## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

### Note 1. Basis of Financial Statement Preparation

These unaudited condensed consolidated financial statements should be read in the context of the consolidated financial statements and notes thereto filed with the Securities and Exchange Commission in the Corporation's 2021 Annual Report on Form 10-K. In the opinion of the Corporation, the information furnished herein reflects all known accruals and adjustments necessary for a fair statement of the results for the periods reported herein. All such adjustments are of a normal recurring nature. Prior data has been reclassified in certain cases to conform to the current presentation basis.

The Corporation's exploration and production activities are accounted for under the "successful efforts" method.

### Note 2. Russia

In response to Russia's military action in Ukraine, the Corporation announced in early 2022 that it plans to discontinue operations on the Sakhalin-1 project ("Sakhalin") and develop steps to exit the venture. In light of this, an impairment assessment was conducted, and management determined that the carrying value of the asset group was not recoverable. As a result, the Corporation's first quarter earnings included after-tax charges of \$3.4 billion largely representing the impairment of its operations related to Sakhalin. On a before-tax basis, the charges amounted to \$4.6 billion, substantially all of which is reflected in the line captioned "Depreciation and depletion (including impairments)" on the Condensed Consolidated Statement of Income. The Corporation's exit from the project would result in quantities estimated at 150 million oil-equivalent barrels no longer qualifying as proved reserves, which represented less than one percent of the Corporation's 18.5 billion oil-equivalent barrels of proved reserves at year-end 2021.

### Note 3. Litigation and Other Contingencies

#### Litigation

A variety of claims have been made against ExxonMobil and certain of its consolidated subsidiaries in a number of pending lawsuits. Management has regular litigation reviews, including updates from corporate and outside counsel, to assess the need for accounting recognition or disclosure of these contingencies. The Corporation accrues an undiscounted liability for those contingencies where the incurrence of a loss is probable and the amount can be reasonably estimated. If a range of amounts can be reasonably estimated and no amount within the range is a better estimate than any other amount, then the minimum of the range is accrued. The Corporation does not record liabilities when the likelihood that the liability has been incurred is probable but the amount cannot be reasonably estimated or when the liability is believed to be only reasonably possible or remote. For contingencies where an unfavorable outcome is reasonably possible and which are significant, the Corporation discloses the nature of the contingency and, where feasible, an estimate of the possible loss. For purposes of our contingency disclosures, "significant" includes material matters, as well as other matters which management believes should be disclosed. ExxonMobil will continue to defend itself vigorously in these matters. Based on a consideration of all relevant facts and circumstances, the Corporation does not believe the ultimate outcome of any currently pending lawsuit against ExxonMobil will have a material adverse effect upon the Corporation's operations, financial condition, or financial statements taken as a whole.

#### Other Contingencies

The Corporation and certain of its consolidated subsidiaries were contingently liable at June 30, 2022, for guarantees relating to notes, loans and performance under contracts. Where guarantees for environmental remediation and other similar matters do not include a stated cap, the amounts reflect management's estimate of the maximum potential exposure. These guarantees are not reasonably likely to have a material effect on the Corporation's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

<b>Total</b>	<b>1,895</b>	<b>6,047</b>	<b>7,942</b>

*(1) ExxonMobil share*

Additionally, the Corporation and its affiliates have numerous long-term sales and purchase commitments in their various business activities, all of which are expected to be fulfilled with no adverse consequences material to the Corporation's operations or financial condition.

The operations and earnings of the Corporation and its affiliates throughout the world have been, and may in the future be, affected from time to time in varying degree by political developments and laws and regulations, such as forced divestiture of assets; restrictions on production, imports and exports; price controls; tax increases and retroactive tax claims; expropriation of property; cancellation of contract rights; sanctions and environmental regulations. Both the likelihood of such occurrences and their overall effect upon the Corporation vary greatly from country to country and are not predictable.

(3) Included in the Balance Sheet lines: Investments, advances and long-term receivables and Other assets, including intangibles - net

(4) Included in the Balance Sheet lines: Accounts payable and accrued liabilities and Other long-term obligations

(5) Excluding finance lease obligations

(6) Advances to/receivables from equity companies and long-term obligations to equity companies are mainly designated as hierarchy level 3 inputs. The fair value is calculated by discounting the remaining obligations by a rate consistent with the credit quality and industry of the company.

