions to Exxo shareholders of $15.1 billion, composed of $12.1 billion in dividends and $3.0 billion of share purchases of ExxonMobil stock to reduce shares outstanding. Foreign exchange translation ef $8.2 billion for the stronger U.S. currency reduced equity, while a $3.6 billion change in the funded status of the postretirement benefits reserves increased equity.

During 2015, Exxon Mobil Corporation acquired 48 million shares of its common stock for the treasury at a gross cost of $4.0 billion. These purchases were to reduce the number of outstanding and to offset shares or units settled in shares issued in conjunction with company benefit plans and programs. Shares outstanding were reduced by 1.1 percent from 4,201 mi 4,156 million at the end of 2015. Purchases were made in both the open market and through negotiated transactions. Purchases may be increased, decreased or discontinued at any time prior notice.

Commitments

Set forth below is information about the outstanding commitments of the Corporation’s consolidated subsidiaries at December 31, 2016. The table combines data from the Consolidated I Sheet and from individual notes to the Consolidated Financial Statements.

		Payments Due by Period				
Commitments	**Note Reference Number**	**2017**	**2018-2019**	**2020-2021**	**2022 and Beyond**	**To**
		(millions of dollars)				
Long-term debt *(1)*	14	-	8,623	4,149	16,160	
– Due in one year *(2)*	6	2,960	-	-	-	
Asset retirement obligations *(3)*	9	891	1,852	1,425	9,075	
Pension and other postretirement obligations *(4)*	17	2,015	2,017	1,977	14,700	
Operating leases *(5)*	11	1,103	1,133	561	1,014	
Take-or-pay and unconditional purchase obligations *(6)*		2,904	5,082	3,985	9,609	
Firm capital commitments *(7)*		6,432	2,781	779	421	

This table excludes commodity purchase obligations (volumetric commitments but no fixed or minimum price) which are resold shortly after purchase, either in an active, highly liquid ma under long-term, unconditional sales contracts with similar pricing terms. Examples include long-term, noncancelable LNG and natural gas purchase commitments and commitments to p refinery products at market prices. Inclusion of such commitments would not be meaningful in assessing liquidity and cash flow, because these purchases will be offset in the same periods received from the related sales transactions. The table also excludes unrecognized tax benefits totaling $9.5 billion as of December 31, 2016, because the Corporation is unable to make rea reliable estimates of the timing of cash settlements with the respective taxing authorities. Further details on the unrecognized tax benefits can be found in “Note 19: Income, Sales-Based an Taxes”.

Notes:

(1) Includes capitalized lease obligations of $1,225 million.

(2) The amount due in one year is included in notes and loans payable of $13,830 million.

(3) The fair value of asset retirement obligations, primarily upstream asset removal costs at the completion of field life.

(4) The amount by which the benefit obligations exceeded the fair value of fund assets for certain U.S. and non-U.S. pension and other postretirement plans at year-end. The payments by include expected contributions to funded pension plans in 2017 and estimated benefit payments for unfunded plans in all years.

(5) Minimum commitments for operating leases, shown on an undiscounted basis, cover drilling equipment, tankers, service stations and other properties. Total includes $836 million re drilling rigs and related equipment.

(6) Take-or-pay obligations are noncancelable, long-term commitments for goods and services. Unconditional purchase obligations are those long-term commitments that are noncance cancelable only under certain conditions, and that third parties have used to secure financing for the facilities that will provide the contracted goods or services. The undiscounted obli of $21,580 million mainly pertain to pipeline, manufacturing supply and terminal agreements.

(7) Firm capital commitments represent legally binding payment obligations to third parties where agreements specifying all significant terms have been executed for the construct purchase of fixed assets and other permanent investments. In certain cases where the Corporation executes contracts requiring commitments to a work scope, those commitments ha included to the extent that the amounts and timing of payments can be reliably estimated. Firm capital commitments, shown on an undiscounted basis, totaled $10.4 billion, includi billion in the U.S. Firm capital commitments for the non-U.S. Upstream of $6.9 billion were primarily associated with projects in the United Arab Emirates, Africa, Malaysia, C Australia and Norway. The Corporation expects to fund the majority of these commitments with internally generated funds, supplemented by long-term and short-term debt.

Guarantees

The Corporation and certain of its consolidated subsidiaries were contingently liable at December 31, 2016, for guarantees relating to notes, loans and performance under contracts (No Where guarantees for environmental remediation and other similar matters do not include a stated cap, the amounts reflect management's estimate of the maximum potential exposure guarantees are not reasonably likely to have a material effect on the Corporation's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, expenditures or capital resources.

Financial Strength

On December 31, 2016, the Corporation's unused short-term committed lines of credit totaled $5.5 billion (Note 6) and unused long-term committed lines of credit totaled $0.3 billion (No The table below shows the Corporation's fixed-charge coverage and consolidated debt-to-capital ratios. The data demonstrate the Corporation's creditworthiness.

	2016	2015
Fixed-charge coverage ratio (times)	5.7	17.6
Debt to capital (percent)	19.7	18.0
Net debt to capital (percent)	18.4	16.5

Management views the Corporation's financial strength, as evidenced by the above financial ratios and other similar measures, to be a competitive advantage of strategic importan Corporation's sound financial position gives it the opportunity to access the world's capital markets in the full range of market conditions, and enables the Corporation to take on large, lo capital commitments in the pursuit of maximizing shareholder value.

Litigation and Other Contingencies

As discussed in Note 16, a variety of claims have been made against ExxonMobil and certain of its consolidated subsidiaries in a number of pending lawsuits. Based on a consideratio relevant facts and circumstances, the Corporation does not believe the ultimate outcome of any currently pending lawsuit against ExxonMobil will have a material adverse effect u Corporation's operations, financial condition, or financial statements taken as a whole. There are no events or uncertainties beyond those already included in reported financial informat would indicate a material change in future operating results or financial condition. Refer to Note 16 for additional information on legal proceedings and other contingencies.

CAPITAL AND EXPLORATION EXPENDITURES

	2016			2015		
	U.S.	Non-U.S.	Total	U.S.	Non-U.S.	T
			(millions of dollars)			
Upstream *(1)*	3,518	11,024	14,542	7,822	17,585	
Downstream	839	1,623	2,462	1,039	1,574	
Chemical	1,553	654	2,207	1,945	898	
Other	93	-	93	188	-	
Total	6,003	13,301	19,304	10,994	20,057	

(1) Exploration expenses included.

Capital and exploration expenditures in 2016 were $19.3 billion, as the Corporation continued to pursue opportunities to find and produce new supplies of oil and natural gas to meet demand for energy. The Corporation anticipates an investment level of $22 billion in 2017. Actual spending could vary depending on the progress of individual projects and property acquis

Upstream spending of $14.5 billion in 2016 was down 43 percent from 2015, reflecting key project start-ups and capital efficiencies. Investments in 2016 included U.S. onshore drilling and class projects in Kazakhstan, Canada and Australia. The majority of expenditures are on development projects, which typically take two to four years from the time of recording undeveloped reserves to the start of production. The percentage of proved developed reserves was 69 percent of total proved reserves at year-end 2016, and has been over 60 percent for the years.

Capital investments in the Downstream totaled $2.5 billion in 2016, a decrease of $0.2 billion from 2015, mainly reflecting lower refining project spending. Chemical capital expenditures billion decreased $0.6 billion from 2015 resulting from progression of major expansions.

TAXES

	2016	2015	20
		(millions of dollars)	
Income taxes	(406)	5,415	
Effective income tax rate	*13%*	*34%*	
Sales-based taxes	21,090	22,678	
All other taxes and duties	28,265	29,790	
Total	48,949	57,883	

2016

Income, sales-based and all other taxes and duties totaled $48.9 billion in 2016, a decrease of $8.9 billion or 15 percent from 2015. Income tax expense, both current and deferred, was a c $0.4 billion, $5.8 billion lower than 2015, reflecting lower pre-tax income. The effective tax rate, which is calculated based on consolidated company income taxes and ExxonMobil's s equity company income taxes, was 13 percent compared to 34 percent in the prior year due primarily to a lower share of earnings in higher tax jurisdictions, favorable one-time items, impact of the U.S. Upstream impairment charge. Sales-based and all other taxes and duties of $49.4 billion in 2016 decreased $3.1 billion.

2015

Income, sales-based and all other taxes and duties totaled $57.9 billion in 2015, a decrease of $25.0 billion or 30 percent from 2014. Income tax expense, both current and deferred, w billion, $12.6 billion lower than 2014, as a result of lower earnings and a lower effective tax rate. The effective tax rate was 34 percent compared to 41 percent in the prior year due primar lower share of earnings in higher tax jurisdictions. Sales-based and all other taxes and duties of $52.5 billion in 2015 decreased $12.4 billion as a result of lower sales realizations.

ENVIRONMENTAL MATTERS

Environmental Expenditures

	2016	2(
	(millions of dollars)	
Capital expenditures	1,436	
Other expenditures	3,451	
Total	4,887	

Throughout ExxonMobil's businesses, new and ongoing measures are taken to prevent and minimize the impact of our operations on air, water and ground. These include a significant inv in refining infrastructure and technology to manufacture clean fuels, as well as projects to monitor and reduce nitrogen oxide, sulfur oxide and greenhouse gas emissions, and expenditures f retirement obligations. Using definitions and guidelines established by the American Petroleum Institute, ExxonMobil's 2016 worldwide environmental expenditures for all such preventat remediation steps, including ExxonMobil's share of equity company expenditures, were $4.9 billion, of which $3.5 billion were included in expenses with the remainder in capital expen The total cost for such activities is expected to remain relatively flat at approximately $5 billion in 2017 and 2018. Capital expenditures are expected to account for approximately 30 percen total.

Environmental Liabilities

The Corporation accrues environmental liabilities when it is probable that obligations have been incurred and the amounts can be reasonably estimated. This policy applies to assets or bus currently owned or previously disposed. ExxonMobil has accrued liabilities for probable environmental remediation obligations at various sites, including multiparty sites where t Environmental Protection Agency has identified ExxonMobil as one of the potentially responsible parties. The involvement of other financially responsible companies at these multipar could mitigate ExxonMobil's actual joint and several liability exposure. At present, no individual site is expected to have losses material to ExxonMobil's operations or financial co Consolidated company provisions made in 2016 for environmental liabilities were $665 million ($371 million in 2015) and the balance sheet reflects accumulated liabilities of $852 millio December 31, 2016, and $837 million as of December 31, 2015.

MARKET RISKS, INFLATION AND OTHER UNCERTAINTIES

Worldwide Average Realizations *(1)*	2016	2015	
Crude oil and NGL ($ per barrel)	38.15	44.77	
Natural gas ($ per thousand cubic feet)	2.25	2.95	

(1) Consolidated subsidiaries.

Crude oil, natural gas, petroleum product and chemical prices have fluctuated in response to changing market forces. The impacts of these price fluctuations on earnings from Up Downstream and Chemical operations have varied. In the Upstream, a $1 per barrel change in the weighted-average realized price of oil would have approximately a $400 million annual a effect on Upstream consolidated plus equity company earnings. Similarly, a $0.10 per thousand cubic feet change in the worldwide average gas realization would have approximately million annual after-tax effect on Upstream consolidated plus equity company earnings. For any given period, the extent of actual benefit or detriment will be dependent on the price moven individual types of crude oil, taxes and other government take impacts, price adjustment lags in long-term gas contracts, and crude and gas production volumes. Accordingly, cha benchmark prices for crude oil and natural gas only provide broad indicators of changes in the earnings experienced in any particular period.

In the very competitive downstream and chemical environments, earnings are primarily determined by margin capture rather than absolute price levels of products sold. Refining margi function of the difference between what a refiner pays for its raw materials (primarily crude oil) and the market prices for the range of products produced. These prices in turn depend o and regional supply/demand balances, inventory levels, refinery operations, import/export balances and weather.

The global energy markets can give rise to extended periods in which market conditions are adverse to one or more of the Corporation's businesses. Such conditions, along with the intensive nature of the industry and very long lead times associated with many of our projects, underscore the importance of maintaining a strong financial position. Management vi Corporation's financial strength as a competitive advantage.

In general, segment results are not dependent on the ability to sell and/or purchase products to/from other segments. Instead, where such sales take place, they are the result of efficienc competitive advantages of integrated refinery/chemical complexes. Additionally, intersegment sales are at market-based prices. The products bought and sold between segments can acquired in worldwide markets that have substantial liquidity, capacity and transportation capabilities. About 35 percent of the Corporation's intersegment sales represent Upstream producti to the Downstream. Other intersegment sales include those between refineries and chemical plants related to raw materials, feedstocks and finished products.

Although price levels of crude oil and natural gas may rise or fall significantly over the short to medium term due to global economic conditions, political events, decisions by OPEC an major government resource owners and other factors, industry economics over the long term will continue to be driven by market supply and demand. Accordingly, the Corporation evalu viability of its major investments over a range of prices.

The Corporation has an active asset management program in which underperforming assets are either improved to acceptable levels or considered for divestment. The asset management p includes a disciplined, regular review to ensure that all assets are contributing to the Corporation's strategic objectives resulting in an efficient capital base.

Risk Management

The Corporation's size, strong capital structure, geographic diversity and the complementary nature of the Upstream, Downstream and Chemical businesses reduce the Corporation's ent wide risk from changes in interest rates, currency rates and commodity prices. As a result, the Corporation makes limited use of derivative instruments to mitigate the impact of such change respect to derivatives activities, the Corporation believes that there are no material market or credit risks to the Corporation's financial position, results of operations or liquidity as a resul derivatives described in Note 13. The Corporation does not engage in speculative derivative activities or derivative trading activities nor does it use derivatives with leveraged features. Cre associated with the Corporation's derivative position is mitigated by several factors, including the use of derivative clearing exchanges and the quality of and financial limits placed on de counterparties. The Corporation maintains a system of controls that includes the authorization, reporting and monitoring of derivative activity.

The Corporation is exposed to changes in interest rates, primarily on its short-term debt and the portion of long-term debt that carries floating interest rates. The impact of a 100-basis-point in interest rates affecting the Corporation's debt would not be material to earnings, cash flow or fair value. The Corporation has access to significant capacity of long-term and short-term li Internally generated funds are expected to cover the majority of financial requirements, supplemented by long-term and short-term debt. Some joint-venture partners are dependent on th markets, and their funding ability may impact the development pace of joint-venture projects.

The Corporation conducts business in many foreign currencies and is subject to exchange rate risk on cash flows related to sales, expenses, financing and investment transactions. The im fluctuations in exchange rates on ExxonMobil's geographically and functionally diverse operations are varied and often offsetting in amount. The Corporation makes limited use of c exchange contracts to mitigate the impact of changes in currency values, and exposures related to the Corporation's limited use of the currency exchange contracts are not material.

Inflation and Other Uncertainties

The general rate of inflation in many major countries of operation has remained moderate over the past few years, and the associated impact on non-energy costs has generally been mitig cost reductions from efficiency and productivity improvements. Beginning several years ago, an extended period of increased demand for certain services and materials resulted in higher o and capital costs. More recently, multiple market changes, including general commodity price decreases, lower oil prices and reduced upstream industry activity, have contributed to lowe for oilfield services and materials. The Corporation works to minimize costs in all commodity price environments through its economies of scale in global procurement and its efficient management practices.

RECENTLY ISSUED ACCOUNTING STANDARDS

In May 2014, the Financial Accounting Standards Board issued a new standard, *Revenue from Contracts with Customers*. The standard establishes a single revenue recognition model contracts with customers, eliminates industry specific requirements, and expands disclosure requirements. The standard is required to be adopted beginning January 1, 2018. "Sales and Operating Revenue" on the Consolidated Statement of Income includes sales, excise and value-added taxes on sales transactions. When the Corporation adopts the standard, revenue will sales-based taxes collected on behalf of third parties. This change in reporting will not impact earnings. The Corporation expects to adopt the standard using the Modified Retrospective under which prior years' results are not restated, but supplemental information on the impact of the new standard is provided for 2018 results. The Corporation continues to evaluate other the standard, which are not expected to have a material effect on the Corporation's financial statements.

In February 2016, the Financial Accounting Standards Board issued a new standard, *Leases*. The standard requires that all leases with an initial term greater than one year be recorded balance sheet as a lease asset and a lease liability. The standard is required to be adopted beginning January 1, 2019, with early adoption permitted. ExxonMobil is evaluating the standard effect on the Corporation's financial statements and plans to adopt it in 2019.

