#### 3. Discontinued Operations

In 2002, the copper business in Chile and the coal operations in Colombia were sold. Prior periods include reclassifications to reflect the earnings of these businesses as discontinued operations. Income taxes related to discontinued operations in the first quarter of 2002 were \$7 million. Revenues and earnings for these businesses were historically reported in the "All Other" line in the segment disclosures located in note 10 on page 12.

#### 4. Accounting Change

As of January 1, 2003 the corporation adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 143 (FAS 143), "Accounting for Asset Retirement Obligations." The primary impact of FAS 143 is to change the method of accruing for upstream site restoration costs. These costs were previously accrued ratably over the productive lives of the assets in accordance with Statement of Financial Accounting Standards No. 19 (FAS 19), "Financial Accounting and Reporting by Oil and Gas Producing Companies." At the end of 2002, the cumulative amount accrued under FAS 19 was approximately \$3.5 billion. Under FAS 143, the fair values of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations. Over time the liabilities will be accreted for the change in their present value and the initial capitalized costs will be depreciated over the useful lives of the related assets.

The cumulative adjustment for the change in accounting principle reported in the first quarter of 2003 was after-tax income of \$550 million (net of \$434 million of income tax effects, including ExxonMobil's share of related equity company income taxes of \$51 million), or \$0.08 per common share. The effect of this accounting change on the balance sheet was a \$0.3 billion increase to property, plant and equipment, a \$0.6 billion reduction to the accrued liability and a \$0.4 billion increase in deferred income tax liabilities.

This adjustment is due to the difference in the method of accruing site restoration costs under FAS 143 compared with the method required by FAS 19, the accounting standard that the corporation has been required to follow since 1978. Under FAS 19, site restoration costs are accrued on a unit of production basis of accounting as the oil and gas is produced. The FAS 19 method matches the accruals with the revenues generated from production and results in most of the costs being accrued early in field life, when production is at the highest level. Because FAS 143 requires accretion of the liability as a result of the passage of time using an interest method of allocation, the majority of the costs will be accrued towards the end of field life, when production is at the lowest level. The cumulative income adjustment described above resulted from reversing the higher liability accumulated under FAS 19 in order to adjust it to the lower present value amount resulting from transition to FAS 143. This amount being reversed in transition, which was previously charged to operating earnings under FAS 19, will again be charged to those earnings under FAS 143 in future years.

If FAS 143 had been in effect in the first quarter of 2002, net income that would have been reported in that quarter would not have been materially different from the net income that was reported under FAS 19. The effect of FAS 143 on net income in the current quarter is also not material.

#### 5. Recently Issued Statements of Financial Accounting Standards

In January 2003, the Financial Accounting Standards Board issued
Interpretation No. 46 (FIN 46), "Consolidation of Variable Interest
Entities," which provides guidance on when certain entities should be
consolidated or the interests in those entities should be disclosed by
enterprises that do not control them through majority voting interest.
Under FIN 46, entities are required to be consolidated by enterprises
that lack majority voting interest when equity investors of those
entities have insignificant capital at risk or they lack voting rights,
the obligation to absorb expected losses, or the right to receive
expected returns. Entities identified with these characteristics
are called variable interest entities and the interests that enterprises
have in these entities are called variable interests. These interests can
derive from certain guarantees, leases, loans or other arrangements that
result in risks and rewards that are disproportionate to the voting
interests in the entities.

The provisions of FIN 46 must be immediately applied for variable interest entities created after January 31, 2003. For variable interest entities created before February 1, 2003, FIN 46 must be adopted in the first reporting period beginning after June 15, 2003.

There have been no variable interest entities created after
January 31, 2003 in which the corporation has an interest. The corporation
is reviewing its financial arrangements entered into before
February 1, 2003 to identify any that might qualify as variable interest
entities. There is a reasonable possibility that certain joint ventures in
which the corporation has an interest might be variable interest entities.
These joint ventures are operating entities and the other equity investors
are third parties independent from the corporation. The corporation's
share of net income of these entities is included in the consolidated
statement of income. The variable interests arise primarily because of
certain guarantees extended by the corporation to the joint ventures.
These guarantees are disclosed in note 7 beginning on page 9.

The corporation does not expect any impact on net income if it is required to consolidate any of these possible variable interest entities because it already is recording its share of net income of these entities. The impact to the balance sheet would be an increase in both assets and liabilities, estimated to be in the range of \$500 million to \$750 million (less than one half of 1 percent of total assets). However, there would be no change to the calculation of return on average capital employed because the corporation already includes its share of joint venture debt in the determination of average capital employed.

