SCRIPT

TITLE: THE SEARCH FOR SCALEABLE SOLUTIONS

TITLE: CCS

TITLE: CARBON CAPTURE AND SEQUESTRATION

VJ: Carbon capture and sequestration (CCS)

TITLE: A NECESSARY ELEMENT OF A 2° PATHWAY

VJ: is a necessary element of a 2° pathway or a low-emissions pathway.

TITLE: THE IEA BELIEVE THAT

VJ: We believe that, the IEA believes that.

VJ: We've been doing it for over 40 years.

TITLE: EXXONMOBIL IS THE LARGEST PRACTITIONER OF CCS

VJ: And we are the largest practitioner of CCS.

VJ: We know how to do it.

VJ: We know it can be done safely.

VJ: Now the challenge we have is we have to come up with alternate technologies

VJ: because CCS is expensive and it is energy intensive.

TITLE: CCS IS A BIG PIECE OF OUR R&D PORTFOLIO

VJ: CCS is a big piece of our R&D portfolio.

VJ: And much like other elements in our R&D portfolio,

TITLE: WE COVER THE WHOLE BANDWIDTH OF RESEARCH

VJ: we cover the entire bandwidth of research.

VJ: From fundamental research at universities, like the University of Genoa in Italy.

VJ: All the way through smaller companies like FuelCell Energy, who is the manufacturer of the carbonate fuel cell.

TITLE: PLAYING THE ROLE OF INTEGRATOR

VJ: We're playing the role of the integrator,

TITLE: FROM FUNDAMENTAL SCIENCE ALL THE WAY TO SCALE

VJ: across the fundamental science, all the way to scale.

VJ: That's a bit of a different approach.

VJ: We want to help shape that research.

VJ: We also want to shape the first deployment, which is often done by small companies.

TITLE: DIRECT AIR CAPTURE

VJ: Direct air capture is taking the CO2 directly out of the air.

VJ: The only way to have negative CO2 is to either pull it out of the air, as a synthetic approach, direct air capture.

VJ: Or to do some sort of a natural sink.

VJ: We believe a synthetic approach, an engineering approach to direct air capture would be far faster.

TITLE: WORKING WITH UNIVERSITIES

VJ: And again by working with the universities like Georgia Tech, who are pioneers in some of the materials.

VJ: UC Berkeley, pioneers in some of the materials.

TITLE: WORKING WITH COMPANIES

VJ: And then working with companies like Mosaic and Global Thermostat, one is more of a materials company, one is more of an engineering company.

VJ: And now beginning to connect all those dots.

VJ: We want each step to be consistent with the questions we need answered to be able to take it to scale.

TITLE: DOING THINGS IN PARALLEL

TITLE: TO PROVIDE SOLUTIONS TO SOCIETY FASTER

VJ: By doing things in parallel, we think we will be able to provide solutions to society faster.

TITLE: FOLLOW OUR PROGRESS ON SOLVING THE DUAL CHALLENGE