CRITICAL ACCOUNTING ESTIMATES

The Corporation's accounting and financial reporting fairly reflect its straightforward business model involving the extracting, refining and marketing of hydrocarbons and hydrocarbon products. The preparation of financial statements in conformity with U.S. Generally Accepted Accounting Principles (GAAP) requires management to make estimates and judgments tha the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. The Corporation's accounting policies are summarized in Note 1.

Oil and Natural Gas Reserves

The estimation of proved reserves is an ongoing process based on rigorous technical evaluations, commercial and market assessment, and detailed analysis of well information such as flo and reservoir pressure declines, among other factors. The estimation of proved reserves is controlled by the Corporation through long-standing approval guidelines. Reserve changes ar within a well-established, disciplined process driven by senior level geoscience and engineering professionals, assisted by the Global Reserves Group which has significant technical exp culminating in reviews with and approval by senior management. Notably, the Corporation does not use specific quantitative reserve targets to determine compensation. Key features of the estimation process are covered in Disclosure of Reserves in Item 2.

Oil and natural gas reserves include both proved and unproved reserves.

- Proved oil and natural gas reserves are determined in accordance with Securities and Exchange Commission (SEC) requirements. Proved reserves are those quantities of oil and natu which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible under existing economic and operating conditi government regulations. Proved reserves are determined using the average of first-of-month oil and natural gas prices during the reporting year.

  Proved reserves can be further subdivided into developed and undeveloped reserves. Proved developed reserves include amounts which are expected to be recovered through existin with existing equipment and operating methods. Proved undeveloped reserves include amounts expected to be recovered from new wells on undrilled proved acreage or from existin where a relatively major expenditure is required for completion. Proved undeveloped reserves are recognized only if a development plan has been adopted indicating that the reser scheduled to be drilled within five years, unless specific circumstances support a longer period of time.

  The percentage of proved developed reserves was 69 percent of total proved reserves at year-end 2016 (including both consolidated and equity company reserves), a reduction f percent in 2015, and has been over 60 percent for the last ten years. Although the Corporation is reasonably certain that proved reserves will be produced, the timing and amount re can be affected by a number of factors including completion of development projects, reservoir performance, regulatory approvals and significant changes in long-term oil and natu prices.

- Unproved reserves are quantities of oil and natural gas with less than reasonable certainty of recoverability and include probable reserves. Probable reserves are reserves that, togeth proved reserves, are as likely as not to be recovered.

Revisions in previously estimated volumes of proved reserves for existing fields can occur due to the evaluation or re-evaluation of (1) already available geologic, reservoir or productio (2) new geologic, reservoir or production data or (3) changes in the average of first-of-month oil and natural gas prices and / or costs that are used in the estimation of reserves. Revisions can also result from significant changes in development stra production equipment and facility capacity.

As a result of very low prices during 2016, under the SEC definition of proved reserves, certain quantities of oil and natural gas that qualified as proved reserves in prior years did not qu proved reserves at year-end 2016. Amounts no longer qualifying as proved reserves include the entire 3.5 billion barrels of bitumen at Kearl, in Canada. In addition, 0.8 billion barrel equivalent across the remainder of North America no longer qualify as proved reserves mainly due to the acceleration of the projected end-of-field-life. Among the factors that would r these amounts being recognized again as proved reserves at some point in the future are a recovery in average price levels, a further decline in costs, and / or operating efficiencies. Under th of certain contractual arrangements or government royalty regimes, lower prices can also increase proved reserves attributable to ExxonMobil. We do not expect the downward revision of r proved reserves under SEC definitions to affect the operation of the underlying projects or to alter our outlook for future production volumes.

Supplemental information regarding oil and natural gas results of operations, capitalized costs and reserves is provided following the notes to consolidated financial statements.

Unit-of-Production Depreciation

Oil and natural gas reserve quantities are used as the basis to calculate unit-of-production depreciation rates for most upstream assets. Depreciation is calculated by taking the ratio of asset total proved reserves or proved developed reserves applied to actual production. The volumes produced and asset cost are known, while proved reserves are based on estimates that are su some variability.

In the event that the unit-of-production method does not result in an equitable allocation of cost over the economic life of an upstream asset, an alternative method is used. The straight-line is used in limited situations where the expected life of the asset does not reasonably correlate with that of the underlying reserves. For example, certain assets used in the production of natural gas have a shorter life than the reserves, and as such, the Corporation uses straight-line depreciation to ensure the asset is fully depreciated by the end of its useful life.

To the extent that proved reserves for a property are entirely de-booked and that property continues to produce, assets will be depreciated using a unit-of-production method based on r determined at the most recent SEC price which results in a quantity of proved reserves greater than zero, appropriately adjusted for production and technical changes. The effect of this ap on the Corporation's 2017 depreciation expense versus 2016 is anticipated to be immaterial.

Impairment

The Corporation tests assets or groups of assets for recoverability whenever events or circumstances indicate that the carrying amounts may not be recoverable. Among the events or cha circumstances which could indicate that the carrying value of an asset or asset group may not be recoverable are the following:

- a significant decrease in the market price of a long-lived asset;
- a significant adverse change in the extent or manner in which an asset is being used or in its physical condition including a significant decrease in current and projected reserve volum
- a significant adverse change in legal factors or in the business climate that could affect the value, including an adverse action or assessment by a regulator;
- an accumulation of project costs significantly in excess of the amount originally expected;
- a current-period operating loss combined with a history and forecast of operating or cash flow losses; and
- a current expectation that, more likely than not, a long-lived asset will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

The Corporation performs asset valuation analyses on an ongoing basis as a part of its asset management program. These analyses and other profitability reviews assist the Corporation in as whether the carrying amounts of any of its assets may not be recoverable.

In general, the Corporation does not view temporarily low prices or margins as an indication of impairment. Management does not believe that lower prices are sustainable if energy delivered with supply security to meet global demand over the long term. Although prices will occasionally drop significantly, industry prices over the long term will continue to be dr market supply and demand. On the supply side, industry production from mature fields is declining, but this is being offset by production from new discoveries and field developments. production policies also have an impact on world oil supplies. The demand side is largely a function of global economic growth. Because the lifespans of the vast majority of the Corpo major assets are measured in decades, the value of these assets is predominantly based on long-term views of future commodity prices and production costs. During the lifespan of these major assets, the Corporation expects that oil and gas prices will experience significant volatility, and consequently these assets will exp periods of higher earnings and periods of lower earnings, or even losses. In assessing whether the events or changes in circumstances indicate the carrying value of an asset may not be reco the Corporation considers recent periods of operating losses in the context of its longer-term view of prices. While near-term prices are subject to wide fluctuations, longer-term price vi more stable and meaningful for purposes of assessing future cash flows.

When the industry experiences a prolonged and deep reduction in commodity prices, the market supply and demand conditions may result in changes to the Corporation's long-term p margin assumptions it uses for its capital investment decisions. To the extent those changes result in a significant reduction in the mid-point of its long-term oil, natural gas price or margin the Corporation may consider that situation, in conjunction with other events and changes in circumstances such as a history of operating losses, an indicator of potential impairment for assets.

In the Upstream, the standardized measure of discounted cash flows included in the Supplemental Information on Oil and Gas Exploration and Production Activities is required to use price on the average of first-of-month prices. These prices represent discrete points in time and could be higher or lower than the Corporation's long-term price assumptions which are u impairment assessments. The Corporation believes the standardized measure does not provide a reliable estimate of the expected future cash flows to be obtained from the developm production of its oil and gas properties or of the value of its oil and gas reserves and therefore does not consider it relevant in determining whether events or changes in circumstances indi need for an impairment assessment.

If events or circumstances indicate that the carrying value may not be recoverable, the Corporation estimates the future undiscounted cash flows of the affected properties to ju recoverability of carrying amounts. In performing this assessment, assets are grouped at the lowest level for which there are identifiable cash flows that are largely independent of the cash f other groups of assets. Cash flows used in recoverability assessments are based on the Corporation's assumptions which are developed in the annual planning and budgeting process, consistent with the criteria management uses to evaluate investment opportunities. These evaluations make use of the Corporation's assumptions of future crude oil and natural gas com prices, refining and chemical margins, volumes, costs, and foreign currency exchange rates. Volumes are based on projected field and facility production profiles, throughput, or sales. unproved reserves exist, an appropriately risk-adjusted amount of these reserves may be included in the evaluation. Cash flow estimates for impairment testing exclude the effects of de instruments.

An asset group is impaired if its undiscounted cash flows are less than the asset's carrying value. Impairments are measured by the amount by which the carrying value exceeds fair val value is based on market prices if an active market exists for the asset group, or discounted cash flows using a discount rate commensurate with the risk. Significant unproved proper assessed for impairment individually, and valuation allowances against the capitalized costs are recorded based on the estimated economic chance of success and the length of time t Corporation expects to hold the properties. Properties that are not individually significant are aggregated by groups and amortized based on development risk and average holding period.

Continued weakness in the upstream industry environment during 2016, continued weak financial results for several assets in North America, and a reduction in the mid-point of the range Corporation's long-term oil and natural gas prices developed as part of its annual planning and budgeting cycle led the Corporation to conclude that the facts and circumstances su performing an impairment assessment of certain long-lived assets, notably North America natural gas assets and certain other assets across the remainder of its Upstream operatio assessment reflected long-term crude and natural gas prices which are consistent with the mid-point of the ranges that management uses to evaluate investment opportunities and which ar range of long-term price forecasts published by third-party industry experts and government agencies. This assessment indicated that the vast majority of asset groups have future undis cash flow estimates exceeding carrying values. However, the carrying values for certain asset groups in the United States exceeded the estimated cash flows. As a result, the Corporation's quarter 2016 results include an after-tax charge of $2 billion to reduce the carrying value of those assets to fair value. The asset groups subject to this impairment charge are primarily operations in the Rocky Mountains region of the United States with large undeveloped acreage positions.

The assessment of fair values required the use of Level 3 inputs. The principal parameters used to establish fair values included estimates of both proved and unproved reserves, future com prices which were consistent with the average of third-party industry experts and government agencies, drilling and development costs, discount rates ranging from 5.5 percent to 8 depending on the characteristics of the asset group, and comparable market transactions. Due to the inherent difficulty in predicting future commodity prices, and the relationship between i prices and costs, it is not practicable to reasonably estimate the existence or range of any potential future impairment charges related to the Corporation's long-lived assets.

Inventories

Crude oil, products and merchandise inventories are carried at the lower of current market value or cost (generally determined under the last-in, first-out method – LIFO).

Asset Retirement Obligations

The Corporation incurs retirement obligations for certain assets. The fair values of these obligations are recorded as liabilities on a discounted basis, which is typically at the time the as installed. In the estimation of fair value, the Corporation uses assumptions and judgments regarding such factors as the existence of a legal obligation for an asset retirement obligation; te assessments of the assets; estimated amounts and timing of settlements; discount rates; and inflation rates. Asset retirement obligations are disclosed in Note 9 to the financial statements.

Suspended Exploratory Well Costs

The Corporation continues capitalization of exploratory well costs when the well has found a sufficient quantity of reserves to justify its completion as a producing well and the Corpor making sufficient progress assessing the reserves and the economic and operating viability of the project. Exploratory well costs not meeting these criteria are charged to expense. The fa circumstances that support continued capitalization of suspended wells at year-end are disclosed in Note 10 to the financial statements.

Consolidations

The Consolidated Financial Statements include the accounts of those subsidiaries that the Corporation controls. They also include the Corporation’s share of the undivided interest in Upstream assets, liabilities, revenues and expenses. Amounts representing the Corporation’s interest in the underlying net assets of other significant entities that it does not control, but ove it exercises significant influence, are accounted for using the equity method of accounting.

Investments in companies that are partially owned by the Corporation are integral to the Corporation’s operations. In some cases they serve to balance worldwide risks, and in others they the only available means of entry into a particular market or area of interest. The other parties, who also have an equity interest in these companies, are either independent third parties governments that share in the business results according to their ownership. The Corporation does not invest in these companies in order to remove liabilities from its balance sheet. In f Corporation has long been on record supporting an alternative accounting method that would require each investor to consolidate its share of all assets and liabilities in these partially companies rather than only its interest in net equity. This method of accounting for investments in partially-owned companies is not permitted by U.S. GAAP except where the investment the direct ownership of a share of upstream assets and liabilities. However, for purposes of calculating return on average capital employed, which is not covered by U.S. GAAP standa Corporation includes its share of debt of these partially-owned companies in the determination of average capital employed.

Pension Benefits

The Corporation and its affiliates sponsor nearly 100 defined benefit (pension) plans in over 40 countries. The Pension and Other Postretirement Benefits footnote (Note 17) provides de pension obligations, fund assets and pension expense.

Some of these plans (primarily non-U.S.) provide pension benefits that are paid directly by their sponsoring affiliates out of corporate cash flow rather than a separate pension fund b applicable tax rules and regulatory practices do not encourage advance funding. Book reserves are established for these plans. The portion of the pension cost attributable to employee se expensed as services are rendered. The portion attributable to the increase in pension obligations due to the passage of time is expensed over the term of the obligations, which ends w benefits are paid. The primary difference in pension expense for unfunded versus funded plans is that pension expense for funded plans also includes a credit for the expected long-term re fund assets.

For funded plans, including those in the U.S., pension obligations are financed in advance through segregated assets or insurance arrangements. These plans are managed in compliance w requirements of governmental authorities and meet or exceed required funding levels as measured by relevant actuarial and government standards at the mandated measurement d determining liabilities and required contributions, these standards often require approaches and assumptions that differ from those used for accounting purposes.

The Corporation will continue to make contributions to these funded plans as necessary. All defined-benefit pension obligations, regardless of the funding status of the underlying plans, a supported by the financial strength of the Corporation or the respective sponsoring affiliate.

Pension accounting requires explicit assumptions regarding, among others, the long-term expected earnings rate on fund assets, the discount rate for the benefit obligations and the long-te for future salary increases. Pension assumptions are reviewed annually by outside actuaries and senior management. These assumptions are adjusted as appropriate to reflect changes in rates and outlook. The long-term expected earnings rate on U.S. pension plan assets in 2016 was 6.50 percent. The 10-year and 20-year actual returns on U.S. pension plan assets were 5 and 8 percent, respectively. The Corporation establishes the long-term expected rate of return by developing a forward-looking, long-term return assumption for each pension fund asse taking into account factors such as the expected real return for the specific asset class and inflation. A single, long-term rate of return is then calculated as the weighted average of the targ allocation percentages and the long-term return assumption for each asset class. A worldwide reduction of 0.5 percent in the long-term rate of return on assets would increase annual expense by approximately $160 million before tax.

Differences between actual returns on fund assets and the long-term expected return are not recognized in pension expense in the year that the difference occurs. Such differences are d along with other actuarial gains and losses, and are amortized into pension expense over the expected remaining service life of employees.

Litigation Contingencies

A variety of claims have been made against the Corporation and certain of its consolidated subsidiaries in a number of pending lawsuits. Management has regular litigation reviews, in updates from corporate and outside counsel, to assess the need for accounting recognition or disclosure of these contingencies. The status of significant claims is summarized in Note 16.

The Corporation accrues an undiscounted liability for those contingencies where the incurrence of a loss is probable, and the amount can be reasonably estimated. These amounts are not by amounts that may be recovered under insurance or claims against third parties, but undiscounted receivables from insurers or other third parties may be accrued separately. The Corp revises such accruals in light of new information. For contingencies where an unfavorable outcome is reasonably possible and which are significant, the Corporation discloses the natur contingency and, where feasible, an estimate of the possible loss. For purposes of our litigation contingency disclosures, "significant" includes material matters as well as other items management believes should be disclosed.

Management judgment is required related to contingent liabilities and the outcome of litigation because both are difficult to predict. However, the Corporation has been successful in de litigation in the past. Payments have not had a material adverse effect on operations or financial condition. In the Corporation's experience, large claims often do not result in large awards awards are often reversed or substantially reduced as a result of appeal or settlement.

Tax Contingencies

The Corporation is subject to income taxation in many jurisdictions around the world. Significant management judgment is required in the accounting for income tax contingencies disputes because the outcomes are often difficult to predict.

The benefits of uncertain tax positions that the Corporation has taken or expects to take in its income tax returns are recognized in the financial statements if management concludes that it likely than not that the position will be sustained with the tax authorities. For a position that is likely to be sustained, the benefit recognized in the financial statements is measured at the amount that is greater than 50 percent likely of being realized. A reserve is established for the difference between a position taken or expected to be taken in an income tax return and the recognized in the financial statements. The Corporation's unrecognized tax benefits and a description of open tax years are summarized in Note 19.