#### 6. Merger of Exxon Corporation and Mobil Corporation

On November 30, 1999, a wholly-owned subsidiary of Exxon Corporation merged with Mobil Corporation so that Mobil became a wholly owned subsidiary of Exxon (the "Merger"). At the same time, Exxon changed its name to Exxon Mobil Corporation.

There were no merger related expenses in the first quarter of 2003
reflecting the completion of the merger related activities in 2002. In the
first quarter of 2002, merger related costs were \$83 million before tax
(\$60 million after tax). The severance reserve balance at the end of the
first quarter of 2003 is expected to be expended mainly in 2003 and 2004.
The following table summarizes the activity in the severance reserve for
the three months ended March 31, 2003:

## 7. Litigation and Other Contingencies

— A number of lawsuits, including class actions, were brought in various
— courts against Exxon Mobil Corporation and certain of its subsidiaries
— relating to the accidental release of crude oil from the tanker Exxon
— Valdez in 1989. The vast majority of the claims have been resolved leaving
— a few compensatory damages cases to be resolved. All of the punitive

In that trial, on September 24, 1996, the United States District Court for the District of Alaska entered a judgment in the amount of \$5 billion in punitive damages to a class composed of all persons and entities who asserted claims for punitive damages from the corporation as a result of the Exxon Valdez grounding. ExxonMobil appealed the judgment. On November 7, 2001, the United States Court of Appeals for the Ninth Circuit vacated the punitive damage award as being excessive under the Constitution and remanded the case to the District Court for it to determine the amount of the punitive damage award consistent with the Ninth Circuit's holding. On December 6, 2002, the District Court reduced the punitive damages award from \$5 billion to \$4 billion. This case will return to the Ninth Circuit for its determination. The corporation has posted a \$4.8 billion letter of credit.

On January 29, 1997, a settlement agreement was concluded resolving all remaining matters between the corporation and various insurers arising from the Valdez accident. Under terms of this settlement, ExxonMobil received \$480 million. Final income statement recognition of this settlement continues to be deferred in view of uncertainty regarding the ultimate cost to the corporation of the Valdez accident.

The ultimate cost to ExxonMobil from the lawsuits arising from the Exxon Valdez grounding is not possible to predict and may not be resolved for a number of years.

A dispute with a Dutch affiliate concerning an overlift of natural gas by a German affiliate was resolved by payments by the German affiliate pursuant to an arbitration award. The German affiliate had paid royalties on the excess gas and recovered the royalties in 2001. The only substantive issue remaining is the taxes payable on the final compensation for the overlift. Resolution of this issue will not have a materially adverse effect upon the corporation's operations or financial condition.

On December 19, 2000, a jury in Montgomery County, Alabama, returned a verdict against the corporation in a contract dispute over royalties in the amount of \$87.69 million in compensatory damages and \$3.42 billion in punitive damages in the case of Exxon Corporation v. State of Alabama, et al. The verdict was upheld by the trial court on May 4, 2001. On December 20, 2002, the Alabama Supreme Court vacated the \$3.5 billion jury verdict. The decision sends the case back to a lower court for a new trial. The ultimate outcome is not expected to have a materially adverse effect upon the corporation's operations or financial condition.

On May 22, 2001, a state court jury in New Orleans, Louisiana, returned a verdict against the corporation and three other entities in a case brought by a landowner claiming damage to his property. The property had been leased by the landowner to a company that performed pipe cleaning and storage services for customers, including the corporation. The jury awarded the plaintiff \$56 million in compensatory damages (90 percent to be paid by the corporation) and \$1 billion in punitive damages (all to be paid by the corporation). The damage related to the presence of naturally occurring radioactive material (NORM) on the site resulting from pipe cleaning operations. The award has been upheld at the trial court. ExxonMobil has appealed the judgment to the Louisiana Fourth Circuit Court of Appeals and believes that the judgment should

be set aside or substantially reduced on factual and constitutional grounds. The ultimate outcome is not expected to have a materially adverse effect upon the corporation's operations or financial condition.

The U.S. Tax Court has decided the issue with respect to the pricing of crude oil purchased from Saudi Arabia for the years 1979-1981 in favor of the corporation. This decision is subject to appeal. Certain other issues for the years 1979-1993 remain pending before the Tax Court. The ultimate resolution of these issues is not expected to have a materially adverse effect upon the corporation's operations or financial condition.

Claims for substantial amounts have been made against ExxonMobil and certain of its consolidated subsidiaries in other pending lawsuits, the outcome of which is not expected to have a materially adverse effect upon the corporation's operations or financial condition.