(7) Included in the Balance Sheet line: Other long-term obligations. Includes contingent consideration related to a prior year acquisition where fair value is based on expected drilling activities and discount rates.

At June 30, 2022 and December 31, 2021, respectively, the Corporation had \$1,403 million and \$641 million of collateral under master netting arrangements not offset against the derivatives on the Consolidated Balance Sheet, primarily related to initial margin requirements.

The Corporation may use non-derivative financial instruments, such as its foreign currency-denominated debt, as hedges of its net investments in certain foreign subsidiaries. Under this method, the change in the carrying value of the financial instruments due to foreign exchange fluctuations is reported in accumulated other comprehensive income. As of June 30, 2022, the

Corporation has designated \$4.7 billion of its Euro-denominated long-term debt and related accrued interest as a net investment hedge of its European business. The net investment hedge is deemed to be perfectly effective.

The Corporation had undrawn short-term committed lines of credit of \$10.6 billion, of which \$10 billion will expire without renewal in the third quarter, and undrawn long-term committed lines of credit of \$0.4 billion as of second quarter 2022.

### Derivative Instruments

The Corporation's size, strong capital structure, geographic diversity and the complementary nature of our business segments reduce the Corporation's enterprise-wide risk from changes in commodity prices, currency rates and interest rates. In addition, the Corporation uses commodity-based contracts, including derivatives, to manage commodity price risk and to generate returns from trading. Commodity contracts held for trading purposes are presented in the Condensed Consolidated Statement of Income on a net basis in the line "Sales and other operating revenue". The Corporation's commodity derivatives are not accounted for under hedge accounting. At times, the Corporation also enters into currency and interest rate derivatives, none of which are material to the Corporation's financial position as of June 30, 2022 and December 31, 2021, or results of operations for the periods ended June 30, 2022 and 2021.

Credit risk associated with the Corporation's derivative position is mitigated by several factors, including the use of derivative clearing exchanges and the quality of and financial limits placed on derivative counterparties. The Corporation maintains a system of controls that includes the authorization, reporting and monitoring of derivative activity.

The net notional long/(short) position of derivative instruments at June 30, 2022 and December 31, 2021, was as follows:

<i>(millions)</i>	June 30, 2022	December 31, 2021
Crude oil (barrels)	47	82
Petroleum products (barrels)	(39)	(48)

### Note 8. Disclosures about Segments and Related Information

Effective April 1, 2022, the Corporation streamlined its business structure by combining the Chemical and Downstream businesses into a single business, Product Solutions. Product Solutions consists of three operating segments:

- Energy Products: Fuels, aromatics, and catalysts and licensing
- Chemical Products: Olefins, polyethylene, polypropylene, and intermediates
- Specialty Products: Finished lubricants, basestocks and waxes, synthetics, and elastomers and resins

Information disclosed in this note has been recast for the new segmentation.

Trade receivables in Notes and accounts receivable – net reported on the Balance Sheet include both receivables within the scope of ASC 606 and those outside the scope of ASC 606. Revenue and receivables outside the scope of ASC 606 primarily relate to physically settled commodity contracts accounted for as derivatives. Credit quality and type of customer are generally similar between those revenues and receivables within the scope of ASC 606 and those outside it.

(2) Revenue is determined by primary country of operations. Excludes certain sales and other operating revenues in Non-U.S. operations where attribution to a specific country is not practicable.

## **Note 9. Divestment Activities**

In February 2022, the Corporation signed an agreement with Seplat Energy Offshore Limited for the sale of Mobil Producing Nigeria Unlimited. The agreement is subject to certain conditions precedent and government approvals. In early July, a Nigerian court issued an order to halt transition activities and enter into arbitration with the Nigerian National Petroleum Company. The closing date and any loss on sale will depend on resolution of these matters.

In May 2022, the Corporation signed an agreement for the sale of ExxonMobil Exploration and Production Romania, consisting of certain unproved Upstream assets, to Romgaz S.A. The transaction closed in the third quarter, and the Corporation will recognize a gain on the sale of approximately \$300 million.