Foreign Currency Translation

The method of translating the foreign currency financial statements of the Corporation's international subsidiaries into U.S. dollars is prescribed by GAAP. Under these principles, it is nece select the functional currency of these subsidiaries. The functional currency is the currency of the primary economic environment in which the subsidiary operates. Management sel functional currency after evaluating this economic environment.

Factors considered by management when determining the functional currency for a subsidiary include the currency used for cash flows related to individual assets and liabiliti responsiveness of sales prices to changes in exchange rates; the history of inflation in the country; whether sales are into local markets or exported; the currency used to acquire raw m labor, services and supplies; sources of financing; and significance of intercompany transactions.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management, including the Corporation's Chief Executive Officer, Principal Financial Officer, and Principal Accounting Officer, is responsible for establishing and maintaining adequate control over the Corporation's financial reporting. Management conducted an evaluation of the effectiveness of internal control over financial reporting based on criteria established in *Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that Exxo Corporation's internal control over financial reporting was effective as of December 31, 2016.

PricewaterhouseCoopers LLP, an independent registered public accounting firm, audited the effectiveness of the Corporation's internal control over financial reporting as of December 31, stated in their report included in the Financial Section of this report.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements and the supporting and supplemental material are the responsibility of the management of Exxon Mobil Corporation.

The Corporation's principal business is energy, involving the worldwide exploration, production, transportation and sale of crude oil and natural gas (Upstream) and the manu transportation and sale of petroleum products (Downstream). The Corporation is also a major worldwide manufacturer and marketer of petrochemicals (Chemical).

The preparation of financial statements in conformity with U.S. Generally Accepted Accounting Principles (GAAP) requires management to make estimates that affect the reported amo assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. Actual results could differ from these estimates. Prior years' data has been reclassified in cases to conform to the 2016 presentation basis.

1. Summary of Accounting Policies

Principles of Consolidation

The Consolidated Financial Statements include the accounts of subsidiaries the Corporation controls. They also include the Corporation's share of the undivided interest in certain upstream liabilities, revenues and expenses.

Amounts representing the Corporation's interest in entities that it does not control, but over which it exercises significant influence, are included in "Investments, advances and lo receivables". The Corporation's share of the net income of these companies is included in the Consolidated Statement of Income caption "Income from equity affiliates".

Majority ownership is normally the indicator of control that is the basis on which subsidiaries are consolidated. However, certain factors may indicate that a majority-owned investmen controlled and therefore should be accounted for using the equity method of accounting. These factors occur where the minority shareholders are granted by law or by contract subs participating rights. These include the right to approve operating policies, expense budgets, financing and investment plans, and management compensation and succession plans.

Evidence of loss in value that might indicate impairment of investments in companies accounted for on the equity method is assessed to determine if such evidence represents a loss in valu Corporation's investment that is other than temporary. Examples of key indicators include a history of operating losses, negative earnings and cash flow outlook, significant downward revi oil and gas reserves, and the financial condition and prospects for the investee's business segment or geographic region. If evidence of an other than temporary loss in fair value below c amount is determined, an impairment is recognized. In the absence of market prices for the investment, discounted cash flows are used to assess fair value.

The Corporation's share of the cumulative foreign exchange translation adjustment for equity method investments is reported in Accumulated Other Comprehensive Income.

Revenue Recognition

The Corporation generally sells crude oil, natural gas and petroleum and chemical products under short-term agreements at prevailing market prices. In some cases (e.g., natural gas), produ be sold under long-term agreements, with periodic price adjustments. Revenues are recognized when the products are delivered, which occurs when the customer has taken title and has a the risks and rewards of ownership, prices are fixed or determinable and collectibility is reasonably assured.

Revenues from the production of natural gas properties in which the Corporation has an interest with other producers are recognized on the basis of the Corporation's net working i Differences between actual production and net working interest volumes are not significant.

Purchases and sales of inventory with the same counterparty that are entered into in contemplation of one another are combined and recorded as exchanges measured at the book value of t sold.

Sales-Based Taxes

The Corporation reports sales, excise and value-added taxes on sales transactions on a gross basis in the Consolidated Statement of Income (included in both revenues and costs).

Derivative Instruments

The Corporation makes limited use of derivative instruments. The Corporation does not engage in speculative derivative activities or derivative trading activities, nor does it use derivativ leveraged features. When the Corporation does enter into derivative transactions, it is to offset exposures associated with interest rates, foreign currency exchange rates and hydrocarbon pri arise from existing assets, liabilities and forecasted transactions.

The gains and losses resulting from changes in the fair value of derivatives are recorded in income. In some cases, the Corporation designates derivatives as fair value hedges, in which c
gains and losses are offset in income by the gains and losses arising from changes in the fair value of the underlying hedged item.

Fair Value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Hierarchy Levels 1, 2 and 3 are terms
priority of inputs to valuation techniques used to measure fair value. Hierarchy Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Hierarchy Level 2 inp
inputs other than quoted prices included within Level 1 that are directly or indirectly observable for the asset or liability. Hierarchy Level 3 inputs are inputs that are not observable in the ma

Inventories

Crude oil, products and merchandise inventories are carried at the lower of current market value or cost (generally determined under the last-in, first-out method – LIFO). Inventory costs
expenditures and other charges (including depreciation) directly and indirectly incurred in bringing the inventory to its existing condition and location. Selling expenses and gene
administrative expenses are reported as period costs and excluded from inventory cost. Inventories of materials and supplies are valued at cost or less.

Property, Plant and Equipment

Cost Basis. The Corporation uses the "successful efforts" method to account for its exploration and production activities. Under this method, costs are accumulated on a field-by-field basis
incurred to purchase, lease, or otherwise acquire a property (whether unproved or proved) are capitalized when incurred. Exploratory well costs are carried as an asset when the well has
sufficient quantity of reserves to justify its completion as a producing well and where the Corporation is making sufficient progress assessing the reserves and the economic and operating v
of the project. Exploratory well costs not meeting these criteria are charged to expense. Other exploratory expenditures, including geophysical costs and annual lease rentals, are expe
incurred. Development costs, including costs of productive wells and development dry holes, are capitalized.

Depreciation, Depletion and Amortization. Depreciation, depletion and amortization are primarily determined under either the unit-of-production method or the straight-line method, w
based on estimated asset service life taking obsolescence into consideration.

Acquisition costs of proved properties are amortized using a unit-of-production method, computed on the basis of total proved oil and gas reserves. Capitalized exploratory drilli
development costs associated with productive depletable extractive properties are amortized using the unit-of-production rates based on the amount of proved developed reserves of oil and g
are estimated to be recoverable from existing facilities using current operating methods. Under the unit-of-production method, oil and gas volumes are considered produced once they hav
measured through meters at custody transfer or sales transaction points at the outlet valve on the lease or field storage tank. In the event that the unit-of-production method does not resu
equitable allocation of cost over the economic life of an upstream asset, an alternative method is used. The straight-line method is used in limited situations where the expected life of th
does not reasonably correlate with that of the underlying reserves. For example, certain assets used in the production of oil and natural gas have a shorter life than the reserves, and as su
Corporation uses straight-line depreciation to ensure the asset is fully depreciated by the end of its useful life.

Under the SEC definition of proved reserves, certain quantities of oil and natural gas did not qualify as proved reserves at year-end 2016, the substantial majority of which relates to the K
sands operation, where no proved reserves remain. To the extent that proved reserves for a property are entirely de-booked and that property continues to produce, assets will be depreciate
a unit-of-production method based on reserves determined at the most recent SEC price which results in a quantity of proved reserves greater than zero, appropriately adjusted for product
technical changes.

Investments in refinery, chemical process, and lubes basestock manufacturing equipment are generally depreciated on a straight-line basis over a 25-year life. Service station buildings ar
improvements generally are depreciated over a 20-year life. Maintenance and repairs, including planned major maintenance, are expensed as incurred. Major renewals and improveme
capitalized and the assets replaced are retired.

Impairment Assessment. The Corporation tests assets or groups of assets for recoverability whenever events or circumstances indicate that the carrying amounts may not be recoverable. the events or changes in circumstances which could indicate that the carrying value of an asset or asset group may not be recoverable are the following:

- a significant decrease in the market price of a long-lived asset;
- a significant adverse change in the extent or manner in which an asset is being used or in its physical condition including a significant decrease in current and projected reserve volum
- a significant adverse change in legal factors or in the business climate that could affect the value, including an adverse action or assessment by a regulator;
- an accumulation of project costs significantly in excess of the amount originally expected;
- a current-period operating loss combined with a history and forecast of operating or cash flow losses; and
- a current expectation that, more likely than not, a long-lived asset will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

The Corporation performs asset valuation analyses on an ongoing basis as a part of its asset management program. These analyses and other profitability reviews assist the Corporation in as whether the carrying amounts of any of its assets may not be recoverable.

In general, the Corporation does not view temporarily low prices or margins as an indication of impairment. Management does not believe that lower prices are sustainable if energy delivered with supply security to meet global demand over the long term. Although prices will occasionally drop significantly, industry prices over the long term will continue to be dr market supply and demand. On the supply side, industry production from mature fields is declining, but this is being offset by production from new discoveries and field developments. production policies also have an impact on world oil supplies. The demand side is largely a function of global economic growth. Because the lifespans of the vast majority of the Corpo major assets are measured in decades, the value of these assets is predominantly based on long-term views of future commodity prices and production costs. During the lifespan of thes assets, the Corporation expects that oil and gas prices will experience significant volatility, and consequently these assets will experience periods of higher earnings and periods of lower ea or even losses. In assessing whether the events or changes in circumstances indicate the carrying value of an asset may not be recoverable, the Corporation considers recent periods of op losses in the context of its longer-term view of prices. While near-term prices are subject to wide fluctuations, longer term price views are more stable and meaningful for purposes of as future cash flows.

When the industry experiences a prolonged and deep reduction in commodity prices, the market supply and demand conditions may result in changes to the Corporation's long-term p margin assumptions it uses for its capital investment decisions. To the extent those changes result in a significant reduction in the mid-point of its long-term oil, natural gas price or margin the Corporation may consider that situation, in conjunction with other events and changes in circumstances such as a history of operating losses, an indicator of potential impairment for assets.

In the Upstream, the standardized measure of discounted cash flows included in the Supplemental Information on Oil and Gas Exploration and Production activities is required to use price on the average of first-of-month prices. These prices represent discrete points in time and could be higher or lower than the Corporation's long-term price assumptions which are u impairment assessments. The Corporation believes the standardized measure does not provide a reliable estimate of the expected future cash flows to be obtained from the developm production of its oil and gas properties or of the value of its oil and gas reserves and therefore does not consider it relevant in determining whether events or changes in circumstances indi need for an impairment assessment.

If events or circumstances indicate that the carrying value may not be recoverable, the Corporation estimates the future undiscounted cash flows of the affected properties to ju recoverability of carrying amounts. In performing this assessment, assets are grouped at the lowest level for which there are identifiable cash flows that are largely independent of the cash f other groups of assets. Cash flows used in recoverability assessments are based on the Corporation's assumptions which are developed in the annual planning and budgeting process, consistent with the criteria management uses to evaluate investment opportunities. These evaluations make use of the Corporation's assumptions of future crude oil and natural gas com prices, refining and chemical margins, volumes, costs, and foreign currency exchange rates. Volumes are based on projected field and facility production profiles, throughput, or sales. unproved reserves exist, an appropriately risk-adjusted amount of these reserves may be included in the evaluation. Cash flow estimates for impairment testing exclude the effects of de instruments.

An asset group is impaired if its undiscounted cash flows are less than the asset's carrying value. Impairments are measured by the amount by which the carrying value exceeds fair val value is based on market prices if an active market exists for the asset group, or discounted cash flows using a discount rate commensurate with the risk. Significant unproved proper assessed for impairment individually, and valuation allowances against the capitalized costs are recorded based on the estimated economic chance of success and the length of time that the Corporation expects to hold the properties. Properties that are not individually significant are aggregated by groups and amortize on development risk and average holding period.

Other. Gains on sales of proved and unproved properties are only recognized when there is neither uncertainty about the recovery of costs applicable to any interest retained nor any sub obligation for future performance by the Corporation. Losses on properties sold are recognized when incurred or when the properties are held for sale and the fair value of the properties than the carrying value.

Interest costs incurred to finance expenditures during the construction phase of multiyear projects are capitalized as part of the historical cost of acquiring the constructed assets. The construction phase commences with the development of the detailed engineering design and ends when the constructed assets are ready for their intended use. Capitalized interest c included in property, plant and equipment and are depreciated over the service life of the related assets.

Asset Retirement Obligations and Environmental Liabilities

The Corporation incurs retirement obligations for certain assets. The fair values of these obligations are recorded as liabilities on a discounted basis, which is typically at the time the as installed. The costs associated with these liabilities are capitalized as part of the related assets and depreciated. Over time, the liabilities are accreted for the change in their present value.

Liabilities for environmental costs are recorded when it is probable that obligations have been incurred and the amounts can be reasonably estimated. These liabilities are not reduced by p recoveries from third parties, and projected cash expenditures are not discounted.

Foreign Currency Translation

The Corporation selects the functional reporting currency for its international subsidiaries based on the currency of the primary economic environment in which each subsidiary operates.

Downstream and Chemical operations primarily use the local currency. However, the U.S. dollar is used in countries with a history of high inflation (primarily in Latin America) and Sin which predominantly sells into the U.S. dollar export market. Upstream operations which are relatively self-contained and integrated within a particular country, such as Canada, the Kingdom, Norway and continental Europe, use the local currency. Some Upstream operations, primarily in Asia and Africa, use the U.S. dollar because they predominantly sell crude and gas production into U.S. dollar-denominated markets.

For all operations, gains or losses from remeasuring foreign currency transactions into the functional currency are included in income.

Stock-Based Payments

The Corporation awards stock-based compensation to employees in the form of restricted stock and restricted stock units. Compensation expense is measured by the price of the stock at the grant and is recognized in income over the requisite service period.

2. Accounting Changes

In May 2014, the Financial Accounting Standards Board issued a new standard, *Revenue from Contracts with Customers*. The standard establishes a single revenue recognition model contracts with customers, eliminates industry specific requirements, and expands disclosure requirements. The standard is required to be adopted beginning January 1, 2018. "Sales an Operating Revenue" on the Consolidated Statement of Income includes sales, excise and value-added taxes on sales transactions. When the Corporation adopts the standard, revenue will sales-based taxes collected on behalf of third parties. This change in reporting will not impact earnings. The Corporation expects to adopt the standard using the Modified Retrospective under which prior years' results are not restated, but supplemental information on the impact of the new standard is provided for 2018 results. The Corporation continues to evaluate other the standard which are not expected to have a material effect on the Corporation's financial statements.

In February 2016, the Financial Accounting Standards Board issued a new standard, *Leases*. The standard requires that all leases with an initial term greater than one year be recorded balance sheet as a lease asset and a lease liability. The standard is required to be adopted beginning January 1, 2019, with early adoption permitted. ExxonMobil is evaluating the standard effect on the Corporation's financial statements and plans to adopt it in 2019.

Effective September 30, 2016, the Corporation early-adopted Accounting Standard Update no. 2015-17 *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes* on a pros basis. This update eliminates the requirement to classify deferred tax assets and liabilities as current and noncurrent, and instead requires all deferred tax assets and liabilities to be class noncurrent. See Note 19.

3. Miscellaneous Financial Information

Research and development expenses totaled $1,058 million in 2016, $1,008 million in 2015 and $971 million in 2014.

Net income included before-tax aggregate foreign exchange transaction gains of $29 million in 2016, and losses of $119 million in 2015 and $225 million in 2014, respectively.

In 2016, 2015 and 2014, net income included losses of $295 million and $186 million, and a gain of $187 million, respectively, attributable to the combined effects of LIFO in accumulations and drawdowns. The aggregate replacement cost of inventories was estimated to exceed their LIFO carrying values by $8.1 billion and $4.5 billion at December 31, 2016, an respectively.

Crude oil, products and merchandise as of year-end 2016 and 2015 consist of the following:

	2016
	(billions of dollars)
Crude oil	3.9
Petroleum products	3.7
Chemical products	2.8
Gas/other	0.5
Total	10.9

5. Cash Flow Information

The Consolidated Statement of Cash Flows provides information about changes in cash and cash equivalents. Highly liquid investments with maturities of three months or less when acqu classified as cash equivalents.

