The Dual Challenge

Meeting the world's growing demand for energy while managing the risks of climate change

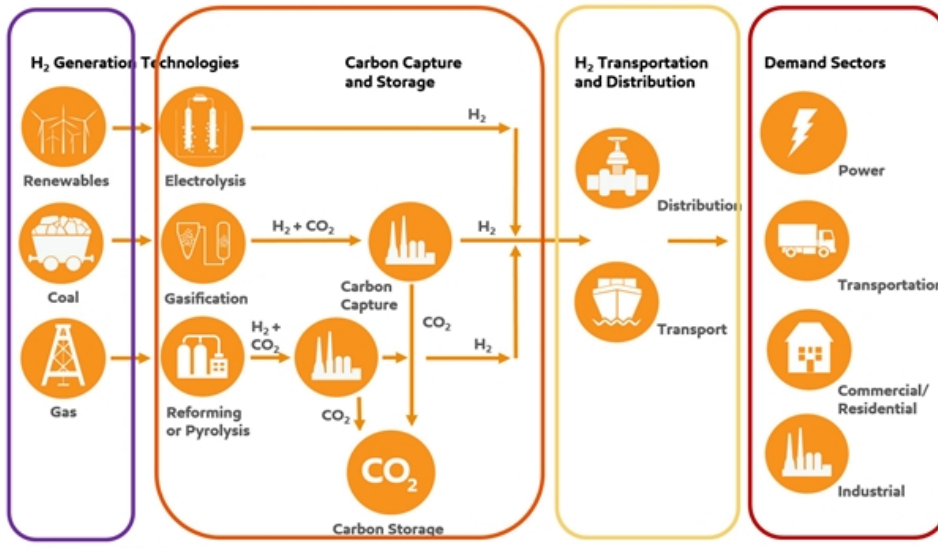

ExxonMobil's Climate Change Strategy Pillars

-  Mitigate emissions in our operations
-  Provide products to help customers reduce their emissions
-  Engage on climate change policy
-  Develop scalable technology solutions

ExxonMobil is one of the world's largest hydrogen producers and users, with extensive expertise.

Hydrogen Supply Chain Needs Policy Support

Key enabler: incentive such as carbon price to transition from lower cost options

ExxonMobil

Today's technologies are otherwise meeting demand directly.

Conversion to H₂ is added cost.

Transportation and distribution sectors generally need new facilities or upgrading to carry H₂.

Demand sectors generally need upgrading/replacement to use H₂.

Key Factors for Advancing Hydrogen

Widespread deployment will require coordinated government support

Policy Support:

- Incentive such as CO₂ price
- Fit within broader CO₂ abatement incentives
- Support for Carbon Capture and Storage (CCS)

Additional Factors:

- Cost
- Timing & Needs
- Other options, e.g: post-combustion CCS for power/industry
- Size & Scale
- Non-GHG Externalities