In June 2022, the Corporation signed an agreement with Whitecap Resources Inc. for the sale of XTO Energy Canada, consisting of Upstream unconventional assets in central Alberta. The agreed sales price is subject to interim period adjustments from May 1, 2022 to the closing date. The transaction is anticipated to close in the third quarter, and the Corporation expects to recognize a gain on the sale of approximately \$300 million.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

During the COVID-19 pandemic, industry investment to maintain and increase production capacity was restrained to preserve capital, resulting in underinvestment and supply tightness as demand for petroleum and petrochemical products recovered. In addition, industry rationalization of refining capacity resulted in more than 3 million barrels per day of capacity being taken offline. Across late 2021 and the first half of 2022, this dynamic, along with supply chain constraints, and a continuation of demand recovery led to a steady increase in oil and natural gas prices and refining margins. In the first half of 2022, tightness in the oil and natural gas markets was further exacerbated by Russia's invasion of Ukraine and subsequent sanctions imposed upon business and other activities in Russia. The price of Brent crude oil and certain regional natural gas indicators increased to levels not seen for several years, and both natural gas realizations and industry refining margins improved to levels well above the 10-year range. By the end of the second quarter, high prices had led to a tempering of demand for some products. Commodity and product prices are expected to remain volatile given the current global economic uncertainty and geopolitical events affecting supply and demand.

In response to Russia's military action in Ukraine, the Corporation announced in early 2022 that it plans to discontinue operations on the Sakhalin-1 project ("Sakhalin") and develop steps to exit the venture. The Corporation remains focused on protecting the safety of employees, operations, and the environment. The Corporation is complying with all applicable laws and sanctions and is currently engaged in transitioning Sakhalin-1 operating activities to another party.

The Corporation's first quarter results included after-tax charges of \$3.4 billion largely representing the impairment of its operations related to Sakhalin (see Note 2 to Condensed Consolidated Financial Statements). Efforts to transition operatorship to a third party and exit the venture are expected to result in minimal hydrocarbon sales and cash flows for the Corporation's account in future periods. For reference, excluding the impact of impairments and other charges, after-tax earnings related to the Corporation's interest in Sakhalin during the first half of 2022 were approximately \$0.3 billion, and combined oil and gas production was approximately 45 thousand oil-equivalent barrels per day. The Corporation's exit from the project would result in quantities estimated at 150 million oil-equivalent barrels no longer qualifying as proved reserves, which represented less than one percent of the Corporation's 18.5 billion oil-equivalent barrels of proved reserves at year-end 2021.

The Corporation holds a 25% interest in Tengizchevroil, LLP (TCO), which operates the Tengiz and Korolev oil fields in Kazakhstan, and holds a 16.8% working interest in the Kashagan field in Kazakhstan. Oil production from those operations is exported through the Caspian Pipeline Consortium (CPC) pipeline, in which the Corporation holds a 7.5% interest. CPC traverses parts of Kazakhstan and Russia to tanker-loading facilities on the Russian coast of the Black Sea. In the event that existing sanctions related to Russia's military actions in Ukraine expand, new sanctions are imposed, countermeasures are employed by the Russian Federation, or other direct or indirect impacts arise, it is possible that the transportation of Kazakhstan oil through the CPC pipeline could be disrupted, curtailed, temporarily suspended, or otherwise restricted. In such a case, the Corporation could experience a loss of cash flows of uncertain duration. For reference, after-tax earnings related to the Corporation's interests in Kazakhstan for the first half of 2022 were \$1.5 billion, and its share of combined oil and gas production was approximately 250 thousand oil-equivalent barrels per day.

Effective April 1, 2022, the Corporation streamlined its business structure by combining the Chemical and Downstream businesses into a single business, Product Solutions. The new business is focused on growing high-value products, improving competitiveness and leading in sustainability. Product Solutions consists of three operating segments:

- Energy Products: Fuels, aromatics, and catalysts and licensing
- Chemical Products: Olefins, polyethylene, polypropylene, and intermediates
- Specialty Products: Finished lubricants, basestocks and waxes, synthetics, and elastomers and resins

Further information on financial performance related to the new segments are disclosed in Management's Discussion and Analysis and Note 8 to the Condensed Consolidated Financial Statements.