For 2016, the "Net (gain) on asset sales" on the Consolidated Statement of Cash Flows includes before-tax amounts from the sale of service stations in Canada, the sale of Upstream prop the U.S., and the sale of aviation fueling operations across multiple countries. For 2015, the number includes before-tax amounts from the sale of service stations in Europe, the sale of U properties in the U.S., the sale of ExxonMobil's interests in Chemical and Refining joint ventures, and the sale of the Torrance refinery. For 2014, the number includes before-tax gains f sale of Hong Kong power operations, additional proceeds related to the 2013 sale of a partial interest in Iraq, the sale of Downstream affiliates in the Caribbean and the sale or exch Upstream properties in the U.S., Canada, and Malaysia. These net gains are reported in "Other income" on the Consolidated Statement of Income.

In 2016, the "Additions/(reductions) in commercial paper, and debt with three months or less maturity" on the Consolidated Statement of Cash Flows includes a net $608 million add commercial paper with maturity over three months. The gross amount issued was $3.9 billion, while the gross amount repaid was $3.3 billion. In 2015, the number includes a net $358 addition of commercial paper with maturity over three months. The gross amount issued was $8.1 billion, while the gross amount repaid was $7.7 billion.

In 2015, ExxonMobil completed an asset exchange that resulted in value received of approximately $500 million including $100 million in cash. The non-cash portion was not include "Sales of subsidiaries, investments, and property, plant and equipment" or the "All other items-net" lines on the Statement of Cash Flows. Capital leases of approximately $1 billion w included in the "Additions to long-term debt" or "Additions to property, plant and equipment" lines on the Statement of Cash Flows.

In 2014, ExxonMobil completed asset exchanges, primarily non-cash transactions, of approximately $1.2 billion. This amount is not included in the "Sales of subsidiaries, investme property, plant and equipment" or the "Additions to property, plant and equipment" lines on the Statement of Cash Flows.

	2016	2015	2
		(millions of dollars)	
Cash payments for interest	818	586	
Cash payments for income taxes	4,214	7,269	

6. Additional Working Capital Information

	Dec. 31 2016	De 2
	(millions of dollars)	
Notes and accounts receivable		
Trade, less reserves of $75 million and $107 million	16,033	
Other, less reserves of $627 million and $4 million	5,361	
Total	21,394	
Notes and loans payable		
Bank loans	143	
Commercial paper	10,727	
Long-term debt due within one year	2,960	
Total	13,830	
Accounts payable and accrued liabilities		
Trade payables	17,801	
Payables to equity companies	4,748	
Accrued taxes other than income taxes	2,653	
Other	5,991	
Total	31,193	

The Corporation has short-term committed lines of credit of $5.5 billion which were unused as of December 31, 2016. These lines are available for general corporate purposes.

The weighted-average interest rate on short-term borrowings outstanding was 0.6 percent and 0.4 percent at December 31, 2016, and 2015, respectively.

7. Equity Company Information

The summarized financial information below includes amounts related to certain less-than-majority-owned companies and majority-owned subsidiaries where minority shareholders poss right to participate in significant management decisions (see Note 1). These companies are primarily engaged in oil and gas exploration and production, and natural gas marketing in America; natural gas exploration, production and distribution in Europe; and exploration, production, liquefied natural gas (LNG) operations, refining operations, petrochemical manufa and fuel sales in Asia and the Middle East. Also included are several refining, petrochemical manufacturing, and marketing ventures.

The Corporation's ownership in these ventures is in the form of shares in corporate joint ventures as well as interests in partnerships. Differences between the company's carrying valu equity investment and its underlying equity in the net assets of the affiliate are assigned to the extent practicable to specific assets and liabilities based on the company's analysis of the giving rise to the difference. The amortization of this difference, as appropriate, is included in "income from equity affiliates".

The share of total equity company revenues from sales to ExxonMobil consolidated companies was 14 percent, 15 percent and 14 percent in the years 2016, 2015 and 2014, respectively.

In 2013 and 2014, the Corporation and Rosneft established various entities to conduct exploration and research activities. Periods of disproportionate funding will result in the Corp recognizing, during the early phases of the projects, an investment that is larger than its equity share in these entities. These joint ventures are considered Variable Interest Entities. Howeve the Corporation is not the primary beneficiary of these entities, the joint ventures are reported as equity companies. In 2014, the European Union and United States imposed sanctions rel the Russian energy sector. With respect to the foregoing, each joint venture continues to comply with all applicable laws, rules, and regulations. The Corporation's maximum before-tax expo loss from these joint ventures as of December 31, 2016, is $1.0 billion.

	2016		2015		2014

Other	16,637	10,331	16,293	
Total	453,915	244,224	447,337	2

Continued weakness in the upstream industry environment during 2016, continued weak financial results for several assets in North America, and a reduction in the mid-point of the range Corporation's long-term oil and natural gas prices developed as part of its annual planning and budgeting cycle led the Corporation to conclude that the facts and circumstances su performing an impairment assessment of certain long-lived assets, notably North America natural gas assets and certain other assets across the remainder of its Upstream operatio assessment reflected long-term crude and natural gas prices which are consistent with the mid-point of the ranges that management uses to evaluate investment opportunities and which ar range of long-term price forecasts published by third-party industry experts and government agencies. This assessment indicated that the vast majority of asset groups have future undis cash flow estimates exceeding carrying values. However, the carrying values for certain asset groups in the United States exceeded the estimated cash flows. As a result, the Corporation' quarter 2016 results include a before-tax charge of $3.3 billion to reduce the carrying value of those assets to fair value. The asset groups subject to this impairment charge are primarily operations in the Rocky Mountains region of the United States with large undeveloped acreage positions. The impairment charge is recognized in the line "Depreciation and depletion" Consolidated Statement of Income and recorded in "Accumulated depreciation and depletion".

The assessment of fair values required the use of Level 3 inputs. The principal parameters used to establish fair values included estimates of both proved and unproved reserves, future com prices which were consistent with the average of third-party industry experts and government agencies, drilling and development costs, discount rates ranging from 5.5 percent to 8 depending on the characteristics of the asset group, and comparable market transactions. Due to the inherent difficulty in predicting future commodity prices, and the relationship between i prices and costs, it is not practicable to reasonably estimate the existence or range of any potential future impairment charges related to the Corporation's long-lived assets.

Accumulated depreciation and depletion totaled $209,691 million at the end of 2016 and $195,732 million at the end of 2015. Interest capitalized in 2016, 2015 and 2014 was $708 millio million and $344 million, respectively.

Asset Retirement Obligations

The Corporation incurs retirement obligations for certain assets. The fair values of these obligations are recorded as liabilities on a discounted basis, which is typically at the time the as installed. In the estimation of fair value, the Corporation uses assumptions and judgments regarding such factors as the existence of a legal obligation for an asset retirement obligation; te assessments of the assets; estimated amounts and timing of settlements; discount rates; and inflation rates. Asset retirement obligations incurred in the current period were Level 3 fai measurements. The costs associated with these liabilities are capitalized as part of the related assets and depreciated as the reserves are produced. Over time, the liabilities are accreted change in their present value.

Asset retirement obligations for downstream and chemical facilities generally become firm at the time the facilities are permanently shut down and dismantled. These obligations may incl costs of asset disposal and additional soil remediation. However, these sites have indeterminate lives based on plans for continued operations and as such, the fair value of the condition obligations cannot be measured, since it is impossible to estimate the future settlement dates of such obligations.

The following table summarizes the activity in the liability for asset retirement obligations:

	2016
	(millions of dollars)
Beginning balance	13,704
Accretion expense and other provisions	740
Reduction due to property sales	(134)
Payments made	(549)
Liabilities incurred	204
Foreign currency translation	(513)
Revisions	(209)
Ending balance	13,243

10. Accounting for Suspended Exploratory Well Costs

The Corporation continues capitalization of exploratory well costs when the well has found a sufficient quantity of reserves to justify its completion as a producing well and the Corpor making sufficient progress assessing the reserves and the economic and operating viability of the project. The term "project" as used in this report can refer to a variety of different activit does not necessarily have the same meaning as in any government payment transparency reports.

The following two tables provide details of the changes in the balance of suspended exploratory well costs as well as an aging summary of those costs.

Change in capitalized suspended exploratory well costs:

	2016	2015
		(millions of dollars)
Balance beginning at January 1	4,372	3,587
Additions pending the determination of proved reserves	180	847
Charged to expense	(111)	(5)
Reclassifications to wells, facilities and equipment based on the determination of proved reserves	-	(43)
Divestments/Other	36	(14)
Ending balance at December 31	4,477	4,372
Ending balance attributed to equity companies included above	707	696

Period end capitalized suspended exploratory well costs:

	2016	2015
		(millions of dollars)
Capitalized for a period of one year or less	180	847
Capitalized for a period of between one and five years	2,981	2,386
Capitalized for a period of between five and ten years	911	826
Capitalized for a period of greater than ten years	405	313
Capitalized for a period greater than one year - subtotal	4,297	3,525
Total	4,477	4,372

Exploration activity often involves drilling multiple wells, over a number of years, to fully evaluate a project. The table below provides a breakdown of the number of projects with sus exploratory well costs which had their first capitalized well drilled in the preceding 12 months and those that have had exploratory well costs capitalized for a period greater than 12 months includes the Rosneft joint venture exploration activity (refer to the relevant portion of Note 7).

	2016	2015
Number of projects with first capitalized well drilled in the preceding 12 months	2	4
Number of projects that have exploratory well costs capitalized for a period of greater than 12 months	58	55
Total	60	59

Of the 58 projects that have exploratory well costs capitalized for a period greater than 12 months as of December 31, 2016, 16 projects have drilling in the preceding 12 months or expl activity either planned in the next two years or subject to sanctions. The remaining 42 projects are those with completed exploratory activity progressing toward development.

The table below provides additional detail for those 42 projects, which total $1,998 million.

Country/Project	Dec. 31, 2016	Years Wells Drilled	Comment
	(millions of dollars)

11. Leased Facilities

At December 31, 2016, the Corporation and its consolidated subsidiaries held noncancelable operating charters and leases covering drilling equipment, tankers, service stations and other pr with minimum undiscounted lease commitments totaling $3,811 million as indicated in the table. Estimated related sublease rental income from noncancelable subleases totals $30 million.

	Lease Payments Under Minimum Commitments	
	Drilling Rigs and Related Equipment	**Other**
	(millions of dollars)	
2017	333	770
2018	153	529
2019	98	353
2020	87	239
2021	52	183
2022 and beyond	113	901
Total	836	2,975

Net rental cost under both cancelable and noncancelable operating leases incurred during 2016, 2015 and 2014 were as follows:

	2016	**2015**
	(millions of dollars)	
Rental cost		
Drilling rigs and related equipment	1,274	1,853
Other (net of sublease rental income)	1,817	2,076
Total	3,091	3,929

12. Earnings Per Share

Earnings per common share	**2016**	**2015**
Net income attributable to ExxonMobil *(millions of dollars)*	7,840	16,150
Weighted average number of common shares outstanding *(millions of shares)*	4,177	4,196
Earnings per common share *(dollars)* *(1)*	1.88	3.85
Dividends paid per common share *(dollars)*	2.98	2.88

(1) The earnings per common share and earnings per common share assuming dilution are the same in each period shown.

13. Financial Instruments and Derivatives

Financial Instruments. The fair value of financial instruments is determined by reference to observable market data and other valuation techniques as appropriate. The only category of fi instruments where the difference between fair value and recorded book value is notable is long-term debt. The estimated fair value of total long-term debt, excluding capitalized lease obli was $28.0 billion and $18.9 billion at December 31, 2016, and 2015, respectively, as compared to recorded book values of $27.7 billion and $18.7 billion at December 31, 2016, an respectively. The increase in the estimated fair value and book value of long-term debt reflects the Corporation's issuance of $12.0 billion of long-term debt in the first quarter of 2016.

The fair value of long-term debt by hierarchy level at December 31, 2016, is: Level 1 $27,825 million; Level 2 $137 million; and Level 3 $6 million.

Derivative Instruments. The Corporation's size, strong capital structure, geographic diversity and the complementary nature of the Upstream, Downstream and Chemical businesses red Corporation's enterprise-wide risk from changes in interest rates, currency rates and commodity prices. As a result, the Corporation makes limited use of derivatives to mitigate the impact changes. The Corporation does not engage in speculative derivative activities or derivative trading activities nor does it use derivatives with leveraged features. When the Corporation do into derivative transactions, it is to offset exposures associated with interest rates, foreign currency exchange rates and hydrocarbon prices that arise from existing assets, liabilities and for transactions.

The estimated fair value of derivative instruments outstanding and recorded on the balance sheet was a net liability of $22 million at year-end 2016 and a net asset of $21 million at year-en Assets and liabilities associated with derivatives are usually recorded either in "Other current assets" or "Accounts payable and accrued liabilities".

The Corporation's fair value measurement of its derivative instruments use either Level 1 or Level 2 inputs.

The Corporation recognized a before-tax gain or (loss) related to derivative instruments of $(81) million, $39 million and $110 million during 2016, 2015 and 2014, respectively. Income st effects associated with derivatives are usually recorded either in "Sales and other operating revenue" or "Crude oil and product purchases".

The Corporation believes there are no material market or credit risks to the Corporation's financial position, results of operations or liquidity as a result of the derivative activities described

14. Long-Term Debt

At December 31, 2016, long-term debt consisted of $28,257 million due in U.S. dollars and $675 million representing the U.S. dollar equivalent at year-end exchange rates of amounts pay foreign currencies. These amounts exclude that portion of long-term debt, totaling $2,960 million, which matures within one year and is included in current liabilities. The increase in th value of long-term debt reflects the Corporation's issuance of $12.0 billion of long-term debt in the first quarter of 2016. The amounts of long-term debt, including capitalized lease oblig maturing in each of the four years after December 31, 2017, in millions of dollars, are: 2018 – $4,737; 2019 – $3,886; 2020 – $1,609; and 2021 – $2,540. At December 31, 2016, the Corpo unused long-term credit lines were $0.3 billion.

Summarized long-term debt at year-end 2016 and 2015 are shown in the table below:

	Average Rate *(1)*	**2016**	**2015**

Total long-term debt		28,932	19,925

(1) Average effective interest rate for debt and average imputed interest rate for capital leases at December 31, 2016.
(2) Includes premiums of $138 million in 2016 and $179 million in 2015.
(3) Debt issuance costs at December 31, 2015 were $60 million and are not significant to the Corporation.

15. Incentive Program

The 2003 Incentive Program provides for grants of stock options, stock appreciation rights (SARs), restricted stock and other forms of award. Awards may be granted to eligible employee Corporation and those affiliates at least 50 percent owned. Outstanding awards are subject to certain forfeiture provisions contained in the program or award instrument. Options and SARs granted at prices not less than 100 percent of market value on the date of grant and have a maximum life of 10 years. The maximum number of shares of stock that may be issued under th Incentive Program is 220 million. Awards that are forfeited, expire or are settled in cash, do not count against this maximum limit. The 2003 Incentive Program does not have a specifie New awards may be made until the available shares are depleted, unless the Board terminates the plan early. At the end of 2016, remaining shares available for award under the 2003 In Program were 93 million.

Restricted Stock and Restricted Stock Units. Awards totaling 9,583 thousand, 9,681 thousand, and 9,775 thousand of restricted (nonvested) common stock units were granted in 2016, 20 2014, respectively. Compensation expense for these awards is based on the price of the stock at the date of grant and is recognized in income over the requisite service period. Shares fo awards are issued to employees from treasury stock. The units that are settled in cash are recorded as liabilities and their changes in fair value are recognized over the vesting period. Du applicable restricted periods, the shares and units may not be sold or transferred and are subject to forfeiture. The majority of the awards have graded vesting periods, with 50 percent of the and units in each award vesting after three years and the remaining 50 percent vesting after seven years. Awards granted to a small number of senior executives have vesting periods of fiv for 50 percent of the award and of 10 years or retirement, whichever occurs later, for the remaining 50 percent of the award.

The Corporation has purchased shares in the open market and through negotiated transactions to offset shares or units settled in shares issued in conjunction with benefit plans and pro Purchases may be discontinued at any time without prior notice.

The following tables summarize information about restricted stock and restricted stock units for the year ended December 31, 2016.