The corporation and certain of its consolidated subsidiaries were contingently liable at March 31, 2003, for \$3.4 billion, primarily relating to guarantees for notes, loans and performance under contracts. This included \$0.8 billion representing guarantees of non-U.S. excise taxes and customs duties of other companies, entered into as a normal

business practice, under reciprocal arrangements. Also included in this amount were guarantees by consolidated affiliates of \$2.2 billion, representing ExxonMobil's share of obligations of certain equity companies. Additionally, the corporation and its affiliates have numerous long-term sales and purchase commitments in their various business activities, all of which are expected to be fulfilled with no adverse consequences material to the corporation's operations or financial condition. corporation's outstanding unconditional purchase obligations at March 31, 2003 were similar to those at the prior year-end period. Unconditional purchase obligations as defined by accounting standards are those long-term commitments that are noncancelable or cancelable only under certain conditions, and that third parties have used to secure financing for the facilities that will provide the contracted goods or services. The operations and earnings of the corporation and its affiliates throughout the world have been, and may in the future be affected from time to time in varying degree by political developments and laws and regulations, such as forced divestiture of assets; restrictions on production, imports and exports; price controls; tax increases and retroactive tax claims; expropriation of property; cancellation of contract rights and environmental regulations. Both the likelihood of such occurrences and their overall effect upon the corporation vary greatly from country to country and are not predictable. Nonowner Changes in Shareholders' Equity Three Months Ended March 31, 2002 2003 <del>(millions of dollars)</del> Net income \$ 7,040 \$ 2,090 Changes in other nonowner changes in equity Foreign exchange translation adjustment (130)Minimum pension liability adjustment Θ Unrealized gains/(losses) on stock investments 52 Total nonowner changes in shareholders' equity \$ 7,566 \$ 2,012 -10-9. #### 10. Disclosures about Segments and Related Information

Consistent with a change in internal organization in 2002, earnings from the electric power business and U.S. coal operations, previously reported in the All Other line, are now shown in the U.S. upstream for coal and non U.S. upstream for electric power. Earnings from the coal and minerals businesses divested in 2002, reported as discontinued operations, are included in the All Other line. Earnings and revenues for prior periods have been reclassified to reflect these 2002 events consistent with current period reporting.

-17

#### REVIEW OF FIRST QUARTER 2003 RESULTS

Exxon Mobil Corporation estimated net income of \$7,040 million (\$1.05 per share) in the first quarter of 2003, an increase of \$4,950 million from the first quarter of 2002. Net income included a \$550 million positive impact from the required adoption of FAS 143 relating to accounting for asset retirement obligations. Net income also included a one-time gain of \$1,700 million in the non-U.S. upstream from the transfer of shares in Ruhrgas AG, a German gas transmission company. The Ruhrgas shares were acquired by E.ON AG in March 2003.

Revenue for the first quarter of 2003 totaled \$63,780 million compared with \$43,393 million in 2002. In the first quarter, ExxonMobil continued its active investment program, spending \$3,496 million on capital and exploration projects, compared with \$2,974 million last year, reflecting continued growth in upstream spending.

First quarter earnings were strong and improved in all parts of the business. Capex continued to grow consistent with our long-term investment plans. Asset management steps continued to produce positive results.

Upstream earnings, including the Ruhrgas gain, were a record \$5,693 million, an increase of \$3,604 million from first quarter 2002 results reflecting higher realizations on sales of crude oil and natural gas. Average crude prices for the quarter were at historical highs reflecting the temporary effects of the national strike in Venezuela and civil unrest in Nigeria as well as market speculation on the impacts from war in Iraq. Natural gas prices were higher primarily due to cold weather in the United States. Both crude and natural gas prices fell during March and are significantly lower thus far in the second quarter. On an oil equivalent basis, production increased 2 percent excluding the effects of the national strike in Venezuela, lower entitlements caused by higher prices and changes in OPEC quotas. Actual oil equivalent production, including these impacts, was flat. Plans for long term capacity increases remain on track as reflected by higher capital spending.

Downstream earnings were \$723 million, an increase of \$751 million from last year's very weak first quarter, reflecting improved industry wide conditions. Refining and marketing margins were higher in most areas worldwide. Chemicals

earnings of \$287 million were up \$155 million from last year's first quarter. Earnings benefited from record volumes, which were up 4 percent from last year.

During the quarter, the corporation acquired 35 million shares at a gross cost of \$1,191 million to offset the dilution associated with benefit plans and to reduce common stock outstanding.