## FUNCTIONAL EARNINGS SUMMARY

Earnings (loss) excluding Identified Items, are earnings (loss) excluding individually significant non-operational events with an absolute corporate total earnings impact of at least \$250 million in a given quarter. The earnings (loss) impact of an Identified Item for an individual segment in a given quarter may be less than \$250 million when the item impacts several segments or several periods. Management uses these figures to improve comparability of the underlying business across multiple periods by isolating and removing significant non-operational events from business results. The Corporation believes this view provides investors increased transparency into business results and trends, and provides investors with a view of the business as seen through the eyes of management. Earnings (loss) excluding Identified Items is not meant to be viewed in isolation or as a substitute for net income (loss) attributable to ExxonMobil as prepared in accordance with U.S. GAAP.

## REVIEW OF SECOND QUARTER 2022 RESULTS

ExxonMobil's second quarter 2022 earnings were \$17.9 billion, or \$4.21 per diluted share, compared with earnings of \$4.7 billion a year earlier. The increase in earnings was driven by higher Upstream realizations and Energy Products margins. Capital and exploration expenditures were \$4.6 billion, up \$0.8 billion from second quarter 2021.

Earnings for the first six months of 2022 were \$23.3 billion, or \$5.49 per diluted share, compared with \$7.4 billion a year earlier. Capital and exploration expenditures were \$9.5 billion, up \$2.6 billion from 2021. The Corporation distributed \$7.5 billion in dividends to shareholders and repurchased \$6.1 billion of common stock.

### Upstream Second Quarter Earnings Factor Analysis

(millions of dollars)

Price – Higher realizations increased earnings by \$7,900 million as average realizations for crude oil increased 71%, while natural gas realizations increased 186%.

Volume/Mix – Higher volumes increased earnings by \$440 million, reflecting growth in Guyana and Permian and eased curtailments, partly offset by downtime, lower entitlements, and decline.

Other – All other items decreased earnings by \$450 million due to divestment-related impairments and absence of prior year one-time tax impacts.

Identified Items (1) – 2Q 2022 \$299 million gain on the sale of U.S. Barnett Shale assets.

## Upstream Year-to-Date Earnings Factor Analysis

(millions of dollars)

Price – Higher realizations increased earnings by \$13,830 million as average realizations for crude oil increased 69% and natural gas realizations increased 161%.

Volume/Mix – Unfavorable volume and mix effects decreased earnings by \$380 million, reflecting impacts from the reduced Groningen gas production limit in Netherlands, higher downtime including the effects of weather in the first quarter, and lower entitlements due to prices, partly offset by growth in Permian and Guyana.

Other – All other items decreased earnings by \$370 million due to divestment-related impairments and the absence of prior year one-time tax impacts.

Identified Items (1) – 2022 \$(2,956) million loss as a result of the company's plans to discontinue operations on the Russia Sakhalin-1 project, partly offset by a gain on the sale of U.S. Barnett Shale assets.

### 2Q 2022 versus 2Q 2021

Liquids production – 2.3 million barrels per day increased 98 thousand barrels per day from 2Q 2021, reflecting growth in Permian and Guyana and easing government-mandated curtailments, partly offset by lower entitlements due to higher prices, higher downtime, and divestments.

Natural gas production available for sale – 8.6 billion cubic feet per day increased 312 million cubic feet per day from 2Q 2021, reflecting reduced scheduled maintenance, partly offset by lower entitlements and divestments.

### YTD 2022 versus YTD 2021

Liquids production – 2.3 million barrels per day increased 53 thousand barrels per day from 2021, reflecting growth in Permian and Guyana and easing government-mandated curtailments, partly offset by lower entitlements due to higher prices, higher downtime including the effects of weather in the first quarter of 2022, and divestments.

Natural gas production available for sale – 8.5 billion cubic feet per day decreased 201 million cubic feet per day from 2021, reflecting impacts from the reduced Groningen production limit, divestments, and entitlements.

(1) Natural gas is converted to an oil-equivalent basis at six million cubic feet per one thousand barrels.

Listed below are descriptions of ExxonMobil's volumes reconciliation factors which are provided to facilitate understanding of the terms.

*Entitlements - Net Interest* are changes to ExxonMobil's share of production volumes caused by non-operational changes to volume-determining factors. These factors consist of net interest changes specified in Production Sharing Contracts (PSCs) which typically occur when cumulative investment returns or production volumes achieve defined thresholds, changes in equity upon achieving pay-out in partner investment carry situations, equity redeterminations as specified in venture agreements, or as a result of the termination or expiry of a concession. Once a net interest change has occurred, it typically will not be reversed by subsequent events, such as lower crude oil prices.