Restricted stock and units outstanding	**2016** **Shares**	 **Weighted Average Grant-Date Fair Value per Share**
	(thousands)	*(dollars)*
Issued and outstanding at January 1	44,063	84.85
2015 award issued in 2016	9,680	81.27
Vested	(9,816)	83.20
Forfeited	(94)	84.81
Issued and outstanding at December 31	43,833	84.43

Value of restricted stock and units	**2016**	**2015**
Grant price *(dollars)*	87.70	81.27
Value at date of grant:		*(millions of dollars)*
Restricted stock and units settled in stock	771	727
Units settled in cash	69	60
Total value	840	787

As of December 31, 2016, there was $2,197 million of unrecognized compensation cost related to the nonvested restricted awards. This cost is expected to be recognized over a weighted-a period of 4.5 years. The compensation cost charged against income for the restricted stock and restricted stock units was $880 million, $855 million and $831 million for 2016, 2015 an respectively. The income tax benefit recognized in income related to this compensation expense was $80 million, $78 million and $76 million for the same periods, respectively. The fair v shares and units vested in 2016, 2015 and 2014 was $851 million, $808 million and $946 million, respectively. Cash payments of $67 million, $64 million and $73 million for vested re stock units settled in cash were made in 2016, 2015 and 2014, respectively.

16. Litigation and Other Contingencies

Litigation. A variety of claims have been made against ExxonMobil and certain of its consolidated subsidiaries in a number of pending lawsuits. Management has regular litigation r including updates from corporate and outside counsel, to assess the need for accounting recognition or disclosure of these contingencies. The Corporation accrues an undiscounted liabi those contingencies where the incurrence of a loss is probable and the amount can be reasonably estimated. If a range of amounts can be reasonably estimated and no amount within the ra better estimate than any other amount, then the minimum of the range is accrued. The Corporation does not record liabilities when the likelihood that the liability has been incurred is proba the amount cannot be reasonably estimated or when the liability is believed to be only reasonably possible or remote. For contingencies where an unfavorable outcome is reasonably possi which are significant, the Corporation discloses the nature of the contingency and, where feasible, an estimate of the possible loss. For purposes of our contingency disclosures, "sign includes material matters, as well as other matters, which management believes should be disclosed. ExxonMobil will continue to defend itself vigorously in these matters. Base consideration of all relevant facts and circumstances, the Corporation does not believe the ultimate outcome of any currently pending lawsuit against ExxonMobil will have a material effect upon the Corporation's operations, financial condition, or financial statements taken as a whole.

Other Contingencies. The Corporation and certain of its consolidated subsidiaries were contingently liable at December 31, 2016, for guarantees relating to notes, loans and performanc contracts. Where guarantees for environmental remediation and other similar matters do not include a stated cap, the amounts reflect management's estimate of the maximum potential expo

(1) ExxonMobil share.

Additionally, the Corporation and its affiliates have numerous long-term sales and purchase commitments in their various business activities, all of which are expected to be fulfilled adverse consequences material to the Corporation's operations or financial condition.

In accordance with a nationalization decree issued by Venezuela's president in February 2007, by May 1, 2007, a subsidiary of the Venezuelan National Oil Company (PdVSA) assur operatorship of the Cerro Negro Heavy Oil Project. This Project had been operated and owned by ExxonMobil affiliates holding a 41.67 percent ownership interest in the Project. The dec required conversion of the Cerro Negro Project into a "mixed enterprise" and an increase in PdVSA's or one of its affiliate's ownership interest in the Project, with the stipulation ExxonMobil refused to accept the terms for the formation of the mixed enterprise within a specified period of time, the government would "directly assume the activities" carried out by t venture. ExxonMobil refused to accede to the terms proffered by the government, and on June 27, 2007, the government expropriated ExxonMobil's 41.67 percent interest in the Cerro Project.

On September 6, 2007, affiliates of ExxonMobil filed a Request for Arbitration with the International Centre for Settlement of Investment Disputes (ICSID). The ICSID Tribunal issued a d on June 10, 2010, finding that it had jurisdiction to proceed on the basis of the Netherlands-Venezuela Bilateral Investment Treaty. On October 9, 2014, the ICSID Tribunal issued its fina finding in favor of the ExxonMobil affiliates and awarding $1.6 billion as of the date of expropriation, June 27, 2007, and interest from that date at 3.25% compounded annually until the payment in full. The Tribunal also noted that one of the Cerro Negro Project agreements provides a mechanism to prevent double recovery between the ICSID award and all or part of an award of $908 million to an ExxonMobil affiliate, Mobil Cerro Negro, Ltd., against PdVSA and a PdVSA affiliate, PdVSA CN, in an arbitration under the rules of the International Cha Commerce.

On June 12, 2015, the Tribunal rejected in its entirety Venezuela's October 23, 2014, application to revise the ICSID award. The Tribunal also lifted the associated stay of enforcement t been entered upon the filing of the application to revise.

Still pending is Venezuela's February 2, 2015, application to ICSID seeking annulment of the ICSID award. That application alleges that, in issuing the ICSID award, the Tribunal excee powers, failed to state reasons on which the ICSID award was based, and departed from a fundamental rule of procedure. A separate stay of the ICSID award was entered following the f the annulment application. On July 7, 2015, the ICSID Committee considering the annulment application heard arguments from the parties on whether to lift the stay of the award associat that application. On July 28, 2015, the Committee issued an order that would lift the stay of enforcement unless, within 30 days, Venezuela delivered a commitment to pay the award if the application to annul is denied. On September 17, 2015, the Committee ruled that Venezuela had complied with the requirement to submit a written commitment to pay the award and so stay of enforcement in place. A hearing on Venezuela's application for annulment was held March 8-9, 2016.

The United States District Court for the Southern District of New York entered judgment on the ICSID award on October 10, 2014. Motions filed by Venezuela to vacate that judgm procedural grounds and to modify the judgment by reducing the rate of interest to be paid on the ICSID award from the entry of the court's judgment, until the date of payment, were de February 13, 2015, and March 4, 2015, respectively. On March 9, 2015, Venezuela filed a notice of appeal of the court's actions on the two motions. Oral arguments on this appeal we before the United States Court of Appeals for the Second Circuit on January 7, 2016.

The District Court's judgment on the ICSID award is currently stayed until such time as ICSID's stay of the award entered following Venezuela's filing of its application to annul has bee The net impact of these matters on the Corporation's consolidated financial results cannot be reasonably estimated. Regardless, the Corporation does not expect the resolution to have a r effect upon the Corporation's operations or financial condition.

An affiliate of ExxonMobil is one of the Contractors under a Production Sharing Contract (PSC) with the Nigerian National Petroleum Corporation (NNPC) covering the Erha block locate offshore waters of Nigeria. ExxonMobil's affiliate is the operator of the block and owns a 56.25 percent interest under the PSC. The Contractors are in dispute with NNPC regarding NNPC' of crude oil in excess of its entitlement under the terms of the PSC. In accordance with the terms of the PSC, the Contractors initiated arbitration in Abuja, Nigeria, under the Nigerian Arb and Conciliation Act. On October 24, 2011, a three-member arbitral Tribunal issued an award upholding the Contractors' position in all material respects and awarding damages to the Con jointly in an amount of approximately $1.8 billion plus $234 million in accrued interest. The Contractors petitioned a Nigerian federal court for enforcement of the award, and NNPC petitio same court to have the award set aside. On May 22, 2012, the court set aside the award. The Contractors appealed that judgment to the Court of Appeal, Abuja Judicial Division. On July 22 the Court of Appeal upheld the decision of the lower court setting aside the award. On October 21, 2016, the Contractors appealed the decision to the Supreme Court of Nigeria. In June 20 Contractors filed a lawsuit against NNPC in the Nigerian federal high court in order to preserve their ability to seek enforcement of the PSC in the courts if necessary. In October 20 Contractors filed suit in the United States District Court for the Southern District of New York to enforce, if necessary, the arbitration award against NNPC assets residing within that juris NNPC has moved to dismiss the lawsuit. The stay in the proceedings in the Southern District of New York has been lifted. At this time, the net impact of this matter on the Corpo consolidated financial results cannot be reasonably estimated. However, regardless of the outcome of enforcement proceedings, the Corporation does not expect the proceedings to have a r effect upon the Corporation's operations or financial condition.

17. Pension and Other Postretirement Benefits

The benefit obligations and plan assets associated with the Corporation's principal benefit plans are measured on December 31.

	Pension Benefits				Other Postretirement Benefits
	U.S.		Non-U.S.		
	2016	2015	2016	2015	2016
			(percent)		
Weighted-average assumptions used to determine benefit obligations at December 31					
Discount rate	4.25	4.25	3.00	3.60	4.25
Long-term rate of compensation increase	5.75	5.75	4.00	4.80	5.75
			(millions of dollars)		
Change in benefit obligation					
Benefit obligation at January 1	19,583	20,529	25,117	30,047	8,282
Service cost	810	864	585	689	153
Interest cost	793	785	844	850	344
Actuarial loss/(gain)	250	(545)	1,409	(1,517)	(560)
Benefits paid *(1) (2)*	(1,476)	(2,050)	(1,228)	(1,287)	(537)
Foreign exchange rate changes	-	-	(1,520)	(3,242)	16
Amendments, divestments and other	-	-	(11)	(423)	102
Benefit obligation at December 31	19,960	19,583	25,196	25,117	7,800
Accumulated benefit obligation at December 31	16,245	15,666	22,867	22,362	-

(1) Benefit payments for funded and unfunded plans.

(2) For 2016 and 2015, other postretirement benefits paid are net of $22 million and $15 million of Medicare subsidy receipts, respectively.

For selection of the discount rate for U.S. plans, several sources of information are considered, including interest rate market indicators and the discount rate determined by use of a yiel based on high-quality, noncallable bonds with cash flows that match estimated outflows for benefit payments. For major non-U.S. plans, the discount rate is determined by using bond po with an average maturity approximating that of the liabilities or spot yield curves, both of which are constructed using high-quality, local-currency-denominated bonds.

The measurement of the accumulated postretirement benefit obligation assumes a health care cost trend rate of 4.5 percent in 2018 and subsequent years. A one-percentage-point increas health care cost trend rate would increase service and interest cost by $76 million and the postretirement benefit obligation by $862 million. A one-percentage-point decrease in the health ca trend rate would decrease service and interest cost by $58 million and the postretirement benefit obligation by $687 million.

	Pension Benefits				Other Postretirement Benefits

Fair value at December 31	12,793	10,985	19,043	18,417	411

(1) Benefit payments for funded plans.

The funding levels of all qualified pension plans are in compliance with standards set by applicable law or regulation. As shown in the table below, certain smaller U.S. pension plans and a of non-U.S. pension plans are not funded because local applicable tax rules and regulatory practices do not encourage funding of these plans. All defined benefit pension obligations, regar the funding status of the underlying plans, are fully supported by the financial strength of the Corporation or the respective sponsoring affiliate.

	Pension Benefits		
	U.S.		Non-U.S.
	2016	2015	2016
	(millions of dollars)		
Assets in excess of/(less than) benefit obligation			
Balance at December 31			
Funded plans	(4,306)	(5,782)	212
Unfunded plans	(2,861)	(2,816)	(6,365)
Total	(7,167)	(8,598)	(6,153)

The authoritative guidance for defined benefit pension and other postretirement plans requires an employer to recognize the overfunded or underfunded status of a defined benefit postret plan as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through other comprehensive income.

(1) Fair value of assets less benefit obligation shown on the preceding page.

The long-term expected rate of return on funded assets shown below is established for each benefit plan by developing a forward-looking, long-term return assumption for each asset class into account factors such as the expected real return for the specific asset class and inflation. A single, long-term rate of return is then calculated as the weighted average of the targ allocation percentages and the long-term return assumption for each asset class.

	Pension Benefits						Other Postretirement Benefits

Costs for defined contribution plans were $399 million, $405 million and $393 million in 2016, 2015 and 2014, respectively.

A summary of the change in accumulated other comprehensive income is shown in the table below:

	Total Pension and Other Postretirement Benefits		
	2016	2015	2
	(millions of dollars)		
(Charge)/credit to other comprehensive income, before tax			
U.S. pension	790	457	
Non-U.S. pension	824	3,741	
Other postretirement benefits	673	1,337	
Total (charge)/credit to other comprehensive income, before tax	2,287	5,535	
(Charge)/credit to income tax (see Note 4)	(692)	(1,810)	
(Charge)/credit to investment in equity companies	(16)	81	
(Charge)/credit to other comprehensive income including noncontrolling interests, after tax	1,579	3,806	
Charge/(credit) to equity of noncontrolling interests	24	(202)	
(Charge)/credit to other comprehensive income attributable to ExxonMobil	1,603	3,604	

The Corporation's investment strategy for benefit plan assets reflects a long-term view, a careful assessment of the risks inherent in various asset classes and broad diversification to reduce of the portfolio. The benefit plan assets are primarily invested in passive equity and fixed income index funds to diversify risk while minimizing costs. The equity funds hold ExxonMob only to the extent necessary to replicate the relevant equity index. The fixed income funds are largely invested in high-quality corporate and government debt securities.

Studies are periodically conducted to establish the preferred target asset allocation percentages. The target asset allocation for the U.S. benefit plans and the major non-U.S. plans is 40 equity securities and 60 percent debt securities. The equity targets for the U.S. and non-U.S. plans include an allocation to private equity partnerships that primarily focus on early-stage capital of 5 percent and 3 percent, respectively.

The fair value measurement levels are accounting terms that refer to different methods of valuing assets. The terms do not represent the relative risk or credit quality of an investment.

The 2016 fair value of the benefit plan assets, including the level within the fair value hierarchy, is shown in the tables below:

	U.S. Pension Fair Value Measurement at December 31, 2016, Using:					Non-U.S. Pension Fair Value Measurement at December 31, 2016, Using:

(1) Per ASU 2015-07, certain instruments that are measured at fair value using the Net Asset Value (NAV) per share practical expedient have not been categorized in the fair value hierarc fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the total value of plan assets.

(2) For non-U.S. equity securities held in separate accounts, fair value is based on observable quoted prices on active exchanges.

(3) For U.S. and non-U.S. equity securities held in the form of fund units that are redeemable at the measurement date, the published unit value is treated as a Level 2 input. The fair valu securities owned by the funds is based on observable quoted prices on active exchanges, which are Level 1 inputs.

(4) For corporate, government and asset-backed debt securities, fair value is based on observable inputs of comparable market transactions.

(5) For government debt securities that are traded on active exchanges, fair value is based on observable quoted prices.

(6) For cash balances that are subject to withdrawal penalties or other adjustments, the fair value is treated as a Level 2 input.

A summary of pension plans with an accumulated benefit obligation in excess of plan assets is shown in the table below:

	Pension Benefits			
	U.S.		Non-U.S.	
	2016	2015	2016	20
	(millions of dollars)			
For funded pension plans with an accumulated benefit obligation in excess of plan assets:				
Projected benefit obligation	17,099	16,767	837	
Accumulated benefit obligation	14,390	13,913	612	
Fair value of plan assets	12,793	10,985	564	
For unfunded pension plans:				
Projected benefit obligation	2,861	2,816	6,365	
Accumulated benefit obligation	1,855	1,753	5,687	

	Pension Benefits		Other Postretirement Benefits
	U.S.	Non-U.S.	
	(millions of dollars)		
Estimated 2017 amortization from accumulated other comprehensive income:			
Net actuarial loss/(gain) *(1)*	841	462	
Prior service cost *(2)*	5	45	

(1) The Corporation amortizes the net balance of actuarial losses/(gains) as a component of net periodic benefit cost over the average remaining service period of active plan participants.

(2) The Corporation amortizes prior service cost on a straight-line basis as permitted under authoritative guidance for defined benefit pension and other postretirement benefit plans.

	Pension Benefits		Other Postretirement Benefits	
	U.S.	Non-U.S.	Gross	Medicare Subsidy Receipt
	(millions of dollars)

2021	1,426	1,125	480	29
2022 - 2026	6,910	5,827	2,381	168

18. Disclosures about Segments and Related Information

The Upstream, Downstream and Chemical functions best define the operating segments of the business that are reported separately. The factors used to identify these reportable segments ar on the nature of the operations that are undertaken by each segment. The Upstream segment is organized and operates to explore for and produce crude oil and natural gas. The Dowr segment is organized and operates to manufacture and sell petroleum products. The Chemical segment is organized and operates to manufacture and sell petrochemicals. These segme broadly understood across the petroleum and petrochemical industries.

These functions have been defined as the operating segments of the Corporation because they are the segments (1) that engage in business activities from which revenues are earned and e: are incurred; (2) whose operating results are regularly reviewed by the Corporation's chief operating decision maker to make decisions about resources to be allocated to the segment and to its performance; and (3) for which discrete financial information is available.

Earnings after income tax include transfers at estimated market prices.