OTHER COMMENTS ON FIRST QUARTER 2003 COMPARED TO FIRST QUARTER 2002

Upstream earnings, including the \$1,700 million Ruhrgas gain, were \$5,693 million, an increase of \$3,604 million from the first quarter 2002 reflecting higher crude oil and natural gas realizations. Liquids production of 2,506 kbd (thousands of barrels per day) decreased from 2,541 kbd in the first quarter of 2002. Higher production in Nigeria and Canada, and reduced OPEC quota restrictions in Abu Dhabi, were more than offset by supply disruptions in Venezuela, lower entitlements and natural field declines in mature areas. Excluding the strike related effects in Venezuela and entitlement/quota impacts, liquids production was flat in the first quarter versus last year. First quarter natural gas production increased to 12,048 mcfd (millions of cubic feet per day), compared with 11,740 mcfd last year. Higher weather related demand in Europe more than offset natural field decline in mature areas.

-18-

Earnings from U.S. upstream operations were \$1,259 million, up \$811 million. Non U.S. upstream earnings of \$4,434 million were \$2,793 million higher than last year's first quarter including the \$1,700 million Ruhrgas gain.

Downstream earnings of \$723 million, representing about 2 cents per gallon, increased \$751 million from the first quarter of last year reflecting the recovery in worldwide refining and marketing margins from very weak conditions. Petroleum product sales were 7,861 kbd, 186 kbd higher than last year's first quarter.

U.S. downstream earnings were \$174 million, up \$160 million due to higher refining and marketing margins. Non-U.S. downstream earnings of \$549 million were \$591 million higher than last year's first quarter. In addition to margin effects, non U.S. downstream results benefited from the absence of negative foreign exchange effects in Argentina in the first quarter of 2002.

Chemicals earnings of \$287 million were up \$155 million from the same quarter a year ago due to higher volumes, improved non U.S. margins and favorable foreign exchange effects. Prime product sales of 7,000 kt (thousands of metric tons) were up 280 kt, reflecting higher demand in key commodity businesses across most regions.

Corporate and financing expenses of \$213 million increased \$143 million mainly due to higher U.S. pension costs.

#### MERGER OF EXXON CORPORATION AND MOBIL CORPORATION

On November 30, 1999, a wholly-owned subsidiary of Exxon Corporation merged with Mobil Corporation so that Mobil became a wholly-owned subsidiary of Exxon (the "Merger"). At the same time, Exxon changed its name to Exxon Mobil Corporation.

There were no merger related expenses in the first quarter of 2003 reflecting the completion of the merger related activities in 2002. In the first quarter of 2002, merger related costs were \$83 million before tax (\$60 million after tax). The severance reserve balance at the end of the first quarter of 2003 is expected to be expended mainly in 2003 and 2004. The following table summarizes the activity in the severance reserve for the three months ended March 31, 2003:

Opening			Balance at
. •			
	- Additions	- Deductions	Period End
		<u> </u>	
	(millions	of dollars)	
101	(millions	of dollars)	97

## LIQUIDITY AND CAPITAL RESOURCES

Net cash generation before financing activities was \$7,911 million in the first three months of 2003 versus \$3,387 million in the same period last year.

Operating activities provided net cash of \$8,646 million, an increase of \$4,022

million from the prior year, influenced by higher net income.

Investing activities used net eash of \$735 million, compared to a net use of \$1,237 million in the prior year, reflecting higher proceeds from asset divestments and higher additions to property, plant, and equipment.

-19-

Net income in 2003 included a one-time gain of \$1,700 million from the transfer of ExxonMobil's interests in the Ruhrgas AG shares. The shares were valued at approximately \$2.6 billion. In the third quarter of 2002, a loan of \$1.5 billion was received in connection with the restructuring of BEB Erdgas und Erdoel GmbH that allowed for the transfer of the Ruhrgas shares. The remainder was received upon completion of the share transaction and has been reported as proceeds from sales of investments in the current period. The "All other items—net" line in the current year includes an adjustment of the non cash net income gain included in first quarter 2003 for the cash received and reported in the third quarter of 2002 and the cash received and reported in the third activities this quarter.

Net cash used in financing activities was \$2,944 million in the first quarter of 2003 versus \$3,284 million in the same quarter last year reflecting a lower level of debt reductions and purchases of ExxonMobil stock in the current year.

During the first quarter of 2003, Exxon Mobil Corporation purchased 35 million shares of its common stock for the treasury at a gross cost of \$1,191 million. These purchases were to offset shares issued in conjunction with company benefit plans and programs and to reduce the number of shares outstanding. Shares outstanding were reduced from 6,700 million at the end of 2002 to 6,670 million at the end of the first quarter 2003. Purchases may be made in both the open market and through negotiated transactions, and may be discontinued at any time.