*Entitlements - Price, Spend and Other* are changes to ExxonMobil's share of production volumes resulting from temporary changes to non-operational volume-determining factors. These factors include changes in oil and gas prices or spending levels from one period to another. According to the terms of contractual arrangements or government royalty regimes, price or spending variability can increase or decrease royalty burdens and/or volumes attributable to ExxonMobil. For example, at higher prices, fewer barrels are required for ExxonMobil to recover its costs. These effects generally vary from period to period with field spending patterns or market prices for oil and natural gas. Such factors can also include other temporary changes in net interest as dictated by specific provisions in production agreements.

*Government Mandates* are changes to ExxonMobil's sustainable production levels as a result of temporary non-operational production limits or sanctions imposed by governments, generally upon a country, sector, type or method of production.

*Divestments* are reductions in ExxonMobil's production arising from commercial arrangements to fully or partially reduce equity in a field or asset in exchange for financial or other economic consideration.

*Other* comprise all other operational and non-operational factors not covered by the above definitions that may affect volumes attributable to ExxonMobil. Such factors include, but are not limited to, production enhancements from project and work program activities, acquisitions including additions from asset exchanges, downtime, market demand, natural field decline, and any fiscal or commercial terms that do not affect entitlements.

*Because of the ongoing nature of our asset management and divestment program, we believe it is useful for investors to consider proceeds associated with asset sales together with cash provided by operating activities when evaluating cash available for investment in the business and financing activities, including shareholder distributions.*

Cash flow from operations and asset sales in the second quarter of 2022 was \$20.9 billion, an increase of \$11.0 billion from the comparable 2021 period primarily reflecting higher earnings.

Cash provided by operating activities totaled \$34.8 billion for the first six months of 2022, \$15.8 billion higher than 2021. Net income including noncontrolling interests was \$24.3 billion, an increase of \$16.7 billion from the prior year period. The adjustment for the noncash provision of \$13.3 billion for depreciation and depletion was up \$3.4 billion from 2021. Changes in operational working capital were a reduction of \$1.7 billion, compared to a contribution of \$1.6 billion in the prior year period. All other items net decreased cash flows by \$1.2 billion in 2022 versus a reduction of \$0.2 billion in 2021. See the Condensed Consolidated Statement of Cash Flows for additional details.

Investing activities for the first six months of 2022 used net cash of \$7.0 billion, an increase of \$1.9 billion compared to the prior year. Spending for additions to property, plant and equipment of \$7.7 billion was \$2.6 billion higher than 2021. Proceeds from asset sales were \$1.2 billion compared to \$0.6 billion in the prior year period. Net investments and advances were essentially flat with prior year.

Net cash used in financing activities was \$15.4 billion in the first six months of 2022, including \$6.1 billion for the purchase of 71.1 million shares of ExxonMobil stock, as part of the previously announced buyback program. This compares to net cash used in financing activities of \$14.8 billion in the prior year, reflecting long-term debt repayments of \$7.0 billion during the first six months of 2021.

Total debt at the end of the second quarter of 2022 was \$46.9 billion compared to \$47.7 billion at year-end 2021. The Corporation's debt to total capital ratio was 20.3 percent at the end of the second quarter of 2022 compared to 21.4 percent at year-end 2021. The net debt to capital ratio was 13.2 percent at the end of the second quarter, a decrease of 5.7 percentage points from year-end 2021. The Corporation's capital allocation priorities continue to be investing in advantaged projects, strengthening the balance sheet and paying a reliable dividend.

The Corporation has access to significant capacity of long-term and short-term liquidity. In addition to cash balances, commercial paper continues to provide short-term liquidity, and is reflected in "Notes and loans payable" on the Consolidated Balance Sheet. Cash and cash equivalents was \$18.9 billion at the end of the second quarter of 2022. The Corporation had undrawn short-term committed lines of credit of \$10.6 billion, of which \$10 billion will expire without renewal in the third quarter, and undrawn long-term committed lines of credit of \$0.4 billion as of second quarter 2022.

The Corporation distributed a total of \$7.5 billion to shareholders in the first six months of 2022 through dividends.