In corporate and financing activities, interest revenue relates to interest earned on cash deposits and marketable securities. Interest expense includes non-debt-related interest expense million in 2016, $100 million in 2015 and $129 million in 2014.

State taxes, net of federal tax benefit	(43)	(8)
Other *(2)*	(929)	(1,043)
Total income tax expense	(406)	5,415
Effective tax rate calculation		
Income taxes	(406)	5,415
ExxonMobil share of equity company income taxes	1,692	3,011
Total income taxes	1,286	8,426
Net income including noncontrolling interests	8,375	16,551
Total income before taxes	9,661	24,977
Effective income tax rate	13%	34%

(1) 2016 includes a $227 million expense from an adjustment to deferred taxes and a $548 million benefit from an adjustment to a tax position in prior years.
(2) 2016 includes an exploration tax benefit of $198 million and benefits from an adjustment to a prior year tax position of $176 million.

Deferred income taxes reflect the impact of temporary differences between the amount of assets and liabilities recognized for financial reporting purposes and such amounts recognized purposes.

Deferred tax liabilities/(assets) are comprised of the following at December 31:

Tax effects of temporary differences for:	2016	20
	(millions of dollars)	
Property, plant and equipment	46,744	
Other liabilities	4,262	
Total deferred tax liabilities	51,006	
Pension and other postretirement benefits	(6,053)	
Asset retirement obligations	(5,454)	
Tax loss carryforwards	(5,472)	
Other assets	(5,615)	
Total deferred tax assets	(22,594)	(
Asset valuation allowances	1,509	
Net deferred tax liabilities	29,921	

In 2016, asset valuation allowances of $1,509 million decreased by $221 million and included net provisions of $180 million and effects of foreign currency translation of $41 million.

Deferred income tax (assets) and liabilities are included in the balance sheet as shown below. Effective September 30, 2016, the Corporation early-adopted Accounting Standard Update no 17 *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes* on a prospective basis. This update eliminates the requirement to classify deferred tax assets and liabilities as and noncurrent, and instead requires all deferred tax assets and liabilities to be classified as noncurrent.

Balance sheet classification	2016	2(
	(millions of dollars)	
Other current assets	-	
Other assets, including intangibles, net	(4,120)	
Accounts payable and accrued liabilities	-	
Deferred income tax liabilities	34,041	
Net deferred tax liabilities	29,921	

The Corporation had $54 billion of indefinitely reinvested, undistributed earnings from subsidiary companies outside the U.S. that were retained to fund prior and future capital expenditures. Deferred taxes have not been recorded for potential future tax obligations as these earnings are expected to be indefinitely reinvested for the foreseeable future. As of Decem 2016, it is not practical to estimate the unrecognized deferred tax liability associated with these earnings given the future availability of foreign tax credits and uncertainties about the ti potential remittances.

Unrecognized Tax Benefits. The Corporation is subject to income taxation in many jurisdictions around the world. Unrecognized tax benefits reflect the difference between positions t expected to be taken on income tax returns and the amounts recognized in the financial statements. The following table summarizes the movement in unrecognized tax benefits:

Gross unrecognized tax benefits	2016	2015	2(
		(millions of dollars)	
Balance at January 1	9,396	8,986	
Additions based on current year's tax positions	655	903	
Additions for prior years' tax positions	534	496	
Reductions for prior years' tax positions	(1,019)	(190)	
Reductions due to lapse of the statute of limitations	(7)	(4)	
Settlements with tax authorities	(70)	(725)	
Foreign exchange effects/other	(21)	(70)	
Balance at December 31	9,468	9,396	

The gross unrecognized tax benefit balances shown above are predominantly related to tax positions that would reduce the Corporation’s effective tax rate if the positions are favorably re Unfavorable resolution of these tax positions generally would not increase the effective tax rate. The 2016, 2015 and 2014 changes in unrecognized tax benefits did not have a material e the Corporation’s net income.

Resolution of these tax positions through negotiations with the relevant tax authorities or through litigation will take many years to complete. It is difficult to predict the timing of resolution positions since such timing is not entirely within the control of the Corporation. In the United States, the Corporation has various ongoing U.S. federal income tax positions at issue v Internal Revenue Service (IRS) for tax years beginning in 2006. The IRS has asserted penalties associated with several of those positions. The Corporation has not recognized the penaltie expense because the Corporation does not expect the penalties to be sustained under applicable law. The Corporation has filed a refund suit for tax years 2006-2009 in a U.S. federal distri with respect to the positions at issue for those years. Unfavorable resolution of all positions at issue with the IRS would not have a materially adverse effect on the Corporation’s net inc liquidity.

It is reasonably possible that the total amount of unrecognized tax benefits could change in the next 12 months in a range from a decrease of 10 percent to an increase of up to 15 percent, material impact on the Corporation’s net income.

The following table summarizes the tax years that remain subject to examination by major tax jurisdiction:

Country of Operation	Open Tax Years
Abu Dhabi	2014 - 2016
Angola	2010 - 2016
Australia	2008 - 2016
Canada	1994 - 2016
Equatorial Guinea	2007 - 2016
Malaysia	2009 - 2016
Nigeria	2005 - 2016
Norway	2007 - 2016
Qatar	2009 - 2016
Russia	2014 - 2016
United Kingdom	2014 - 2016
United States	2006 - 2016

The Corporation classifies interest on income tax-related balances as interest expense or interest income and classifies tax-related penalties as operating expense.

The Corporation incurred $4 million, $39 million and $42 million in interest expense on income tax reserves in 2016, 2015 and 2014, respectively. The related interest payable balances we million and $223 million at December 31, 2016, and 2015, respectively.

20. Subsequent Events

The Corporation completed the acquisition of InterOil Corporation (IOC) for about $2.5 billion on February 22, 2017. IOC is an exploration and production business focused on Papu Guinea. Consideration includes around 28 million shares of Exxon Mobil Corporation common stock with an estimated value of $2.3 billion, a Contingent Resource Payment (CRP) and ca CRP provides IOC shareholders $7.07 per share in cash for each incremental certified Trillion Cubic Feet Equivalent (TCFE) of resources above 6.2 TCFE, and up to 11.0 TCFE. IOC' include a receivable related to the same resource base for volumes in excess of 3.5 TCFE at amounts ranging from $0.24 - $0.40 per thousand cubic feet equivalent. The receivable is exp more than cover the CRP.

On January 16, 2017, an affiliate of the Corporation entered into a Purchase and Sale Agreement with the Bass family of Fort Worth, Texas, to acquire companies that indirectly own certain gas properties in the Permian Basin and certain additional properties and related assets in exchange for shares of Exxon Mobil Corporation common stock having an aggregate value at the closing of $5.6 billion, together with additional contingent cash payments tied to future drilling and completion activities (up to a maximum of $1.02 billion). The transaction is currently e to close on or about February 28, 2017. As of January 16, 2017, the number of shares issuable in connection with the transaction would have been approximately 63 million.

SUPPLEMENTAL INFORMATION ON OIL AND GAS EXPLORATION AND PRODUCTION ACTIVITIES (unaudited)

The results of operations for producing activities shown below do not include earnings from other activities that ExxonMobil includes in the Upstream function, such as oil and gas transp operations, LNG liquefaction and transportation operations, coal and power operations, technical service agreements, other nonoperating activities and adjustments for noncontrolling ir These excluded amounts for both consolidated and equity companies totaled $719 million in 2016, $831 million in 2015, and $3,223 million in 2014. Oil sands mining operations are incl the results of operations in accordance with Securities and Exchange Commission and Financial Accounting Standards Board rules.

Oil and Gas Exploration and Production Costs

The amounts shown for net capitalized costs of consolidated subsidiaries are $15,239 million less at year-end 2016 and $14,685 million less at year-end 2015 than the amounts repo
investments in property, plant and equipment for the Upstream in Note 9. This is due to the exclusion from capitalized costs of certain transportation and research assets and assets relating t
operations. Assets related to oil sands and oil shale mining operations are included in the capitalized costs in accordance with Financial Accounting Standards Board rules.

Oil and Gas Exploration and Production Costs (continued)

The amounts reported as costs incurred include both capitalized costs and costs charged to expense during the year. Costs incurred also include new asset retirement obligations establishe current year, as well as increases or decreases to the asset retirement obligation resulting from changes in cost estimates or abandonment date. Total consolidated costs incurred in 201 $11,375 million, down $10,512 million from 2015, due primarily to lower development costs. In 2015 costs were $21,887 million, down $7,228 million from 2014, due primarily to development costs and property acquisition costs. Total equity company costs incurred in 2016 were $1,406 million, down $58 million from 2015, due primarily to lower development costs

Oil and Gas Reserves

The following information describes changes during the years and balances of proved oil and gas reserves at year-end 2014, 2015, and 2016.

The definitions used are in accordance with the Securities and Exchange Commission's Rule 4-10 (a) of Regulation S-X.

Proved oil and natural gas reserves are those quantities of oil and natural gas, which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be econo producible – from a given date forward, from known reservoirs, and under existing economic conditions, operating methods and government regulations – prior to the time at which co providing the right to operate expire, unless evidence indicates that renewal is reasonably certain. In some cases, substantial new investments in additional wells and related facilities required to recover these proved reserves.

In accordance with the Securities and Exchange Commission's (SEC) rules, the Corporation's year-end reserves volumes as well as the reserves change categories shown in the followin are required to be calculated on the basis of average prices during the 12-month period prior to the ending date of the period covered by the report, determined as an unweighted arithmetic of the first-day-of-the-month price for each month within such period. These reserves quantities are also used in calculating unit-of-production depreciation rates and in calculat standardized measure of discounted net cash flow.

Revisions can include upward or downward changes in previously estimated volumes of proved reserves for existing fields due to the evaluation or re-evaluation of (1) already available ge reservoir or production data, (2) new geologic, reservoir or production data or (3) changes in the average of first-of-month oil and natural gas prices and / or costs that are used in the estima reserves. Revisions can also result from significant changes in either development strategy or production equipment/facility capacity. Reserve volumes that were subject to a downward r can be revised upward at some point in the future when price levels increase, costs decline, and / or operating efficiencies occur.

As a result of very low prices during 2016, under the SEC definition of proved reserves, certain quantities of oil and natural gas that qualified as proved reserves in prior years did not qu proved reserves at year-end 2016 and are reflected as downward revisions. Amounts no longer qualifying as proved reserves include the entire 3.5 billion barrels of bitumen at Kearl. In a 0.8 billion barrels of oil equivalent across the remainder of North America no longer qualify as proved reserves mainly due to the acceleration of the projected end-of-field-life. Among the that would result in these amounts being recognized again as proved reserves at some point in the future are a recovery in average price levels, a further decline in costs, and / or op efficiencies. We do not expect the downward revision of reported proved reserves under SEC definitions to affect the operation of the underlying projects or to alter our outlook fo production volumes.

Proved reserves include 100 percent of each majority-owned affiliate's participation in proved reserves and ExxonMobil's ownership percentage of the proved reserves of equity compan exclude royalties and quantities due others. Natural gas reserves exclude the gaseous equivalent of liquids expected to be removed from the natural gas on leases, at field facilities and processing plants. These liquids are included in net proved reserves of crude oil and natural gas liquids.

In the proved reserves tables, consolidated reserves and equity company reserves are reported separately. However, the Corporation does not view equity company reserves any differen those from consolidated companies.

Reserves reported under production sharing and other nonconcessionary agreements are based on the economic interest as defined by the specific fiscal terms in the agreement. The product reserves that we report for these types of arrangements typically vary inversely with oil and natural gas price changes. As oil and natural gas prices increase, the cash flow and value rece the company increase; however, the production volumes and reserves required to achieve this value will typically be lower because of the higher prices. When prices decrease, the opposit generally occurs. The percentage of total liquids and natural gas proved reserves (consolidated subsidiaries plus equity companies) at year-end 2016 that were associated with production contract arrangements was 14 percent of liquids, 9 percent of natural gas and 12 percent on an oil-equivalent basis (natural gas converted to oil-equivalent at 6 billion cubic feet = 1 barrels).

Net proved developed reserves are those volumes that are expected to be recovered through existing wells with existing equipment and operating methods or in which the cost of the r equipment is relatively minor compared to the cost of a new well. Net proved undeveloped reserves are those volumes that are expected to be recovered from new wells on undrilled acre from existing wells where a relatively major expenditure is required for recompletion.

Crude oil and natural gas liquids and natural gas production quantities shown are the net volumes withdrawn from ExxonMobil's oil and natural gas reserves. The natural gas quantities diff the quantities of natural gas delivered for sale by the producing function as reported in the Operating Information due to volumes consumed or flared and inventory changes.

Standardized Measure of Discounted Future Cash Flows

As required by the Financial Accounting Standards Board, the standardized measure of discounted future net cash flows is computed by applying first-day-of-the-month average price end costs and legislated tax rates and a discount factor of 10 percent to net proved reserves. The standardized measure includes costs for future dismantlement, abandonment and rehabi obligations. The Corporation believes the standardized measure does not provide a reliable estimate of the Corporation's expected future cash flows to be obtained from the developm production of its oil and gas properties or of the value of its proved oil and gas reserves. The standardized measure is prepared on the basis of certain prescribed assumptions including first-the-month average prices, which represent discrete points in time and therefore may cause significant variability in cash flows from year to year as prices change.

Total change in the standardized measure during the year	(7,625)	(9,826)	(17,451)
Discounted future net cash flows as of December 31, 2016	35,150	18,201	53,351

(1) Securities and Exchange Commission (SEC) rules require the Corporation's reserves to be calculated on the basis of average first-of-month oil and natural gas prices during the re year. As a result of very low prices during 2016, under the SEC definition of proved reserves, certain quantities of oil and natural gas that qualified as proved reserves in prior years qualify as proved reserves at year-end 2016. Future net cash flows for these quantities are excluded from the 2016 Standardized Measure of Discounted Future Cash Flows. Substant of this reduction in discounted future net cash flows since December 31, 2015, is reflected in the line "Net change in prices, lifting and development costs" in the table above.

The registrant agrees to furnish a copy of any such instrument to the Securities and Exchange Commission upon request.

EXHIBIT 10(
November 2

Exxon Mobil Corporation
Extended Provisions for Restricted Stock Agreements

1. **Effective Date and Issuance of Restricted Stock.** If Grantee completes, signs, and returns the signature page of this Agreement to the Corporation in Dallas County, Texas, U.S.A before March 8, 2013, this Agreement will become effective the date the Corporation receives and accepts the signature page in Dallas County, Texas, U.S.A. After this Agreement b effective, the Corporation will, subject to section 5, issue to Grantee, on a restricted basis as explained below, the number of shares of the Corporation's common stock specified signature page.

2. **Conditions.** If issued, the shares of restricted stock will be subject to the provisions of this Agreement, and to such regulations and requirements as the administrative authority Program may establish from time to time. The shares will be issued only on the condition that Grantee accepts such provisions, regulations, and requirements.

3. **Restrictions and Risk of Forfeiture.** During the applicable restricted periods specified in section 4 of this Agreement,

(a) the shares under restriction may not be sold, assigned, transferred, pledged, or otherwise disposed of or encumbered, and any attempt to do so will be null and void; and
(b) the shares under restriction may be forfeited as provided in section 6.

4. **Restricted Periods.** The restricted periods will commence at grant and, unless the shares have been forfeited earlier under section 6, will expire as follows, whether or not Grantee is employee:

(a) with respect to 50% of the shares, on November 28, 2017; and
(b) with respect to the remaining shares, on the later to occur of
  (i) November 28, 2022, or
  (ii) the first day of the calendar year immediately following the year in which Grantee terminates;
  except that
(c) the restricted periods will automatically expire with respect to all shares on the death of Grantee.

5. **No Obligation to Issue Restricted Stock.** The Corporation will have no obligation to issue the restricted stock and will have no other obligation to Grantee with respect to the subjec of this Agreement if Grantee fails to complete, sign, and return the signature page of this Agreement on or before March 8, 2013. In addition, whether or not Grantee has completed, and returned the signature page, the Corporation will have no obligation to issue the restricted stock and will have no other obligation to Grantee with respect to the subject matte Agreement if, before the shares are issued:

(a) Grantee terminates (other than by death) before standard retirement time within the meaning of the Program, except to the extent the administrative authority of the Program det Grantee may receive restricted stock under this Agreement; or
(b) Grantee is determined to have engaged in detrimental activity within the meaning of the Program; or
(c) Grantee fails to provide the Corporation with cash for any required taxes due at issuance of the shares, if Grantee is required to do so under section 7.