Revenue for the first quarter of 2003 totaled \$63,780 million compared to \$43,393 million in the first quarter 2002 reflecting significantly higher prices.

Income and other taxes for the first quarter of \$18,684 million were up \$4,121 million compared to last year. First quarter 2003 income tax expense was \$3,388 million and the effective tax rate was 36.4 percent, compared to \$1,265 million and 41.9 percent, respectively, in the prior year quarter. The increase in income tax expense reflects higher pre-tax income. Excluding the income tax effects of the gain on the Ruhrgas share transfer, the effective rate in the current quarter was similar to the prior year quarter. During both periods, the corporation continued to benefit from the favorable resolution of tax related issues.

Capital and exploration expenditures were \$3,496 million in the first quarter 2003 compared to \$2,974 million in last year's first quarter. In 2003, capital and exploration investments are expected to be about \$14 billion, similar to 2002 and reflecting the continued spending on ExxonMobil's large portfolio of upstream projects.

Total debt of \$10.7 billion at March 31, 2003 was comparable to year end 2002. The corporation's debt to total capital ratio was 11.5 percent at the end of the first quarter of 2003, compared to 12.2 percent at year end 2002.

Although the corporation issues long-term debt from time to time and maintains a revolving commercial paper program, internally generated funds cover the majority of its financial requirements.

Litigation and other contingencies are discussed in note 7 to the unaudited condensed consolidated financial statements. There are no events or uncertainties known to management beyond those already included in reported financial information that would indicate a material change in future operating results or future financial condition.

-20-

The corporation, as part of its ongoing asset management program, continues to evaluate its mix of assets for potential upgrade. Because of the ongoing nature of this program, dispositions will continue to be made from time to time which will result in either gains or losses.

	or conditions are forward-looking statements. Actual future
	s; production growth; financing sources; the resolution of pencies; the effect of changes in prices, interest rates and other
	conditions; and environmental and capital and exploration
	tures could differ materially depending on a number of factors, the outcome of commercial negotiations; changes in the supply of
	nand for crude oil, natural gas and petroleum and petrochemical es; and other factors discussed above and discussed under the
	" "Factors Affecting Future Results" in Item 1 of ExxonMobil's 2002

	As indicated in the cortifications on pages 26 through 29 of this
	As indicated in the certifications on pages 26 through 28 of this report, the corporation's principal executive officer, principal
	accounting officer and principal financial office have evaluated the
	corporation's disclosure controls and procedures as of March 31, 2003.  Based on that evaluation, these officers have concluded that the
	corporation's disclosure controls and procedures are effective for the
	purpose of ensuring that material information required to be in this
	quarterly report is made known to them by others on a timely basis.
	There have not been changes in the corporation's internal controls or
	in other factors that could significantly affect these controls
	subsequent to the date of this evaluation.
<del>Item 1.</del>	Legal Proceedings
	The Texas Commission on Environmental Quality (TCEQ) has issued a
	<ul> <li>Notice of Enforcement Action dated March 27, 2003, alleging violations</li> <li>of certain reporting, calculation, and documentation requirements</li> </ul>
	under the Texas Clean Air Act and related implementing and operating
	permit regulations in connection with upset events at the
	corporation's Means Gas Conditioning Facility in Andrews County,
	Texas. These administrative issues have been corrected. The Notice
	also alleges that emissions associated with the identified events
	violated the facility's air permit. The corporation does not believe
	the events identified in the Notice constitute permit violations. TCE(
	has offered to settle the alleged violations for \$177,100 but
	negotiations are ongoing.
	The Maccachucette Department of Environmental Dretection (MDED) bea
	The Massachusetts Department of Environmental Protection (MDEP) has
	issued a Notice of Enforcement received on January 22, 2003, alleging
	that certain reports relating to remediation activities at certain
	service stations and distribution terminals in Massachusetts were not
	- submitted within the deadlines provided under the Massachusetts
	Contingency Plan. The corporation believes a penalty is not warranted
	in this matter. The MDEP has indicated it may seek aggregate
	penalties in excess of \$500,000 but discussions with the agency are a

Item 5.	Other Information
<b></b>	
	Due to a change in the administrator for the ExxonMobil Savings Plan,
	there were limitations on ExxonMobil stock transactions within the
	Plan during a brief transition period at the end of April, 2003. While
	this transition period may not have met the definition of a "blackout
	period" under Rule 102 of Regulation BTR, securities transactions by

ExxonMobil directors and officers were restricted as if Regulation BTR did apply. Notice to this effect was provided to ExxonMobil's

	directors and officers and was also furnished to the SEC under Item 9 of a Current Report on Form 8-K on March 10, 2003.