The Corporation, as part of its ongoing asset management program, continues to evaluate its mix of assets for potential upgrade. Because of the ongoing nature of this program, dispositions will continue to be made from time to time which will result in either gains or losses. Additionally, the Corporation continues to evaluate opportunities to enhance its business portfolio through acquisitions of assets or companies, and enters into such transactions from time to time. Key criteria for evaluating acquisitions include potential for future growth and attractive current valuations. Acquisitions may be made with cash, shares of the Corporation's common stock, or both.

Litigation and other contingencies are discussed in Note 3 to the unaudited condensed consolidated financial statements.

*(1) Includes "Other taxes and duties" plus taxes that are included in "Production and manufacturing expenses" and "Selling, general and administrative expenses".*

Total taxes were \$14.1 billion for the second quarter of 2022, an increase of \$4.2 billion from 2021. Income tax expense was \$6.4 billion compared to \$1.5 billion in the prior year reflecting higher commodity prices. The effective income tax rate of 31 percent compared to 30 percent in the prior year period. Total other taxes and duties decreased by \$0.7 billion to \$7.8 billion.

Total taxes were \$25.4 billion for the first six months of 2022, an increase of \$7.3 billion from 2021. Income tax expense increased by \$6.8 billion to \$9.2 billion reflecting higher commodity prices. The effective income tax rate of 34 percent compared to 31 percent in the prior year period primarily due to a change in mix of results in jurisdictions with varying tax rates and the impact of one-time items. Total other taxes and duties increased by \$0.5 billion to \$16.2 billion.

In the United States, the Corporation has various ongoing U.S. federal income tax positions at issue with the Internal Revenue Service (IRS) for tax years beginning in 2006. The Corporation filed a refund suit for tax years 2006-2009 in U.S. federal district court (District Court) with respect to the positions at issue for those years. On February 24, 2020, the Corporation received an adverse ruling on this suit. The IRS has asserted penalties associated with several of those positions. The Corporation has not recognized the penalties as an expense because the Corporation does not expect the penalties to be sustained under applicable law. On January 13, 2021, the District Court ruled that no penalties apply to the Corporation's positions in this suit. The Corporation and the government have appealed the District Court's rulings to the U.S. Court of Appeals for the Fifth Circuit (Fifth Circuit). Proceedings in the Fifth Circuit are continuing.

On March 4, 2022, the Corporation also filed a refund suit for tax years 2010-2011 in District Court with respect to the positions at issue for those years. The Corporation has not recognized asserted penalties for 2010-2011 as an expense because the Corporation does not expect the penalties to be sustained under applicable law. Unfavorable resolution of all positions at issue with the IRS would not have a material adverse effect on the Corporation's operations or financial condition.

Forward-looking and other statements regarding our environmental, social and other sustainability efforts and aspirations are not an indication that these statements are necessarily material to investors or requiring disclosure in our filing with the SEC. In addition, historical, current, and forward-looking environmental, social and sustainability-related statements may be based on standards for measuring progress that are still developing, internal controls and processes that continue to evolve, and assumptions that are subject to change in the future, including future rule-making.

The term "project" as used in this report can refer to a variety of different activities and does not necessarily have the same meaning as in any government payment transparency reports.

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Information about market risks for the six months ended June 30, 2022, does not differ materially from that discussed under Item 7A of the registrant's Annual Report on Form 10-K for 2021.

### **ITEM 4. CONTROLS AND PROCEDURES**

As indicated in the certifications in Exhibit 31 of this report, the Corporation's Chief Executive Officer, Chief Financial Officer and Principal Accounting Officer have evaluated the Corporation's disclosure controls and procedures as of June 30, 2022. Based on that evaluation, these officers have concluded that the Corporation's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Corporation in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to them in a manner that allows for timely decisions regarding required disclosures and are effective in ensuring that such information is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. There were no changes during the Corporation's last fiscal quarter that materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

## PART II. OTHER INFORMATION

### ITEM 1. LEGAL PROCEEDINGS

ExxonMobil has elected to use a \$1 million threshold for disclosing environmental proceedings.

Refer to the relevant portions of Note 3 of this Quarterly Report on Form 10-Q for further information on legal proceedings.

### ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

#### Issuer Purchase of Equity Securities for Quarter Ended June 30, 2022