6. **Forfeiture of Shares After Issuance.** Until the applicable restricted period specified in section 4 has expired, the shares under restriction will be forfeited or subject to forfeitur following circumstances:

Termination
If Grantee terminates (other than by death) before standard retirement time within the meaning of the Program, all shares for which the applicable restricted periods have not expired automatically forfeited and reacquired by the Corporation as of the date of termination, except to the extent the administrative authority determines Grantee may retain restricted stock under this Agreement.

Detrimental activity
If Grantee is determined to have engaged in detrimental activity within the meaning of the Program, either before or after termination, all shares for which the applicable restricted have not expired will be automatically forfeited and reacquired by the Corporation as of the date of such determination.

Attempted transfer
The shares are subject to forfeiture in the discretion of the administrative authority if Grantee attempts to sell, assign, transfer, pledge, or otherwise dispose of or encumber them dur applicable restricted periods.

Applicable law
The shares are subject to forfeiture in whole or in part as the administrative authority deems necessary in order to comply with applicable law.

7. **<u>Taxes</u>.** Notwithstanding the restrictions on transfer that otherwise apply, the Corporation in its sole discretion may withhold shares, either at the time of issuance, at the time the app restricted periods expire, or at any other time in order to satisfy any required withholding, social security, and similar taxes or contributions (collectively, "required taxes"). Withheld may be retained by the Corporation or sold on behalf of Grantee. If the Corporation does not withhold shares to satisfy required taxes, in the alternative the Corporation may require (to deposit with the Corporation cash in an amount determined by the Corporation to be necessary to satisfy required taxes. Notwithstanding any other provision of this Agreeme Corporation will be under no obligation to issue or deliver shares to Grantee if Grantee fails timely to deposit such amount with the Corporation. The Corporation in its sole discreti also withhold any required taxes from dividends paid on the restricted stock.

8. **<u>Form of Shares</u>.** The shares will, upon issuance, be registered in the name of Grantee. During the applicable restricted periods, however, the shares will be held by or on behal Corporation. Shares under restriction may be held in certificated or book-entry form as the administrative authority determines. Grantee agrees that the Corporation may give stop instructions to its transfer agent with respect to shares subject to restriction and that, during the applicable restricted period, any restricted shares issued in certificated form may appropriate legend noting the restrictions, risk of forfeiture, and requirements regarding withholding taxes. If and when the applicable restricted period expires with respect to any shares, subject to section 7, the Corporation will deliver those shares promptly after such expiration to or for the account of Grantee free of restriction, either in certificated form or by entry transfer in accordance with the procedures of the administrative authority in effect at the time.

9. **<u>Shareholder Status</u>.** During the applicable restricted periods, Grantee will have customary rights of a shareholder with respect to the shares registered in Grantee's name, including th to vote and to receive dividends on the shares, subject to the restrictions on transfer, possible events of forfeiture, and potential dividend reinvestment provided in this Agreement. Ho before the shares are registered in Grantee's name, Grantee will not be a shareholder of the Corporation and will not be entitled to dividends with respect to those shares.

10. **<u>Change in Capitalization</u>.** If a stock split, stock dividend, or other relevant change in capitalization of the Corporation occurs, any resulting new shares or securities issued with res previously issued shares that are still restricted under this Agreement will be delivered to and held by or on behalf of the Corporation and will be subject to the same provisions, restr and requirements as those previously issued shares.

11. **<u>Limits on the Corporation's Obligations</u>.** Notwithstanding anything else contained in this Agreement, under no circumstances will the Corporation be required to issue or deli shares if doing so would violate any law or listing requirement that the administrative authority determines to be applicable, or if Grantee has failed to provide for required taxes purs section 7.

12. **<u>Receipt or Access to Program</u>.** Grantee acknowledges receipt of or access to the full text of the Program.

13. **<u>Appointment of Agent for Dividends</u>.** Grantee appoints the Corporation to be Grantee's agent to receive for Grantee dividends on shares based on record dates that occur while the are subject to restriction under this Agreement. The Corporation will transmit such dividends, net of required taxes pursuant to section 7, to or for the account of Grantee in such ma the administrative authority determines. Alternatively, the administrative authority may determine to reinvest such dividends in additional shares which will be held subject to all th and conditions otherwise applicable to shares of restricted stock under this Agreement.

14. **<u>Electronic Delivery of Shareholder Communications</u>.** The Corporation's proxy statement, annual report, and other shareholder materials deliverable to Grantee with respect to issued under this Agreement may be delivered to Grantee electronically, unless Grantee specifically requests delivery in paper format. Such electronic delivery may be accomplished b transmission of the materials, or by email notification to Grantee that the materials are available at a specified website to which Grantee has access.

15. **Addresses for Communications**. To facilitate communications regarding this Agreement and electronic delivery of shareholder communications as provided in section 14, Gran provide Grantee's current mailing and email addresses on the signature page of this Agreement and agrees to notify the Corporation promptly of changes in such information in the Communications to the Corporation in connection with this Agreement should be directed to the Incentive Processing Office at the address given on the signature page of this Agreem to such other address as the Corporation may designate by further notice to Grantee.

16. **Transfer of Personal Data.** The administration of the Program and this Agreement, including any subsequent ownership of shares, involve the collection, use, and transfer of perso about Grantee between and among the Corporation, selected subsidiaries and other affiliates of the Corporation, and third-party service providers such as Morgan Stanley Smith Bar Computershare (the Corporation's transfer agent), as well as various regulatory and tax authorities around the world. This data includes Grantee's name, age, date of birth, contact info work location, employment status, tax status, social security number, salary, nationality, job title, share ownership, and details of incentive awards granted, cancelled, vested or unves related information. By accepting this award, Grantee authorizes such collection, use, and transfer of this data. Grantee may, at any time and without charge, view such data and necessary corrections to it. Such data will at all times be held in accordance with applicable laws, regulations, and agreements.

17. **No Employment Contract or Entitlement to Other or Future Awards**. This Agreement, the Corporation's incentive programs, and Grantee's selection for incentive awards do not i form a part of any contract or assurance of employment, and they do not in any way limit or restrict the ability of Grantee's employer to terminate Grantee's employment. acknowledges that the Corporation maintains and administers its incentive programs entirely in its discretion and that Grantee is not entitled to any other or future incentive awards of a in addition to those that have already been granted.

18. **Governing Law and Consent to Jurisdiction**. This Agreement and the Program are governed by the laws of the State of New York without regard to any conflict of law rules. Any arising out of or relating to this Agreement or the Program may be resolved in any state or federal court located within Dallas County, Texas, U.S.A. Grantee accepts that venue and su the personal jurisdiction of any such court. Similarly, the Corporation accepts such venue and submits to such jurisdiction.

19. **Entire Agreement.** This Agreement constitutes the entire understanding between Grantee and the Corporation with respect to the subject matter of this Agreement.

Exxon Mobil Corporation

Extended Provisions for Restricted Stock Unit Agreements - Settlement in Shares

1. **Effective Date and Credit of Restricted Stock Units**. If Grantee accepts the award on or before March 6, 2017, this Agreement will become effective the date the Corporation receiv award acceptance. After this agreement becomes effective, the Corporation will credit to Grantee the number of restricted stock units specified in the award package. Subject to the term conditions of this Agreement, each restricted stock unit ("unit") will entitle Grantee to receive in settlement of the unit one share of the Corporation's common stock.

2. **Conditions**. If credited, the units will be subject to the provisions of this Agreement, and to such regulations and requirements as the administrative authority of the Program may estal from time to time. The units will be credited to Grantee only on the condition that Grantee accepts such provisions, regulations, and requirements.

3. **Restrictions and Risk of Forfeiture**. During the applicable restricted periods specified in section 4 of this Agreement,

   (a) the units under restriction may not be sold, assigned, transferred, pledged, or otherwise disposed of or encumbered, and any attempt to do so will be null and void; and

   (b) the units under restriction may be forfeited as provided in section 6.

4. **Restricted Periods**. The restricted periods will commence when the units are credited to Grantee and, unless the units have been forfeited earlier under section 6, will expire as follow whether or not Grantee is still an employee:

   (a) with respect to 50% of the units, on November 30, 2021; and

   (b) with respect to the remaining units, on the later to occur of

      (i) November 30, 2026, or

      (ii) the first day of the calendar year immediately following the year in which Grantee terminates; except that

   (c) the restricted periods will automatically expire with respect to all shares on the death of Grantee.

5. **No Obligation to Credit Units**. The Corporation will have no obligation to credit any units and will have no other obligation to Grantee with respect to the subject matter of this Agre if Grantee fails to accept the award on or before March 6, 2017. In addition, whether or not Grantee has accepted the award, the Corporation will have no obligation to credit any units a have no other obligation to Grantee with respect to the subject matter of this Agreement if, before the units are credited:

   (a) Grantee terminates (other than by death) before standard retirement time within the meaning of the Program, except to the extent the administrative authority of the Program determines Grantee may receive units under this Agreement; or

   (b) Grantee is determined to have engaged in detrimental activity within the meaning of the Program.

6. **Forfeiture of Units After Crediting**. Until the applicable restricted period specified in section 4 has expired, the units under restriction will be forfeited or subject to forfeiture in the following circumstances:

   Termination

   If Grantee terminates (other than by death) before standard retirement time within the meaning of the Program, all units for which the applicable restricted periods have not expired will automatically forfeited as of the date of termination, except to the extent the administrative authority determines Grantee may retain units issued under this Agreement.

   Detrimental activity

   If Grantee is determined to have engaged in detrimental activity within the meaning of the Program, either before or after termination, all units for which the applicable restricted period not expired will be automatically forfeited as of the date of such determination.

   Attempted transfer

   The units are subject to forfeiture in the discretion of the administrative authority if Grantee attempts to sell, assign, transfer, pledge, or otherwise dispose of or encumber them during th applicable restricted periods.

Applicable law

The units are subject to forfeiture in whole or in part as the administrative authority deems necessary to comply with applicable law or Corporation policy including, without limitation, clawback obligations determined to be owed by Grantee to the Corporation in connection with this or other awards.

7. **Taxes**. Notwithstanding the restrictions on transfer that otherwise apply, the Corporation in its sole discretion may withhold units, or shares otherwise deliverable in settlement of units at the time of crediting, at the time of settlement, or at any other time in order to satisfy any required withholding, social security, and similar taxes or contributions (collectively, "requi taxes"). Withheld units or shares may be retained by the Corporation or sold on behalf of Grantee. The Corporation in its sole discretion may also withhold any required taxes from divi equivalents paid on the units.

8. **Form of Units; No Shareholder Status**. The units will be represented by book-entry credits in records maintained by or on behalf of the Corporation. Units will be unfunded and uns promises by the Corporation to deliver shares in the future upon the terms and subject to the conditions of this Agreement. Grantee will not be a shareholder of the Corporation with res units prior to the time shares are actually registered in Grantee's name in settlement of such units in accordance with section 9.

9. **Settlement of Units**. If and when the applicable restricted period expires with respect to any units, subject to section 7, the Corporation will issue shares, free of restriction and registe the name of Grantee, in settlement of such units. Such shares will be delivered promptly after such expiration to or for the account of Grantee either in certificated form or by book-entr transfer in accordance with the procedures of the administrative authority in effect at the time.

10. **Dividend Equivalents**. The Corporation will pay to Grantee cash with respect to each credited unit corresponding in amount, currency, and timing to cash dividends that would be pay with respect to a share of common stock outstanding on each record date that occurs during the applicable restricted period. Alternatively, the administrative authority may determine to reinvest such dividend equivalents in additional units which will be held subject to all the terms and conditions otherwise applicable to units under this Agreement.

11. **Change in Capitalization**. If during the applicable restricted periods a stock split, stock dividend, or other relevant change in capitalization of the Corporation occurs, the administrati authority will make such adjustments in the number of units credited to Grantee, or in the number and type of securities deliverable to Grantee in settlement of such units and used in determining dividend equivalent amounts, as the administrative authority may determine to be appropriate. Any resulting new units or securities credited with respect to previously cre units that are still restricted under this Agreement will be delivered to and held by or on behalf of the Corporation and will be subject to the same provisions, restrictions, and requireme those previously credited units.

12. **Limits on the Corporation's Obligations**. Notwithstanding anything else contained in this Agreement, under no circumstances will the Corporation be required to credit any units or or deliver any shares in settlement of units if doing so would violate any law or listing requirement that the administrative authority determines to be applicable.

13. **Receipt or Access to Program**. Grantee acknowledges receipt of or access to the full text of the Program.

14. **Addresses for Communications**. To facilitate communications regarding this Agreement, Grantee agrees to notify the Corporation promptly of changes in current mailing and email addresses. Communications to the Corporation in connection with this Agreement should be directed to the Incentive Processing Office, or to such other address as the Corporation ma designate by further notice to Grantee.

15. **Transfer of Personal Data**. The administration of the Program and this Agreement, including any subsequent ownership of shares, involve the collection, use, and transfer of personal about Grantee between and among the Corporation, selected subsidiaries and other affiliates of the Corporation, and third-party service providers such as Morgan Stanley and Compute (the Corporation's transfer agent), as well as various regulatory and tax authorities around the world. This data includes Grantee's name, age, date of birth, contact information, work lo employment status, tax status, social security number, salary, nationality, job title, share ownership, and details of incentive awards granted, cancelled, vested or unvested, and related information. By accepting this award, Grantee authorizes such collection, use, and transfer of this data. Grantee may, at any time and without charge, view such data and require necess corrections to it. Such data will at all times be held in accordance with applicable laws, regulations, and agreements.

16. **No Employment Contract or Entitlement to Other or Future Awards**. This Agreement, the Corporation's incentive programs, and Grantee's selection for incentive awards do not i form a part of any contract or assurance of employment, and they do not in any way limit or restrict the ability of Grantee's employer to terminate Grantee's employment. Grantee acknowledges that the Corporation maintains and administers its incentive programs entirely in its discretion and that Grantee is not entitled to any other or future incentive awards of a kind in addition to those that have already been granted.

17. **Governing Law and Consent to Jurisdiction**. This Agreement and the Program are governed by the laws of the State of New York without regard to any conflict of law rules. Any di arising out of or relating to this Agreement or the Program may be resolved in any state or federal court located within Dallas County, Texas, U.S.A. Grantee accepts that venue and sub the personal jurisdiction of any such court. Similarly, the Corporation accepts such venue and submits to such jurisdiction.

18. **Entire Agreement**. This Agreement constitutes the entire understanding between Grantee and the Corporation with respect to the subject matter of this Agreement.

EXHIBIT 10(

EXXON MOBIL CORPORATION

EARNINGS BONUS UNIT AWARD

Name of Grantee	**Number of EBUs**	**Maximum Settlement Value Per EBU**	**Maximum Settlement Value of Award**
		$6.50	

This **EARNINGS BONUS UNIT AWARD** is granted in Dallas County, Texas by Exxon Mobil Corporation (the "Corporation") effective November 30, 2016 (the "date of grant"), pursuan Short Term Incentive Program adopted by the Board of Directors of the Corporation on October 27, 1993, as amended (the "Program"). This award is subject to the provisions of this instrur and the Program and to such regulations and requirements as may be stipulated from time to time by the administrative authority defined in the Program and is granted on the condition that Grantee accepts such provisions, regulations, and requirements. This instrument incorporates by reference the provisions of the Program, as it may be amended from time to time, including without limitation the definitions of terms used in this instrument and defined in the Program.

1. Award. The Corporation has granted to Grantee the number of earnings bonus units ("EBUs") set forth above, with each EBU having the maximum settlement value set forth above. Subj the other terms of this award, Grantee has the right, for each of these EBUs, to receive from the Corporation, promptly after the settlement date defined below, an amount of cash equal to th Corporation's cumulative earnings per common share (assuming dilution) as reflected in its quarterly earnings statements as initially filed in its quarterly or annual reports with the U.S. Secu and Exchange Commission commencing with earnings for the first full quarter following the date of grant to and including the last full quarter preceding the settlement date; provided, howe that the amount of such settlement will not exceed the maximum settlement value specified above.

2. Settlement Date. The settlement date of these EBUs will be the earlier of (i) the date of publication of the Corporation's quarterly earnings statement for the twelfth (12th) full quarter foll the date of grant, or (ii) the date of publication of the Corporation's quarterly earnings statement which brings the cumulative earnings per common share (assuming dilution) as initially filed quarterly or annual reports with the U.S. Securities and Exchange Commission commencing with the first full quarter following the date of grant to an amount at least equal to the maximum settlement value per EBU specified above.

3. Annulment. This award is provisional until the Corporation actually pays cash in settlement of the award.

(a) If, before the Corporation pays such cash, Grantee terminates (other than by death) before standard retirement time within the meaning of the Program, this award will automati expire as of the date of termination, except to the extent the administrative authority determines Grantee may retain this award.

(b) If, before the Corporation pays such cash, Grantee is determined to have engaged in detrimental activity within the meaning of the Program, this award will automatically expir the date of such determination.

(c) Provisional awards held by executive officers may also be subject to cancellation to comply with applicable law or Corporation policy including, without limitation, any clawba obligations determined to be owed by Grantee to the Corporation in connection with this or other awards.

4. Adjustments. The number of EBUs covered by this award and the meaning of the term "common share" will be adjusted by the administrative authority as it deems appropriate to give ef any stock split, stock dividend or other relevant change in capitalization of the Corporation after the date of grant and prior to the settlement date.

5. Governing Law and Consent to Jurisdiction. This award and the Program are governed by the laws of the State of New York without regard to any conflict of law rules. Any dispute arisin of or relating to this award or the Program may be resolved in any state or federal court located within Dallas County, Texas, U.S.A. This award is issued on the condition that Grantee accep venue and submits to the personal jurisdiction of any such court. Similarly, the Corporation accepts such venue and submits to such jurisdiction.

EXXON MOBIL CORPORATION

EXXONMOBIL EXECUTIVE LIFE INSURANCE AND DEATH BENEFIT PLAN

1. Participation

1.1 Covered Executive

Each covered executive is a participant in this Plan.

1.2 Retiree

(A) In General

Except as provided in paragraph (B) below, each person who becomes a retiree on or after the effective date, and who is a covered executive immediately prior to becomin retiree is a participant in this Plan. In addition, each grandfathered retiree is a participant in the Plan.

(B) Exception

A retiree will cease to be a participant during the time the retiree is a suspended retiree.

1.3 Cessation of Participant Status

(A) Termination of Employment

(1) In General

Except as provided in paragraphs (2) through (4) below, a covered executive will cease to be a participant 31 days after the covered executive terminates employ without becoming a retiree.

(2) Exception for Long Term Disability

A covered executive who terminates employment with eligibility for long-term disability benefits under the ExxonMobil Disability Plan, will cease to be a partici at the earlier of

(a) one year after terminating employment, or

(b) the date the person is no longer eligible for long-term disability benefits on account of ceasing to be disabled

(3) Exception for Coverage Provided Through Death Benefit

If, at the time a covered executive terminates employment he or she has elected to receive executive life coverage in the form of a death benefit, the covered exec will cease to be a participant on the date of such termination of employment.

(4) Exception for Transition Severance Terminees

(a) In General

A covered executive who terminates employment without becoming a retiree shall continue to be a participant for a period of one year from the date of termination of employment, but only if the person is eligible for a benefit under the Exxon Transition Severance Plan, or if the Corporation, acting throu management, determines that the covered executive is otherwise eligible for such continued participation.

(b) Termination of Provision

This paragraph (4) shall not apply to any covered executive who terminates employment after August 31, 2000.

(B) Suspended Retirees

A retiree or grandfathered retiree will cease to be a participant during the time the person is a suspended retiree.

2. Coverage

2.1 When and How Coverage is Provided

(A) In General

(1) Executive Life Coverage

Executive life coverage is automatically provided to all participants other than grandfathered retirees.

(2) Supplemental Group Life Coverage

Supplemental group life coverage is automatically provided to all participants who are grandfathered retirees.

(B) Life Insurance or Death Benefit Option

(1) In General

Both executive life coverage and supplemental group life coverage is automatically provided under the Plan as life insurance unless a participant elects to receive coverage in the form of a death benefit.

(2) Election

Participants may, at any time, elect to receive executive life or supplemental group life coverage, whichever is applicable, as a death benefit, and may revoke any election. An election or revocation under this paragraph (2) shall be made in accordance with procedures established by the administrator.

(3) When Election is Effective

(a) Death Benefit

An election under paragraph (2) above to receive executive life or supplemental group life coverage as a death benefit shall become effective on the first month following the receipt of such election by the administrator.

(b) Revocation of Election

A participant's revocation of a death benefit election in favor of receiving executive life or supplemental group life coverage as life insurance becomes effective on the first of the month following the date the administrator receives notification from the insurer that the insurer has, in its discretion, appro evidence of insurability submitted by the participant.

(4) Reinstatement of Coverage

If a participant's executive life or supplemental group life coverage is reinstated after a period in which the participant was ineligible for coverage under section above on account of becoming a suspended retiree, such coverage shall be reinstated under the option (i.e., life insurance or a death benefit) in force at the time co was lost.

(C) Termination of Coverage

Executive life or supplemental group life coverage terminates for an individual on the date the individual ceases to be a participant.

2.2 Amount of Benefit

(A) Executive Life Coverage

(1) In General

Except as provided in paragraph (2) below, the amount of executive life coverage in effect for a participant is equal to the applicable percentage determined unde following chart multiplied by the participant's annual base pay:

If the participant's age is	The percentage is
Under 65	400%
65-69	350%
70-74	300%
75 and over	250%

For this purpose, a participant attains a particular age as of the first day of the month in which the person will turn such age. In addition, a covered executive's an base pay is the base pay in effect at the time coverage is determined, and a retiree's base pay is the base pay in effect for the person immediately before the perso became a retiree.

(2) Transition Severance Terminees

The amount of executive life coverage in effect for a person who is a participant solely on account of section 1.3(A)(4) above relating to transition severance terr is 200% of the person's annual base pay in effect immediately before the person's termination of employment.

(B) Supplemental Group Life Coverage

Supplemental Group Life Coverage is provided

(1) during retirement to all grandfathered retirees, and

(2) during employment to those persons who become grandfathered retirees after the effective date.

The amount of supplemental group life coverage in effect for a grandfathered retiree is equal to the amount of coverage in effect for the person under the provisions of the Supplemental Group Life Insurance Plan or Supplemental Group Death Benefit Plan (as such plans existed on December 31, 1999) as of the later of December 31, 1999 or date the person retires. The amount of supplemental group life coverage in effect during employment for a person who becomes a grandfathered retiree after the effective c the amount of coverage to which they are entitled under the terms of the Supplemental Group Life Insurance Plan or Supplemental Group Death Benefit Plan (as such plar existed on December 31, 1999).

3. Payment of Benefit

3.1 Conditions for Payment of Benefit

If a participant dies while executive life or supplemental group life coverage for that participant is in effect, then the amount of coverage then in effect for the participant becomes payable; provided, that proof of death satisfactory to the insurer must be provided before any benefit becomes payable as life insurance.

3.2 Form of Payment

A benefit payable under Section 3.1 above upon a participant's death shall be paid in a lump sum.

3.3 Source of Payment

(A) Life Insurance

Executive life and supplemental group life coverage in the form of life insurance shall be provided through one or more policies of insurance issued by an insurer selected Corporation, and any executive life or supplemental group life benefit payable as insurance shall be paid pursuant to such policy or policies.

(B) Death Benefit

Any executive life or supplemental group life benefit payable as a death benefit shall be paid from the general assets of the Corporation.

3.4 To Whom Paid

A benefit payable under Section 3.1 above upon a participant's death shall be paid as follows:

(A) If a beneficiary designation is in effect at the time of the participant's death, the benefit shall be paid in accordance with such designation.

(B) If no beneficiary designation is in effect, the benefit shall be paid to the first of the following groups that has at least one member that survives the participant:

(1) The participant's spouse.

(2) The participant's children. In this event, the benefit will be divided equally among the children who survive the participant as well as the children who die befor participant leaving children of their own who survive the participant. In the case of a participant's child who dies before the participant leaving children of his o own who survive the participant, such child's share shall be divided equally among his or her surviving children.

(3) The participant's parents. In this event, the benefit will be divided equally among the parents if they both survive the participant.

(4) The participant's brothers and sisters. In this event, the benefit will be divided equally among the brothers and sisters who survive the participant as well as the brothers and sisters who die before the participant leaving children of their own who survive the participant. In the case of a brother or sister who dies before the participant leaving children of his or her own who survive the participant, such brother or sister's share shall be divided equally among his or her surviving childr

(5) The participant's executors or administrators.

For purposes of this Paragraph (B), a spouse of a participant shall include only someone who is the legal spouse of the participant, and a child, parent, brother, or sister of participant shall include only someone who is a legitimate blood relative of the participant or whose relationship with the participant is established by virtue of a legal ad

4. Designation of Beneficiary

4.1 Designation

A participant may designate one or more beneficiaries to receive the payment of benefits upon the death of the participant, or may at any time change or cancel a previously made beneficiary designation.

4.2 Forms and Submission

Any beneficiary designation or change or cancellation thereof shall be made on such forms and in such manner as is satisfactory to the insurer. No beneficiary designation or chang cancellation thereof shall become effective until received by the insurer or its designated agent.

4.3 Designation Made Under Prior Plans

Any beneficiary designation made by a participant under the Supplemental Group Life Insurance Plan or Supplemental Death Benefit Plan that remains in effect on December 31, shall continue to be valid under this Plan on and after the effective date until and unless properly superseded.

5. Miscellaneous

5.1 Plan Funding

The funding for executive life and supplemental group life coverage, including the funding of premiums under any life insurance policy issued in connection with such coverage, sl paid for by the Corporation; no participant contributions will be required or permitted.

5.2 Assignment of Insurance

(A) Assignment

A participant may assign to another owner the participant's interest in his or her executive life or supplemental group life coverage provided in the form of life insurance. assignment shall be made on such forms and in such manner as is acceptable to the administrator and the insurer.

(B) Effect of Assignment

(1) In General

When an assignment of a participant's coverage is in effect as described in paragraph (A) above, then, except as provided in paragraph (2) below, the participant's assignee shall have the right to take all actions under the terms of this Plan with respect to such coverage that the participant would otherwise have the right to ta including, without limitation, the right to designate a beneficiary.

(2) Exception

An assignee shall not have the right under this Plan to elect to receive executive life or supplemental group life coverage as a death benefit under section 2.1(B)(2 or to revoke an already existing election.

(C) Assignment Under Prior Plan

Any assignment of coverage made by a participant under the Supplemental Group Life Insurance Plan shall continue to be valid under this Plan with respect to executive supplemental group life coverage.

5.3 Amendment and Termination

The Corporation at any time, by action of any duly authorized officer, may amend or terminate this Plan in whole or in part.

5.4 Responsibilities and Authority of Administrator

The administrator shall fulfill all duties and responsibilities of a "plan administrator" required by the Employee Retirement Income Security Act of 1974, as amended. The adminis shall have the authority to control and manage the operation and administration of this Plan, including, without limitation:

(A) discretionary and final authority to determine eligibility and to administer this Plan in its application to each participant and beneficiary; and

(B) discretionary and final authority to interpret this Plan, in whole or in part, including but not limited to, exercising such authority in conducting a full and fair review, with interpretation being conclusive for all participants and beneficiaries under this Plan.

5.5 Claim Appeal Process

(A) Submission of Appeal

In the event a claim for benefits is denied, the claimant has the right to appeal to the administrator. A written request to review a denied claim must be received by the administrator within 90 days after the claim denial. The request may state the reasons the claimant believes he or she is entitled to Plan benefits, and may be accompanied supporting information and documentation for the administrator's consideration.

(B) Decision

The administrator shall decide appeals in accordance with the administrator's fiduciary authority set out in section 5.4 above. Appeal decisions will be made within 60 da the receipt of the claim by the administrator unless special circumstances warrant an extension of time. If an extension of time is required, the administrator will notify th claimant of the extension. In all cases, the decision will be made no later than 120 days after the receipt of the claim by the administrator. The appeal decision shall be in w specify the reasons for the decision, and refer to the relevant Plan provision(s) on which the decision is based.

5.6 Definitions

The following terms shall have the following meanings ascribed to them:

(A) "Administrator" means the Manager, Compensation and Executive Plans, Human Resources Department, Exxon Mobil Corporation.

(B) "Corporation" means Exxon Mobil Corporation.

(C) "Covered Employee" has the meaning set out in the ExxonMobil Benefit Plans Common Provisions.

(D) "Covered Executive" means a covered employee who has a classification level of 35 or higher; provided, however, that the group of covered executives shall be frozen as September 30, 2007, and no individual shall become a covered executive on or after October 1, 2007.

(E) "Effective Date" means January 1, 2000.

(F) "Grandfathered retiree" means a person who

(1) became a retiree prior to the effective date, and was covered under the Supplemental Group Life Insurance Plan or Supplemental Death Benefit Plan immediatel to the effective date, or who

(2) becomes a retiree after the effective date after having been given the opportunity to elect and having elected continued coverage under the Supplemental Group Insurance Plan or Supplemental Death Benefit Plan.

(G) "Insurer" means the insurance company that is the issuer of the policy of insurance described in section 3.3(A) above.

(H) "Participant" means a covered executive, retiree, or grandfathered retiree, as the context requires.

(I) "Retiree"

(1) In General

"Retiree" has the meaning set out in the ExxonMobil Benefit Plans Common Provisions.

(2) Transition Severance Cases

(a) Treatment as Covered Annuitant

Solely for purposes of this Plan, a person who is described in paragraph (b) below shall be treated as if he or she were a retiree.

(b) Eligibility

A person is described in this paragraph (b) if the person

(i) terminates employment as a covered executive;

(ii) is at least 50 years old by the end of the month in which the termination of employment occurs;

(iii) has at least 10 years of benefit plan service (as defined in the ExxonMobil Benefit Plans Common Provisions) at the time of the termination of employment; and

(iv) upon termination of employment receives a benefit under the Exxon Transition Severance Plan.

(c) Termination of Provision

This paragraph (2) shall not apply to any person who fails to meet the eligibility requirements set out in paragraph (b) above on or before August 31, 200

(J) "Suspended retiree"

(1) In General

"Suspended Retiree" means a person who becomes a retiree by virtue of being incapacitated within the meaning of the ExxonMobil Disability Plan and commen long-term disability benefits under such Plan, but whose benefits under such Plan thereafter cease by virtue of

(a) the person no longer being incapacitated, or

(b) the person's failure to report non-rehabilitative employment.

(2) Period

A person remains a suspended retiree until the earlier of (1) the date the person attains age 55, or (2) the date the person commences his or her benefit or receives lump-sum settlement under the ExxonMobil Pension Plan, at which time the person is again considered a retiree.

EXHIBIT 10(

Resolutions Adopted by the Board of Directors
Regarding Non-Employee Director Restricted Stock Grants

September 26, 2007

RESOLVED, that, in accordance with Section VI of the Corporation's 2004 Non-Employee Director Restricted Stock Plan (the "Plan"):

(a) Each person who becomes a non-employee director for the first time after the date of this resolution shall be automatically granted an award of eight thousand (8,000) shares o restricted stock subject to the terms and conditions specified in the Plan, effective as of the date such person becomes a non-employee director; and

(b) Commencing with the year 2008, each incumbent non-employee director shall be automatically granted an award of two thousand five hundred (2,500) shares of restricted sto subject to the terms and conditions specified in the Plan, effective as of the first trading day of each year.

FURTHER RESOLVED, that the foregoing resolution shall remain in effect until modified or rescinded by further action of the Board of Directors.

FURTHER RESOLVED, that the resolutions regarding grants under the Plan adopted by the Board of Directors on July 28, 2004 be, and hereby are, revoked.

NOTES:

(1) *For the purposes of this list, if the registrant owns directly or indirectly approximately 50 percent of the voting securities of any person and approximately 50 percent voting securities of such person is owned directly or indirectly by another interest, or if the registrant includes its share of net income of any other unconsolidated per consolidated net income, such person is deemed to be a subsidiary.*

(2) *With respect to certain companies, shares in names of nominees and qualifying shares in names of directors are included in the above percentages.*

(3) *The names of other subsidiaries have been omitted from the above list since considered in the aggregate, they would not constitute a significant subsidiary under Securiti Exchange Commission Regulation S-X, Rule 1-02(w).*

(4) *The registrant owns directly or indirectly approximately 50 percent of the securities of this person and approximately 50 percent of the voting securities of this person is directly or indirectly by another single interest.*

(5) *The investment in this unconsolidated person is represented by the registrant's percentage interest in the underlying net assets of such person. The accounting for unconsolidated persons is referred to as the equity method of accounting.*

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We hereby consent to the incorporation by reference in the following Exxon Mobil Corporation Registration Statements on:
